transformation might involve found complex, often unresolved expression in visual and material culture. This diverse collection of essays draws attention to the eclectic objects and forms of visibility that emerged in France from the beginning of the French Revolution through to the end of the July Monarchy in 1848. It offers a new account of the story of French art's modernity by exploring the work of genre painters and miniaturists, sign-

**The words 'aristocrats', 'aristocracy' and 'aristocratic values' appear in many a study of ancient history and culture. Sometimes these terms are used with a precise meaning. More often they are casual shorthand for 'upper class', 'ruling elite' and 'high standards'. This book brings together 12 new studies by an impressive international cast**

**of specialists. It demonstrates not only that true aristocracies were rare in the ancient world, but also that the modern use of 'aristocracy' in a looser sense is misleading. The word comes with connotations derived from medieval and modern history. Antiquity, it is here argued, was different. An introductory chapter by the editors argues that 'aristocracy' is rarely a helpful concept for the analysis of political struggles, of historical developments or of ideology. The editors call instead for close study of the varied nature of social inequalities and relationships in particular times and places. The following eleven chapters explore and in most cases challenge the common assumption that hereditary 'aristocrats' who**

They question, too, the related notion that deep ideological divisions existed between 'aristocratic values', such as hospitality, generosity and a disdain for commerce or trade, and the norms and ideals of lower or 'middling' classes. They do so by detailed analysis of archaeological and literary evidence for the rise and nature of elites and leisure classes, diverse elite strategies, and political conflicts in a variety of states across the Mediterranean. Chapters deal with archaic and classical Athens, Samos, Aigina and Crete; the Greek 'colonial' settlements such as Sicily; archaic Rome and central Italy;**

member of the community. Sanctions against memory could lead to the removal or mutilation of portraits and public inscriptions. Harriet Flower provides the first chronological overview of the development of this Roman practice--an instruction to forget--from archaic times into the second century A.D. Flower explores Roman memory sanctions against the background of Greek and Hellenistic cultural influence and in the context of the wider Mediterranean world. Combining literary texts, inscriptions, coins, and material evidence, this richly illustrated study contributes to a deeper understanding of Roman political culture.

In *Negotiating the New in the French Novel* Teresa Bridgeman applies insights from pragmatic theory to the French novel in order to examine its discourse conventions.

Focussing on texts by some of the greatest and most innovative French novelists - Diderot, Balzac, Flaubert, Zola, Celine, Sarraute and Perec - Bridgeman analyses how these authors established their own conventions, challenged reader expectations and drew conventions from other literary and non-literary forms. *Negotiating the New in the French Novel* shows the development of changing perceptions of genre, author and reader. This book will make fascinating reading for students of French literature - particularly of the nineteenth century novel, students of Stylistics and of Narratology.

"Throughout the whole vast shadowy world of ghosts and demons there is no figure so terrible, no figure so dreaded and abhorred, yet [looked upon] with such fearful fascination, as the vampire, who is himself neither ghost nor demon, but yet who partakes the dark natures and possesses the mysterious and terrible qualities of both." So begins this riveting study by one of the foremost authorities on witchcraft and occult phenomena. An indefatigable researcher, Summers explores the presence of vampires in Greek and Roman lore, in England and Ireland during Anglo-Saxon times, in Hungary,

For the completion of this design, it was necessary to describe all the different tribes of people scattered over the world, and to advert, however briefly, to their mutual relations, and to all that is known respecting their origin and descent, as discovered by historical and philological investigations. Very brief, indeed, must necessarily be such a summary of universal ethnography. It was only possible to state, and that in a manner rather summary than argumentative, results, in which inquiring persons can hardly be expected to acquiesce without the exhibition of unquestionable
