**School reform of one kind or another is a priority for education systems the world over. Yet the voices of students - those most affected by, and most pivotal to, the success or failure of any program of school reform - are rarely heard on this topic. This is the first book to look at school reform from the perspective of the students. The studies included in this collection focus on reform initiatives aimed at overcoming persistent patterns of racial, class and gender inequality. The authors combine the theoretical aspects of research with its practical applications, making this an invaluable resource for teacher educators, classroom practitioners, researchers and policymakers. Critical Voices in School Reform: Students Living Through Change is divided into two parts. Part one describes and analyses programs of reform that turned out contrary to the intentions of adult reformers, illustrating the - often unspoken - tension between adult and student perspectives on school change. Part two looks at reform initiatives that were able to harness student energies and thereby improve pupils' engagement with school life. These reforms, which are finely attuned to the needs and interests of students, offer clear, valuable guidance to those trying to create more equitable school experiences. A concluding chapter draws together the themes and insights gained from looking at school reform through a student-centred lens and offers suggestions for more relevant and lasting reform.**

Language in Social Life is a major series which highlights the importance of language to an understanding of issues of social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the rights of test takers.

"The goal of this research project was to develop a methodology to assist the Wisconsin Department of Transportation (WisDOT) in the evaluation of effectiveness of teen driver education programs over the short and long terms. The research effort was divided into two phases. Phase I focused on the development of an evaluative methodology that was based upon a review of the relevant literature and Wisconsin-specific policies and available data sources. This review culminated in a program assessment tool focused on four contributing areas of teen driver training and education: 1) Guardian Involvement; 2) Driver Education and Training Curricula Requirements; 3) GDL Coordination; and 4) Instructor Qualifications. The proposed methodology was presented to the Project Oversight Committee and was validated through two rounds of pilot testing using materials provided by programs and schools under the oversight of both WisDOT and the Wisconsin Department of Public Instruction. The resulting methodology informed the Phase II implementation plan recommendations. Work products included within this report are an annotated bibliography; a knowledge base documenting best practices and Wisconsin-specific data sources; a methodology that may be used to analyze and evaluate the effectiveness of driver-training programs as they relate to the demonstrated safety and behavior of teen drivers in Wisconsin; and a three-phase implementation plan."--Technical report documentation page.
