*Empire of the Air* tells the story of three American visionaries—Lee de Forest, Edwin Howard Armstrong, and David Sarnoff—whose imagination and dreams turned a hobbyist's toy into radio, launching the modern communications age. Tom Lewis weaves the story of these men and their achievements into a richly detailed and moving narrative that spans the first half of the twentieth century, a time when the American romance with science and technology was at its peak. *Empire of the Air* is a tale of pioneers on the frontier of a new technology, of American entrepreneurial spirit, and of the tragic collision between inventor and corporation.

*At times it appears that a whole industry exists to perpetuate the myth of origin of the Beatles. There certainly exists a popular music (or perhaps 'rock') origin myth concerning this group and the city of Liverpool and this draws in devotees, as if on a pilgrimage, to Liverpool itself. Once 'within' the city, local businesses exist primarily to escort these pilgrims around several almost iconic spaces and places associated with the group. At times it all almost seems 'spiritual'. One might argue however that, like any function myth, the music history of the Liverpool in which the Beatles grew and then departed is not fully represented. Beatles historians and businessmen-alike have seized upon myriad musical experiences and reworked them into a discourse that homogenizes not only the diverse collective articulations that initially put them into place, but also the receptive practices of those travellers willing to listen to a somewhat linear, exclusive narrative. Other Voices therefore exists as a history of the disparate and now partially hidden musical strands that contributed to Liverpool's musical countenance. It is also a critique of Beatles-related institutionalized popular music mythology. Via a critical historical investigation of several thus far partially hidden popular music activities in pre- and post-Second World War Liverpool, Michael Brocken reveals different yet intrinsic musical and socio-cultural*

*processes from within the city of Liverpool. By addressing such 'scenes' as those involving dance bands, traditional jazz, folk music, country and western, and rhythm and blues, together with a consideration of partially hidden key places and individuals, and Liverpool's first 'real' record label, an assemblage of 'other voices' bears witness to an 'other', seldom discussed, Liverpool. By doing so, Brocken - born and raised in Liverpool - asks questions about not only the historicity of the Beatles-Liverpool narrative, but also about the absence of*

We all have our favourite radio stations-the ones we listen to each morning on the way to work

or school, at night as we relax or get ready to go out. But when we travel too far from the signal, we wind up with static, and find ourselves scanning through countless stations to find something—anything—to listen to. With satellite radio, however, our favourite stations are available to us from one end of the country to the other, playing the music or talk shows we like 24 hours a day, 7 days a week . . . all virtually uninterrupted by commercials. The Pocket Idiot's Guide to Satellite Radio provides an essential introduction to the world of satellite radio. Whether you're considering making the purchase and are confused by the options and equipment available or are already a user looking for installation guidance and tips and tricks for getting the most out of your purchase, this book is designed to help you navigate through the sometimes-complicated world of satellite radio.

This new Beginner Book about manic skiing squirrels—by J. Hamilton Ray with illustrations by Pascal Lemaître—has the feeling of an old classic read-aloud. "Nobody knew how the mania grew. First there was one, and then there were two. Three more came gliding from under the trees. LOOK! On the hill. Those are squirrels on skis! Below lay the town, snow-covered and still. Not a sound could be heard. All was silent, until . . . Swwwishhhh swooped the skiers, all dressed for play. Eighty-five squirrels and more on the way!" As you can imagine, the townsfolk are NOT amused. Can intrepid reporter Sally Sue Breeze find out where the squirrels are getting their skis—and make them stop skiing long enough to eat lunch—before pest-control guy Stanley Powers sucks them up in his vacuum device? (Don't worry—Sally triumphs in a most unexpected way.) With delightfully understated, funny illustrations by Pascal Lemaître, this is the perfect book for beginning readers to curl up and chill out with on a snow day—or any day! Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning.

"The challenge, then, is not to invent new victims or new scapegoats but to mobilize America for the future. What would it take to ensure that all of us can succeed at getting the job done, the problem solved, and the future more secure?" As a student at Yale Law School in 1974, Lani Guinier attended a class with a white male professor who addressed all the students, male and female, as "gentlemen." To him the greeting was a form of honorific, evoking the values of traditional legal education. To her it was profoundly alienating. Years later Guinier began a study of female law students with her

colleagues, Michelle Fine and Jane Balin, to try to understand the frustrations of women law students in male-dominated schools. Women are now entering law schools in large numbers, but too often many still do not feel welcome. As one says, "I used to be very driven, competitive. Then I started to realize that all my effort was getting me nowhere. I just stopped caring. I am scarred forever." After interviewing hundreds of women with similar stories, the authors conclude that conventional one-size-fits-all approaches to legal education discourage many women who could otherwise succeed and, even more, fail to help all students realize their full potential as legal problem-solvers. In *Becoming Gentlemen* Guinier, Fine, and Balin dare us to question what it means to become qualified, what a fair goal in education might be, and what we can learn from the experience of women law students about teaching and evaluating students in general. Including the authors' original study and two essays and a personal afterword by Lani Guinier, the book challenges us to work toward a more just society, based on ideals of cooperation, the resources of diversity, and the values of teamwork.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
