Cross-cultural competence is a skill that has become increasingly essential for the managers in multinational companies. For other business people, this kind of competence may spell the difference between surviving and perishing in the new global economy. This book focuses on the dilemmas of these managers and offers constructive advice on dealing with culture shock and turning it to business advantage. Opposing values can be understood as complementary and reconcilable, say Charles Hampden-Turner and Fons Trompenaars. A manager who concentrates on integrating rather than polarizing values will make much better business

mean to become pragmatically competent in a second language (L2)? How can we examine pragmatic competence to make inference of its development among L2 learners? In what ways do research findings inform teaching and assessment of pragmatic competence? This book explores these key issues in Japanese as a second/foreign language. The book has three sections.
