This Book portrays God's calling of an Afro-American lad from the segregated Southern USA, in 1957, and elevated him and his wife, Dorothy, to become two of

the most outstanding Black Pioneer Missionaries in World Missions, today! They have evangelized and planted churches in over 95 countries, and even more extensively, in the 23 countries where Christians in Action Missions has ministries.

You will experience glimpes of fifty years of the Taylor's life and ministry, beginning with Elgin's call to missions in 1957, while in the USMarines. It Moves to their service as the First Black Missionaries to Japan, 1959-64; Elgin Pastored, studied Japanese,

and attended The University of Maryland, earned his BA degree, and later earned his MTh in California. Dorothy, a high school teacher, taught at Okinawa Christian School and ran the youth ministry. They transferred to Nigeria, Africa, but due to a

civil war, were evacuated to London, England, where they founded a Bible College, an Evangelical Church, and directed CinA's Europe, Africa, and India Ministries for 15 years. Returning to America,1980, they worked at the US Center for World

Missions, Pasadena, CA with Dr Ralph Winters. In 1982, Elgin was elected CEO of CinA Missions International, (the only known Afro-American Director of a multi-ethnic, international, cross curtural ministry during this time). The book closes, with the

spotlight on their present involvement in Ghana, West Africa, where they lead medical/outreach teams, build churches and schools, bore fresh water wells, and hold leadership seminars.They were appointed Chief and Queen Mother in the

Broang Ahafo Region by the King, Ohmahene Okatakayie Kodom IV, in 2001. Today, they are blessed with much remaining fruit, in both the low places of the streets, to the palaces of Kings, to God be the Glory! Health Letter

Summary Learn Git in a Month of Lunches introduces the discipline of source code control using Git. Whether you're a newbie or a busy pro

moving your source control to Git, you'll appreciate how this book concentrates on the components of Git you'll use every day. In easy-to-follow lessons designed to take an hour or less, you'll dig into

Git's distributed collaboration model, along with core concepts like committing, branching, and merging. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from

Manning Publications. About the Book Git is the source code control system preferred by modern development teams. Its decentralized architecture and lightning-fast branching let you concentrate

on your code instead of tedious version control tasks. At first, Git may seem like a sprawling beast. Fortunately, to get started you just need to master a few essential techniques. Read on! Learn

*PAMIR (Parameterized Adaptive
Multidimensional Integration
Routines) is a suite of Fortran
programs for multidimensional
numerical integration over*

hypercubes, simplexes, and hyper-rectangles in general dimension p, intended for use by physicists, applied mathematicians, computer scientists, and engineers. The programs, which are available on the internet at www.pamir-integrate.com and are free for non-profit research

use, are capable of following localized peaks and valleys of the integrand. Each program comes with a Message-Passing Interface (MPI) parallel version for cluster use as well as serial versions.The first chapter presents introductory material, similar to that on the

PAMIR website, and the next is a "manual" giving much more detail on the use of the programs than is on the website. They are followed by many examples of performance benchmarks and comparisons with other programs, and a discussion of the computational integration

*aspects of PAMIR, in comparison
with other methods in the literature.
The final chapter provides details of
the construction of the algorithms,
while the Appendices give technical
details and certain mathematical
derivations.*
