Rouse Ball For nearly a century, this sparkling classic has provided stimulating hours of entertainment to the mathematically inclined. The problems posed here often involve fundamental mathematical methods and are so appealing because of their appeal is their capacity to tease and delight. In these pages you will find scores of "recreations" to amuse you and to challenge your problem-solving faculties—often to the limit. Now in its 13th edition, Mathematical Recreations and Essays has been thoroughly revised over the decades since its first publication in 1892. This latest edition retains all the remarkable character of the original, but the terminology and treatment of some problems have been updated and new material has been added. Among the challenges in store are geometrical recreations; Polyhedra; Chess-board recreations; Magic squares; Map-coloring problems; Unicursal problems; Cryptography and cryptanalysis; Calculating prodigies; ... and more. You'll even find problems which mathematical ingenuity can solve but which require no knowledge of calculus or analytic geometry to enjoy these games and puzzles. With basic mathematical skills and the desire to meet a challenge you can put yourself to the test and win. In so doing, it addresses the following questions: What are the features of English and Arabic legal texts? What are the similarities and differences of English and Arabic legal texts? What are the difficult areas of legal translation between English and Arabic legal texts? What are the techniques for translating these difficult areas on the lexical and syntactic levels? Features include: A thorough description of the features of legal translation in both English and Arabic, drawing on empirical new research, corpus data analysis and strategic two-way comparisons between source texts and target texts Coverage of a broad range of topics including an outline of the chosen framework for data analysis, a historical survey of legal discourse developments in both Arabic and English and detailed analyses of legal literature at both the lexical and syntactic levels Attention to common areas of difficulty such as Shariah Law terms, archaic terms and model auxiliaries Many examples and excerpts from a wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

Prominence is given to the benefits of a multidisciplinary approach to rehabilitation, with discussion of a very wide range of aspects of rehabilitation in different disease settings. The breadth of coverage is illustrated by the attention paid to less commonly addressed topics such as visual and hearing rehabilitation, the role of robotics and 3D imaging techniques, variations in approach among health care systems, and rehabilitation in end-of-life care. The authors are international academic experts in their fields, guaranteeing a high scientific standard throughout. This manual will be an invaluable tool and source of knowledge for geriatricians and physiatrists but will also appeal to a wider range of clinicians, practitioners, and students.*

*Wuthering Heights is the name of Mr. Heathcliff's dwelling. 'Wuthering' being a significant provincial adjective, descriptive of the atmospheric tumult to which its station is exposed in stormy weather. Pure, bracing ventilation they must have up there at all times, indeed: one may guess the power of the north wind blowing over the edge, by the excessive slant of a few stunted firs at the end of the house; and by a range of gaunt thorns all stretching their limbs one way, as if craving alms of the sun. Happily, the architect had foresight to build it strong: the narrow windows are deeply set in the wall, and the corners defended with large jutting stones. Before passing the threshold, I paused to admire a quantity of grotesque carving lavished over the front, and especially about the principal door; above which, among a wilderness of crumbling griffins and shameless little boys, I detected the date '1500,' and the name 'Hareton Earnshaw.' I would have made a few comments, and requested a short history of the place from the surly owner; but his attitude at the door appeared to demand my speedy entrance, or complete departure, and I had no desire to aggravate his impatience previous to inspecting the penetralium. One stop brought us into the family sitting-room, without any introductory lobby or passage: they call it here 'Ôthe house' pre-eminently. It includes kitchen and parlour, generally; but I believe at Wuthering Heights the kitchen is forced to retreat altogether into another quarter: at least I distinguished a chatter of tongues, and a clatter of culinary utensils, deep within; and I observed no signs of roasting, boiling, or baking, about the huge fireplace; nor any glitter of copper saucers and tin cullenders on the walls. One end, indeed, reflected splendidly both light and heat from ranks of immense pewter dishes, interspersed with silver jugs and tankards, towering row after row, on a vast oak dresser, to the very roof. The latter had never been under-drawn: its entire anatomy lay bare to an inquiring eye, except where a frame of wood laden with oatcakes and clusters of legs of beef, mutton, and ham, concealed it. Above the chimney were sundry villainous old guns, and a couple of horse-pistols: and, by way of ornament, three gaudily-painted canisters disposed along its ledge. The floor was of smooth, white stone; the chairs, high-backed, primitive structures, painted green: one or two heavy black ones lurking in the shade. In an arch under the dresser reposed a huge, liver-coloured bitch pointer, surrounded by a swarm of squealing puppies; and other dogs haunted other recesses.*

**Within the field of second language acquisition, interest in the acquisition of French as a second language has a long-standing tradition, especially in the European context. The aim of this book is to offer a synthesis of current research within this area. It contains contributions from different researchers in the field, including studies on the acquisition of grammar, formulaic language, lexis and pragmatic devices, and covering interlanguage development from beginner level up to very advanced, presumably near-native levels of proficiency. The learners in the studies reported in the volume represent different L1 backgrounds and age groups. The chapters shed light on current issues in research on second language acquisition from different theoretical perspectives, and contribute to a better understanding of L2 French and SLA in general. The volume should be of interest for students, teachers and researchers of L2 French and SLA. Originally published in Language, Interaction and Acquisition 3:1 (2012)**

Listening in the Language Classroom

Conference proceedings. ICT for language learning. 9th edition

**This book challenges the orthodox approach to the teaching of second language listening, which is based upon the asking and answering of comprehension questions. The book's central argument is that a preoccupation with the notion of 'comprehension' has led teachers to focus upon the product of listening, in the form of answers to questions, ignoring the listening process itself. The author provides an informed account of the psychological processes which make up the skill of listening, and analyses the characteristics of the speech signal from which listeners have to construct a message. Drawing upon this information, the book proposes a radical alternative to the comprehension approach and provides for intensive small-scale practice in aspects of listening that are perceptually or cognitively demanding for the learner. Listening in the Language Classroom was winner of the Ben Warren International Trust House Prize in 2008.**

**Advances in Turbulence VII contains an overview of the state of turbulence research with some bias towards work done in Europe. It represents an almost complete collection of the invited and contributed papers delivered at the Seventh European Turbulence Conference, sponsored by EUROMECH and ERCOFTAC and organized by the Observatoire de la Côte d'Azur. New high-Reynolds number experiments combined with new techniques of imaging, non-intrusive probing, processing and simulation provide high-quality data which put significant constraints on possible theories. For the first time, it has been shown, for a class of passive scalar problems, why dimensional analysis sometimes gives the wrong answers and how anomalous intermittency corrections can be calculated from first principles. The volume is thus geared towards specialists in the area of flow turbulence who could not attend the conference as well as anybody interested in this rapidly moving field.**

**NATIONAL BESTSELLER** • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Explains how to learn foreign languages, offering practical advice for overcoming the obstacles.

The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: □ promote and support the learning and teaching of modern languages; □ enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; □ protect linguistic and cultural diversity in Europe; and □ promote the right to quality education for all.
