A new mode of masturbating into the next millennium Anyone who has seen her Digital Diaries has intimate knowledge of Natacha Merritt. And of her friends, male and female, and her acquaintances as well. But Merritt's favourite motif is herself: she poses almost every minute of the day for her camera, taking photographs of herself in bed, in the shower, having sex with her friend, masturbating with and without accessories, from every imaginable angle and with the camera usually at arm's length. Merritt, born 1977, works with a digital camera, the Polaroid of the 90s, breaking down the most intimate details into universally accessible bits of information. Eric Kroll came across Natacha Merritt by chance in the internet, where she had put several of her photographs. This was

Wireless talked about the future high-speed wireless technology called WiMax, and already WiMax services are being offered commercially. The future is rushing up on us so fast that the time for a new edition of the Hitchhiker's Guide is now. As in Wireless, we ask the critical questions: What does it all mean? Where is it all going? Time-activity diaries kept by members of the general public indicate that on average people spend around 90% of their time indoors. This is associated with considerable exposure to air pollutants as not only is there infiltration of pollutants from outdoors, there are also emissions indoors that can lead to elevated pollutant concentrations. Despite this, and the fact that the WHO produces air quality guidelines for indoor air, the only statutory requirements for monitoring of airborne
