Gifts: A Study in Comparative Law is the first broad-based study of the law governing the giving and revocation of gifts ever attempted. Gift-giving is everywhere governed by social and customary norms before it encounters the law and the giving of gifts takes place largely outside of the marketplace. As a result of these two characteristics, the law of gifts provides an optimal lens through which to examine how different legal systems engage with social practice. The law of gifts is well-developed both in the civil and the common laws. Richard Hyland's study provides an excellent view of the ways in which different civil and common law jurisdictions confront

common issues. The legal systems discussed include principally, in the common law, those of Great Britain, the United States, and India, and, in the civil law, the private law systems of Belgium and France, Germany, Italy, and Spain. Professor Hyland also serves a critique of the dominant method in the field, which is a form of functionalism based on what is called the *praesumptio similitudinis*, namely the axiom that, once legal doctrine is stripped away, developed legal systems tend to reach similar practical results. His study demonstrates, to the contrary, that legal systems actually differ, not only in their approach and conceptual structure, but just as much in the results.

This study explores the reasons behind

the different responses of the legal systems of Europe, Japan and the USA in coping with BSE, one of the major food safety crises in recent years. Making reference to the most recent advances on risk perception that cognitive and social sciences, such as legal anthropology and sociology of law, have experimented with, Risk Perception, Culture, and Legal Change examines the role that culture plays in moulding the process of legal change. Attention is focused on the regulative frameworks implemented to guarantee the safety of the food chain against the BSE menace and on the liability responses sketched to compensate the victims of mad cow disease, showing how both these elements have been influenced by the cultural context

Complicated Crossings and New Perspectives

Equity is a multi-faceted subject, an authentic crossroads of problems. The perspective of this study is, as a result, a mix of focuses, which includes: the philosophy of law, general legal theory, justice theory, the history of law, comparative law, legal dogma, etc. In this book, as in various earlier studies of the author, she uses the "three-dimensional" method, which facilitates a stratified focus in agreement with three levels: facts, norms, and values. The subject of equity has never been analysed as completely as in this work. It includes a dynamic study of the different types of equity

Download File PDF Diritto Civile 6

throughout history and in the different legal systems; the concept, content, limits, functions and types of equity; the relationship between equity and related ideas, and equity in all the branches of the legal order.

This book, written by leading scholars, presents theoretical, historical and legal inquiries into the legacy of National Socialism and Fascism.

This book argues that the effective protection of fundamental rights in a contemporary, multicultural society requires not only tolerance and respect for others, but also an ethics of reciprocity and a pursuit of dialogue between different cultures of human rights. Nowadays, all cultures tend to claim an equitable arrangement that can be articulated in the terms of fundamental rights and in the multicultural organization of the State. Starting from the premise that every culture is and always was intercultural, this book elaborates a new, and more fundamentally, pluralist view of the relationship between rights and cultural identity. No culture is pure; from the perspective of an irreducible cultural contamination, this book argues, it

Download File PDF Diritto Civile 6

is possible to formulate constitutional idea of diversity that is properly intercultural. This concept of intercultural constitutionalism is not, then, based on abstract principles, but nor is it bound to any particular cultural norm. Rather, intercultural constitutionalism allows the interpretation of rights, rules and legal principles, which are established in different contexts.

*First published in 1917 (Part 1) and 1918 (Part 2), with a second edition in 1946, this is the first English translation of Santi Romano's classic work, *L'ordinamento giuridico* (The Legal Order). The main focus of *The Legal Order* is the notion of institution, which Romano considers to be both the core and distinguishing feature of law. After criticising accounts of the nature of law centred on notions of rule, coercion or authority, he offers a compelling conception, not merely of law as an*

Download File PDF Diritto Civile 6

institution, but of the institution as 'the first, original and essential manifestation of law'. Romano advances a definition of a legal institution as any group who share rules within a bounded context: for example, a family, a firm, a factory, a prison, an association, a church, an illegal organisation, a state, the community of states, and so on. Therefore, this understanding of legal institutionalism at the same time provides a ground-breaking theory of legal pluralism whereby 'there are as many legal orders as institutions'. The acme of a jurisprudential current long overlooked in the Anglophone environment (Romano's work is highly regarded in France, Germany, Spain and South America, as well as in Italy), The Legal Order not only proposes what Carl Schmitt described as a 'very significant theory'. More importantly, it offers precious insights for a thorough rethinking of the relationship

between law and society in today's world.

"Non-contractual liability arising out of damage caused to another" is one of the three main non-contractual obligations dealt with in the DCFR. The law of non-contractual liability arising out of damage caused to another (in the Common Law known as tort law or the law of torts, but in most other jurisdictions referred to as the law of delict) is the area of law which determines whether one who has suffered a damage can on that account demand reparation (in

Download File PDF Diritto Civile 6

money or in kind) from another with whom there may be no other legal connection than the causation of damage itself. Besides determining the scope and extent of responsibility for dangers of one's own or another's creation, this field of law serves to protect fundamental rights in the private law domain, that is to say horizontally between citizens inter se. Based on pan-European comparative research which annotates the work, this volume presents model rules on

Download File PDF Diritto Civile 6

liability. Explanatory comments and illustrations amplify the policy decisions involved. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come but provides also a fairly detailed indication of the present legal situation in the Member States.

Technology has attracted an increasing level of attention within studies of disability and disability rights. Many researchers and advocates have maintained skepticism

Download File PDF Diritto Civile 6

towards technology out of the fear that technology becomes another way to 'fix' impairments. These skeptical views, however, contrast with a more positive approach towards the role that technology can play in eliminating barriers to social participation. Legal scholarship has started to focus on accessibility and accessible technology and in conjunction with the recently adopted United Nations Convention on the Rights of Persons with Disabilities has put a great emphasis on accessibility, highlighting the

Download File PDF Diritto Civile 6

role that accessible technology plays in the promotion and protection of the rights of people with disabilities. Against this background, this book gathers together different contributions that focus on enhancing the production, marketing and use of accessible technology. Building upon previous academic studies and in light of the UNCRPD, accessible technology is considered a tool to increase autonomy and participation. Overall, this book attempts to show, through a multifaceted and

inter-disciplinary analysis, that different regulatory approaches might enhance accessible technology and its availability. Neuroscience and Law
Family Law and Society in
Europe from the Middle Ages
to the Contemporary Era

Since the 1960s, the nature and the future of the European Union have been defined in legal terms. Yet, we are still in need of an explanation as to how this entanglement between law and EU polity-building emerged and how it was maintained over time. While most of the literature offers a disembodied account of European legal integration, Brokering Europe reveals the multifaceted roles Euro-lawyers have played in EU polity, notably

Download File PDF Diritto Civile 6

beyond the litigation arena. In particular, the book points at select transnational groups of multipositioned legal entrepreneurs which have been in a situation to elevate the role of law in all sorts of EU venues. In doing so, it draws from a new set of intellectual resources (field theory) and empirical strategies only very recently mobilized for the study of the EU. Grounded on an extensive historical investigation, Brokering Europe provides a revised narrative of the 'constitutionalization of Europe'.

of various sectors of antiquity. This volume is the first publication to reconstruct the history of this compilation through the fascinating questions that it poses to the scholar. There are essays on its general structure, and on some of the most singular texts preserved therein. Other papers offer a comparison between this compilation and the other canonical collections compiled in Italy between the fourth and sixth centuries, as well as between the CA and other contemporary

literary products. Adopting a new approach, some contributions also ascertain who could physically have access to the materials that were collected in the CA, and where the compiler could find them. All these fresh studies have led to new hypotheses regarding the period in which the collection, or at least some of its parts, took shape and the personality of its author.

This volume addresses the study of family law and society in Europe, from medieval to contemporary

ages. It examines the topic from a legal and social point of view. Furthermore, it investigates those aspects of the new family legal history that have not commonly been examined in depth by legal historians. The volume provides a new 'global' interpretative key of the development of family law in Europe. It presents essays about family and the Christian influence, family and criminal law, family and civil liability, filiation (legitimate, natural and adopted children), and

family and children labour law. In addition, it explores specific topics related to marriage, such as the matrimonial property regime from a European comparative perspective, and impediments to marriage, such as bigamy. The book also addresses topics including family, society and European juridical science.

neuroscience in recent years, sparking a number of discussions within the legal field. This book studies the various interactions between neuroscience and the world of law, and explores how neuroscientific findings could affect some fundamental legal categories and how the law should be implemented in such cases. The book is divided into three main parts. Starting with a general overview of the convergence of neuroscience and law, the first part outlines the importance of their continuous interaction, the challenges that neuroscience poses for the concepts of free will and responsibility, and the peculiar

characteristics of a “new” cognitive liberty. In turn, the second part addresses the phenomenon of cognitive and moral enhancement, as well as the uses of neurotechnology and their impacts on health, self-determination and the concept of being human. The third and last part investigates the use of neuroscientific findings in both criminal and civil cases, and seeks to determine whether they can provide valuable evidence and facilitate the assessment of personal responsibility, helping to resolve cases. The book is the result of an interdisciplinary dialogue involving jurists,
