Drawing on previously unpublished archival materials as well as historical accounts of American education and the self-help tradition of education in the United States, this book examines the origins, theoretical bases, and implications of writing groups. Following an introduction that points out the varied circumstances under which writing groups develop, the book looks into writing groups from three points of view. The first section deals with history, and contains chapters on writing groups inside academic institutions--such as college literary societies like Harvard's Spy Club and Hasty Pudding Club--and groups outside of academic institutions, which started out mainly as mutual improvement groups and are still prevalent. In the second section, which covers writing group theory, are chapters on collaborative learning (as opposed to the common image of writing in isolation) and theories of language development (mainly Marxist and structuralist). Implications of writing groups are the focus of the third section, which includes a chapter of suggestions for writing group formation and activities, and a chapter on theories of literacy that concentrates on its social aspects. Two extensive bibliographies are included: the first is an annotated list of primary sources which is organized by year, while the second is an alphabetical listing of works consulted. (SKC)

A bestselling modern classic--both poignant and funny--narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a

Anthem Guide to Essay Writing

A Guide To Descriptive Writing: Practice eBook (2nd Edition)

Document from the year 2018 in the subject English Language and Literature Studies - Literature, University of Saida Dr Moulay Tahar (Department of English), language: English, abstract: Writing is both a challenging and an interesting task that requires much writer's attention, that is, it is a type of communication that expresses ideas and makes a chain between the writer and his readers. Thereby, it is unique, creative, and is done for purpose. Among the most essential forms of academic writings are essays that writers start to learn and write from college. They develop an idea in four or five paragraphs, or in a whole book, but the most commonly used are five paragraphs essays or timed essays because they can be written in class period. 'Lectures on Academic Essay Writing' is a booklet for second year students. It is an outgrowth of teaching academic writing for many years. Our experience as teachers and writers has taught us that writing is the most difficult task that requires much practice. Learning how to write essays needs more basics rather than instructions especially in classrooms. Indeed, classrooms are learning communities that are improved through evaluating their members' writing skills. Henceforth, this booklet provides an unpretentious manner on teaching students how to write different types of essays through practices that reinforce their writing skill and provide them with a supportive learning environment that helps them to be good writers. The first part of the booklet provides a detailed rehearsal of the different stages of essay writing, followed by a part that introduces the different elements of an essay, while the last part displays essential explanations on argumentative, process, cause/effect, and comparison/contrast essays. Hence, this part addresses the writing process from paragraph to essay. Lesson plans linked to national standards help students develop lifelong writing skills and confidence as writers while preparing them for standardized writing tests.
