Decades of research have demonstrated that the parent-child dyad and the environment of the

Read Book Developmental Behavioral Pediatrics Evidence And Practice

familyâ€™"which includes all primary caregiversâ€™"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact

Read Book Developmental Behavioral Pediatrics Evidence And Practice

of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine

Read Book Developmental Behavioral Pediatrics Evidence And Practice

their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress

Read Book Developmental Behavioral Pediatrics Evidence And Practice

or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body

Read Book Developmental Behavioral Pediatrics Evidence And Practice

of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by

Read Book Developmental Behavioral Pediatrics Evidence And Practice

technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted

Read Book Developmental Behavioral Pediatrics Evidence And Practice

strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as
