*The first full-scale history of Hannibal's Carthage in decades and "a convincing and enthralling narrative." (The Economist ) Drawing on a wealth of new research, archaeologist, historian, and master storyteller Richard Miles resurrects the civilization that ancient Rome struggled so mightily to expunge. This monumental work charts the entirety of Carthage's history, from its origins among the Phoenician settlements of Lebanon to its apotheosis as a Mediterranean empire whose epic land-and-sea clash with Rome made a legend of Hannibal and shaped the course of Western history. Carthage Must Be Destroyed reintroduces readers to the ancient glory of a lost people and their generations-long struggle against an implacable enemy.*

Everything changes when three gorgeous guys crash into my life. They're determined to mark me as theirs, and make me question everything I hold true. But when the ghosts of my past and future collide, who will be left standing? Me... or the monster who coveted me for all of the wrong reasons, turning me into what I am today... Many women are victims of abuse that's left them unable to move forward in life. It's like living in a continuous storm without relief in sight. The pain inflicted upon them, even as far back as childhood, has left undetectable scars of bitterness, hatred, and resentment for the perpetrators who violated their body, soul, and spirit. Because of this, they are experiencing physical, emotional, and spiritual issues that seem insurmountable and unsolvable. However, Jesus Christ can and will heal afflictions of the soul. Only He can reach inside a human being, and wipe clean the slate of the heart. Forgiveness is the key that unlocks the prison doors incarcerating the souls of those who harbor resentment as a result of being abused. You can be free from anger, bitterness, and

resentment that have gripped your soul. God wants you to live life abundantly. In order to do that, you'll have to forgive those who hurt you, and let go of the past. You cannot move forward looking in the rearview mirror of your life. What God has for you is in front of you, not behind. He wants to free you from the past, so you can walk in your God-given destiny. It's time to take back what the devil stole from you. It's time to walk out of the storm and into the sunshine. It's not just a cold February morning that freezes all activity at IIT. The topper of the Computer Science batch is found hanging inside his room . . . locked from the outside. A day later, in a fit of anxiety, his best friend erases his suicide note from his laptop, thereby obliterating the only way that could have led to understanding the reason behind such a catastrophe. The smartest among the group of software experts asked to retrieve it finally gets hold of it, but silently gives up on finding it and withdraws with the stolen suicide letter. What is it about the letter that makes him hide it from the world? Why does he lose himself in the amaranthine ocean of agony and forgets all else on reading it? Love is life-giving, but *Destroyed by Ishq* explores the other side of love. Are you ready to turn the page?

After winning the science fair with the giant robot she has built, a little girl realizes that there is a major problem.

**Situated within the area stretching from Georgian Bay in the north to Lake Simcoe in the east (also known as Wendake), the Wendat Confederacy flourished for two hundred years. By the mid-seventeenth century, however, Wendat society was under attack. Disease and warfare plagued the community, culminating in a series of Iroquois assaults that led to the dispersal of the Wendat people in 1649. Yet the Wendat did not disappear, as many historians have maintained. In *Dispersed but Not Destroyed*, Kathryn Magee Labelle examines the creation of a Wendat diaspora in the wake of the Iroquois attacks. By focusing the historical lens on the dispersal and its aftermath, she extends the seventeenth-century Wendat narrative. In the latter half of the century, Wendat leaders continued to appear at councils, trade negotiations, and diplomatic ventures - including the Great Peace of Montreal in 1701 - relying on established customs of accountability and consensus. Women also continued to assert their authority during this time, guiding their communities toward paths of cultural continuity and accommodation. Through tactics such as this, the power of the Wendat Confederacy and their unique identity was maintained. Turning the story of Wendat conquest on its head, this book demonstrates the resiliency of the Wendat people and writes a new chapter in North American history. Kathryn Magee Labelle is an assistant professor in the History Department at the University of Saskatchewan.**

**What do you do when you realize the only way to maintain the lifestyle that you're adapted to is to play around with a little fire? For Kayla, it's not only a way of life, but keeping secrets is what's keeping her alive. Her boss, Ms. Wright is a walking soap opera in the flesh and is willing to deceive anyone in order to uphold her social status. Not only has she dragged Kayla in the middle of her drama, but Ms. Wright continues to add layers of treachery along with violence, which are things that Kayla didn't bargain for. Unfortunate for them both, not everyone is willing to continue in this twisted debauchery and it's only a matter of time before an unstable fortress becomes a pile of rubbish.**

**The monopolistic power of companies like Walmart, Amazon, Facebook, and Google distorts and corrupts the American economy--but Thom Hartmann, America's #1 progressive radio host, shows we've broken the control of behemoths like these before, and we can do it again. The biggest problem facing America and the world right now is "bigness." Our industrial and economic sectors--from tech, retail, and media to agriculture, food, and more--are so big that they're beyond the control of citizens, consumers, or the government (in fact, they've captured the latter). Similarly, the billionaire class has gotten so big in terms of wealth that its members have easily corrupted our politics to direct more and more of the nation's wealth and resources to themselves. But America was birthed in a revolt against a monopoly--remember the British East India Company and the Boston Tea Party? If Jefferson and Madison could see how government and business collude today, they'd weep. Hartmann explores how the intentions of the Founders were thwarted and describes commonsense, historically rooted measures we can take--such as revitalizing antitrust regulation, taxing great wealth, and getting money out of politics--to wrest control of our country from the monopolists.**

These three long stories draw us into the lives of three women, all past their first youth, all facing unexpected crises. In the title story, the heroine's serenity is shattered when she learns that her husband is having an affair. In "The Age of Discretion," a successful, happily married professor finds herself increasingly distressed by her son's absorption in his young wife and her worldly values. In "The Monologue," a rich, spoiled woman, home alone on New Year's Eve, pours out a lifetime's rage and frustration in a harrowing diatribe.

"Before the passage of critical preservation legislation in 1978, the Nation's Capital lost an irreplaceable assembly of architecturally and culturally significant buildings. Wanton destruction in the name of progress - particularly in the decades immediately following World War II - resulted in a legacy forever lost, a cultural heritage destroyed by the wrecker's ball." "In originally documenting 252 of these historic losses, the publication of Capital Losses a quarter century ago created a clarion call for preservationists. By reminding us of things lost, James Goode's magisterial and poignant study represented a comprehensive call for action, a mandate for responsible stewardship of the architectural legacy of Washington, D.C. In the decades since, rising public awareness and the passage of the Historic District and Historic Landmark Protection Act in 1978 have slowed the pace of thoughtless destruction. But as this completely new and updated edition of Capital Losses demonstrates, vigilance remains the watchword, especially as pressures for urban growth continue to intensify." "Capital Losses reveals the Washington that was and how it became what it is today. This updated edition includes eighteen more treasures lost - among them Rhodes Tavern and Valley View - and ninety additional historic photographs. The 270 buildings featured here range from the earliest Georgian plantation house to the latest art deco commercial structure and include private houses, hotels, apartment houses, office and government buildings, schools, hospitals, churches, and fire stations." "Both the familiar public Washington of official landmarks and the private city of residential neighborhoods are paid tribute in this volume, dedicated to the vanished. A foreword by noted architectural historian Richard Longstreth brings the preservation story up to the present."--BOOK JACKET. Book jacket.

The newest collection from Nick Flynn, whose "songs of experience hum with immediacy" (The New York Times) Beginning with a poem called "Confessional" and ending with a poem titled "Saint Augustine," Nick Flynn's *I Will Destroy You* interrogates the potential of art to be redemptive, to remake and reform. But first the maker of art must claim responsibility for his past, his actions, his propensity to destroy others and himself. "Begin by descending," Augustine says, and the poems delve into the deepest, most defeating parts of the self: addiction, temptation, infidelity, and repressed memory. These are poems of profound self-scrutiny and lyric intensity, jagged and probing. *I Will Destroy You* is an honest accounting of all that love must transcend and what we must risk for its truth.

It is written in story form for easy reading. ... The information and compilation of techniques set forth in this writing is in no way meant to revise or relace the God-sanctioned, tried and proven methods of raising and training children which we have received from our Anabaptist heritage. Mark Greengrass's gripping, major, original account of Europe in an era of tumultuous change This latest addition to the landmark Penguin History of Europe series is a fascinating study of 16th and 17th century Europe and the fundamental changes which led to the collapse of Christendom and established the geographical and political frameworks of Western Europe as we know it. From peasants to princes, no one was untouched by the spiritual and intellectual upheaval of this

era. Martin Luther's challenge to church authority forced Christians to examine their beliefs in ways that shook the foundations of their religion. The subsequent divisions, fed by dynastic rivalries and military changes, fundamentally altered the relations between ruler and ruled. Geographical and scientific discoveries challenged the unity of Christendom as a belief-community. Europe, with all its divisions, emerged instead as a geographical projection. It was reflected in the mirror of America, and refracted by the eclipse of Crusade in ambiguous relationships with the Ottomans and Orthodox Christianity. Chronicling these dramatic changes, Thomas More, Shakespeare, Montaigne and Cervantes created works which continue to resonate with us. Christendom Destroyed is a rich tapestry that fosters a deeper understanding of Europe's identity today.

*In this first critical account of Matta-Clark's work, Pamela M. Lee considers it in the context of the art of the 1970s—particularly site-specific, conceptual, and minimalist practices—and its confrontation with issues of community, property, the alienation of urban space, the "right to the city," and the ideologies of progress that have defined modern building programs. Although highly regarded during his short life—and honored by artists and architects today—the American artist Gordon Matta-Clark (1943-78) has been largely ignored within the history of art. Matta-Clark is best remembered for site-specific projects known as "building cuts." Sculptural transformations of architecture produced through direct cuts into buildings scheduled for demolition, these works now exist only as sculptural fragments, photographs, and film and video documentations. Matta-Clark is also remembered as a catalytic force in the creation of SoHo in the early 1970s. Through loft activities, site projects at the exhibition space 112 Greene Street, and his work at the restaurant Food, he participated in the production of a new social and artistic space. Have art historians written so little about Matta-Clark's work because of its ephemerality, or, as Pamela M. Lee argues, because of its historiographic, political, and social dimensions? What did the activity of carving up a building-in anticipation of its destruction—suggest about the conditions of art making, architecture, and urbanism in the 1970s? What was one to make of the paradox attendant on its making—that the production of the object was contingent upon its ruination? How do these projects address the very writing of history, a history that imagines itself building toward an ideal work in the service of progress? In this first critical account of Matta-Clark's work, Lee considers it in the context of the art of the 1970s—particularly site-specific, conceptual, and minimalist practices—and its confrontation with issues of community, property, the alienation of urban space, the "right to the city," and the ideologies of progress that have defined modern building programs.*

**MC. He is a cold-blooded killer, incapable of any feeling but hatred. His allegiance lies with Tank and the club. This book is intended for Adults 18 and over due to graphic scenes involving sex, language, and violence. This novella is book one in the Satan's Rebels MC series. First in a duology that reimagines fairy tale tropes within a space opera—The Princess Bride meets Princess Leia. Rory Thorne is a princess with thirteen fairy blessings, the most important of which is to see through flattery and platitudes. As the eldest daughter, she always imagined she'd inherit her father's throne and govern the interplanetary Thorne Consortium. Then her father is assassinated, her mother gives birth to a son, and Rory is betrothed to the prince of a distant world. When Rory arrives in her new home, she uncovers a treacherous plot to unseat her newly betrothed and usurp his throne. An unscrupulous minister has conspired to name himself Regent to the minor (and somewhat foolish) prince. With only her wits and a small team of allies, Rory must outmaneuver the Regent and rescue the prince. How Rory Thorne Destroyed the Multiverse is a feminist reimagining of familiar fairytale tropes and a story of resistance and self-determination—how small acts of rebellion can lead a princess to not just save herself, but change the course of history.**
