

## Dirty Linen Couples As Seen Through Their Laundry Material Culture

***We all know what it's like to be annoyed by little things that our husband, wife or partner does - leaving the cap off the toothpaste tube, leaving the toilet lid up, leaving dirty clothes on the floor - and we know how easily these little grievances of everyday life can spin out of control. In this brilliant new book the sociologist Jean-Claude Kaufmann shows us how and why sparks can suddenly fly even in the most well-adjusted couples. They see themselves as being in total harmony but they are mistaken! The clash between their uniquely individual attitudes to life rumbles on in silence until suddenly erupting in emotional outbursts each time an object or an attitude reveals for the thousandth time the unbearable and incomprehensible otherness of the partner. When this occurs, a whole panoply of tactics is deployed, ranging from the combative (secret acts of revenge) through the neutral (sulking) to the subtly loving. But these stormy episodes within relationships can have a happy ending, for it is through learning to overcome these irritations and aggravations that love is ultimately strengthened.***

***The new edition of this highly-regarded book includes comprehensive discussion of the nature of an affair and the five types of affairs and their underlying dynamics. The author addresses issues regarding revealing the affair, management of the consequences, rebuilding, and treating an unmarried third party, as well as the host of complex issues regarding children and custody arrangements. New material for the second edition includes cybersex and the effects of new technology on fidelity in marriage; the effects of managed care on treatment; marriage to the third party; and a new chapter on affairs and violence.***

Domestic advice literature is rich in information about design, ideals of domesticity, consumption and issues of identity, yet this literature remains a relatively neglected resource in comparison with magazines and film. Design at Home brings together etiquette, homemaking and home decoration advice as sources in the first systematic demonstration of the historical value of domestic advice literature as a genre of word and image, and a discourse of dominance. This book traces a transatlantic domestic dialogue between the UK and the US as the chapters explore issues of design, domesticity, consumption, social interaction and identity markers including class, gender and age. Areas covered include: • the use of domestic advice by historians • relationships between advice, housing and the middle class • links between advice and gender • advice and the teenage consumer Design at Home is essential reading for students and scholars of cultural and social history, design history, and cultural studies.

The best-selling author of Personality Plus and Personality Plus for Parents now shows couples how to apply the personality principles that have made Florence so popular. Husbands and wives will understand why they act the way they do and how they can best respond to each other. Personality Plus for Couples gives husbands and wives: \* a personality profile test to identify their personality types \* the trademark characteristics of each personality type \* ways to resolve hot conflicts that arise between spouses \* what to expect if you marry someone of the same type, someone of the opposite type, or someone with a compatible personality type Littauer offers pages of stories and practical insight about how to approach each personality differently. When husbands and wives care enough to understand what makes the other tick, they can celebrate each other's individuality and build a marriage that lasts.

In Metropolitan Intimacies: An Ethnography on the Poetics of Daily Life, Francisco Cruces examines intimacy and meaning-making in metropolitan residents' daily lives. An ethnography based on rich micro-stories, Cruces situates life poetics amongst other metropolitan processes in three major cities—Madrid, Montevideo, and Mexico City—to reveal the complex meanings around modern urbanity.

Written by a team of sociologists, this text introduces readers to social psychology by focusing on the contributions of sociology to the field of social psychology. The authors believe sociology provides a unique and indispensable vision of the social-psychological world in the theoretical perspectives that sociologists employ when studying human

interactions and in the methodological techniques they utilize. Within the pedagogically rich chapters, topics are examined from the perspectives of symbolic interactionism, social structure and personality, and group processes.

An African-American homicide detective in the LAPD's elite Robbery-Homicide Division, Charlotte Justice becomes caught up in a sensitive case involving a cold-blooded murder in LA's Koreatown, a killing that launches a media frenzy and has profound repercussions for the city's mayoral race. Reprint.

This up-to-date, highly readable, theory-based, and application-oriented book fills a crucial void in literature on couple therapy. Few books in the couple therapy market bridge between theory and practice; texts tend to lean in one direction or the other, either emphasizing theory and research with little practical application, or taking a cookbook approach that describes specific techniques and interventions that are divorced from any conceptual or theoretical base. However, couples therapy requires a high degree of abstract thinking, as well as ingenuity, inventiveness and skill on the part of the therapist. Case Studies in Couples Therapy blends the best of all worlds: clinical applications with real and diverse couples that have been derived from the most influential theories and models in couples and family therapy, all written by highly experienced and respected practitioners in the field. In Case Studies in Couples Therapy, readers will grasp the essentials of major theories and approaches in a few pages and then see how concepts and principles are applied in the work of well-known clinicians. The case studies incorporate a wide variety of couples from diverse backgrounds in a number of different life situations. It is simultaneously specific (including specific processes and interventions applied with real clients) and broad (clearly outlining a broad array of theories and concepts) in scope, and the interventions are directly linked to theoretical perspectives in a clear and systematic way. Students and clinicians alike will find the theoretical overview sections of each chapter clear and concise, and each chapter's thorough descriptions of effective, practical interventions will give readers a strong sense of the connections between theory and practice.

Preventive Approaches in Couples Therapy is the first thorough overview of the leading approaches to preventing marital distress and dissolution. Written for professional therapists, paraprofessionals, and lay people involved in the development and implementation of preventive programs, the editors have created a resource accessible to all those in the field of couples therapy. The volume serves as an important resource for programs that the therapist may already use and as an insightful introduction into new programs that can be used to and invigorate these existing therapeutic approaches.

To many, the situation for black Americans in the world today seems hopeless. In Dirty Laundry, author Lavelle presents his personal view of race relations in the world and how these relations have affected both the black and white culture. Through a series of essays, Lavelle describes the current state of black culture, examines the elements that have caused the erosion of the black community, and describes what the future holds for black Americans. Dirty Laundry presents Lavelle's thoughts on array of topics relevant to the black community: Race issues in the world Segregation versus integration Black social and cultural issues The role of the police and the justice system in the black world Parents and crime Athletes and sports While sharing his opinions and views, Lavelle suggests actions that can be taken that would improve the future for both black Americans and the United States as a whole.

Challenges and Solutions in Ethnographic Research: Ethnography with a Twist seeks to rethink ethnography 'outside the box' of its previous tradition and to develop ethnographic methods by critically discussing the process, ethics, impact and knowledge production in ethnographic research. This interdisciplinary edited volume argues for a 'twist' that supports openness, courage, and creativity to develop and test innovative and unconventional ways of thinking and doing ethnography. 'Ethnography with a twist' means both an intentional aim to conduct ethnographic research with novel

approaches and methods but also sensitivity to recognize and creativity to utilize different kinds of 'twist moments' that ethnographic research may create for the researcher. This edited volume critically evaluates new and old methodological tools and their ability to engage with questions of power difference. It proposes new collaborative methods that allow for co-production and co-creation of research material as well as shared conceptual work and wider distribution of knowledge. The book will be of use to ethnographers in humanities and social science disciplines including sociology, anthropology and communication studies.

Scarcity in the Modern World brings together world-renowned scholars in an open access book to examine how concerns about the scarcity of environmental resources such as water, food, energy and materials have developed, and subsequently been managed, from the 18th to the 21st century. These multi-disciplinary contributions situate contemporary concerns about scarcity within their longer history, and address recent forecasts and debates surrounding the future scarcity of fossil fuels, renewable energy and water up to 2075. This book offers a fresh way of tackling the current challenge of meeting global needs in an increasingly resource-stressed environment. By bringing together scholars from a variety of academic disciplines, this volume provides an innovative multi-disciplinary perspective that corrects previous scholarship which has discussed scientific and cultural issues separately. In doing so, it recognizes that this challenge is complex and cannot be addressed by a single discipline, but requires a concerted effort to think about its political and social, as well as technical and economic dimensions. This volume is essential for all students and scholars of environmental and economic history. The ebook editions of this book are available open access under a CC BY-NC-ND 4.0 licence on [bloomsburycollection.com](http://bloomsburycollection.com). As ten-year-old Marly Colone stands in front of her tiny, four-room house in a small Illinois town in the autumn of 1966, she takes one look at the dark-haired, handsome stranger walking toward her on the sidewalk and knows. He is her destiny, and nothing will change her mind. She has just found the man she will marry. Her beloved father had died abruptly the previous spring, propelling Marly from the innocence of childhood into the uncertain, often tumultuous world of a blended family after her mother remarries. In a bizarre twist of fate, Marly comes face-to-face once again with her soulmate, Johnny, who happens to be her new stepbrother—and twelve years her senior. Determined to do anything to make Johnny notice her, the love-starved Marly embarks down a dangerous path, desperate to replace her father with a man who happens to share many of the same mannerisms. Lost in the murky world between adolescence and adulthood, Marly has no doubt she has claimed her destiny. Dirty Laundry is a tale of forbidden love as a young girl desperately searches for validation and affection in an unlikely place.

Meet the Smart Wife—at your service, an eclectic collection of feminized AI, robotic, and smart devices. This digital assistant is friendly and sometimes flirty, docile and efficient, occasionally glitchy but perpetually available. She might go by Siri, or Alexa, or inhabit Google Home. She can keep us company, order groceries, vacuum the floor, turn out the lights. A Japanese digital voice assistant—a virtual anime hologram named Hikari Azuma—sends her “master” helpful messages during the day; an American sexbot named Roxxy takes on other kinds of household chores. In The Smart Wife, Yolande Strengers and Jenny Kennedy examine the emergence of digital devices that carry out “wifework”—domestic responsibilities that have traditionally fallen to (human) wives. They show that the principal prototype for these virtual helpers—designed in male-dominated industries—is the 1950s housewife: white, middle class, heteronormative, and nurturing, with a spick-and-span home. It's time, they say, to give the Smart Wife a reboot. What's wrong with preferring domestic assistants with feminine personalities? We like our assistants to conform to gender stereotypes—so what? For one thing, Strengers and Kennedy remind us, the design of gendered devices re-inscribes those outdated and unfounded stereotypes. Advanced technology is taking us backwards on gender equity. Strengers and Kennedy offer a Smart Wife “manifesta,” proposing a rebooted Smart Wife that would promote a revaluing of femininity in society in all her glorious diversity.***

***“It is simply too much” is a common complaint of the modern age. This book looks at how people and institutions deal with overflow - of information, consumption or choices. The essays explore the ways in which notions of overflow - framed in terms of excess and abundance or their implicit opposites, scarcity and dearth - crop up in a number of contexts such as sociological and economic theory, management consulting, consumer studies, and the politics of everyday life. Chapters range from studies of overload at home, at work or in the world of cyber information; strategies of coping with overflow in institutions such as news agencies; and historical comparisons. When, where, how and for whom is overflow a problem or a blessing?***

***This book deals with contemporary epistemological questions, connecting Educational Philosophy with the field of Science- and Technology Studies. It can be understood as a draft of a general theory of world-disclosure, which is in its core a distinction between two forms of world-disclosure: experiment and exploration. These two forms have never been clearly distinguished before. The focus lies on the experimental form of world-disclosure, which is described in detail and in contrast to the explorational form along the line of twenty-one characteristics, which are mainly derived from empirical studies of experimental work in the field of natural sciences. It can also be understood as an attempt to integrate elements of the Anglo-Saxon Philosophy of Science with elements of the German tradition of Educational Philosophy. This is also reflected in the style of writing. In accordance to the content-level of the book, the argument for experimental forms of world-disclosure is written in an essayistic, readable style, which can be understood as an experimental form of writing. This book is a translation of the doctoral thesis 'Experiment und Exploration. Bildung als experimentelle Form der Welterschließung' (summa cum laude). The thesis was published in German in 2010 by Transcript (Bielefeld) in the series called 'Theorie Bilden', edited by Prof. Dr. Hannelore Faulstich-Wieland, Prof. Dr. Hans-Christoph Koller, Prof. Dr. Karl-Josef Pazzini and Prof. Dr. Michael Wimmer.***

Dirty Laundry is a memoir written as conversational novellas to the four men who came into Janet Jaymes' life. Whenever we start a relationship, we talk about our past, our myriad thoughts, desires and dreams. Through such conversations, Janet Jaymes' describes her life as if each novella is an emotional panel that sewn together becomes a colorful quilt written in the bold colors Janet Jaymes used to paint as a young artist. Dirty Laundry is about a woman who, for years, always seemed to walk into the strangest situations and unconventional relationships she never asked for, as if she was in the wrong place at the right time, or the right time in the wrong place. For Janet Jaymes, life didn't turn out like she planned. Dirty Laundry describes in remarkable detailed-memory, in brutal honesty, and with a sense-of-humor-reality, the good, the bad and the ugly of an average woman's life that turned out to be far from average. Dirty Laundry is an emotional, roller-coaster ride like a high-flying drug trip with crashing, coming-down lows and in the end, we find out how Janet Jaymes survived. Dirty Laundry is an entertaining human interest portrayal of a woman's life that guarantees to be a page-turner.

This is an accessible guide for the wide range of professionals who practice couples therapy. Treating Couples promotes the clinical functions of evaluation, assessment, judgment, and hypothesis-formation and testing and will serve as an invaluable resource for determining which approaches are the most ethical, flexible, and creative for the effective treatment of couples.

Clearly structured in five thematic sections this fascinating and readable book, from best-selling author David Morley, presents a set of interlinked essays which discuss and examine the key debates in the fields of media and cultural studies.

Time pressure, speed and the desire for instant consumption pervade accounts of contemporary lives. Why is it that people feel

pressed for time, in what ways have societies changed to create this condition, and with what implications? This book examines critical contentions in the field of time and society, ranging from the emergence and dominance of 'clock time' and time discipline, the time pressures associated with consumer culture, through to technological innovation and the acceleration of everyday lives. Through extensive analysis of empirical studies of the changing ways in which people organise and experience home, work, leisure, consumption and personal relationships, time pressure is shown to be a problem of the coordination and synchronization of activities. Appreciation of temporal rhythms - formed and reproduced through the organisation and performance of social practices - is necessary to tackle the challenges of coordination, and offers new avenues for analysing social issues such as sustainable consumption, health and well-being. This book is essential reading for all of those interested in social change, consumption and time, including researchers and students from across the social sciences.

This book depicts warning signs concerning people and situations they become involved with and if acknowledged could possibly prevent a person from making bad choices in their life. It further postulates how a person can deal with the stress in their life; which most times many willfully enter into. It examines how people can live healthy lives by letting go of their past problems, which may be stunting their growth. It enlightens, encourages, and is reality based. If a person chooses; this book can help them find peace and harmony as a whole, for their mind, body, and spirit!

In *The Procurers*, amateur but lively senior sleuths Bidy and Justin find themselves back on board the Pacific Queen Royale, as agents for the Australian National Veterans Network. They are tasked with uncovering increasing and unexplained passenger disappearances at sea, and also to keep an eye on Professor Witherspoon, who is working with a world consortium to provide free, clean fusion energy via a Tokamak reactor in France. ANVN and Detective Inspector Brien Schultz from Adelaide Crime, also seeks help from celebrated Australian yachtsman, Sir Tim Harvey, to uncover terrorists at sea, whom Bidy suspects of abducting boat people as fodder for body parts, and processing them aboard the Goliath, a giant fishing trawler fitted with huge freezers. As one of the abductees is an American National, the U.S. Coast Guard is involved, providing use of a Black Hawk helicopter to track the Goliath, which escapes for concealment to an Indian ship demolition graveyard to continue its macabre butchery. Will Justin and the Black Hawk crew be in time to save Bidy and the abductees on the disabled trawler from imminent demolition?

Mobility is a basic principle of modernity besides others like individuality, rationality, equality and globality. Taking its cue from this concept, this book presents a movement that begins with the macro-social transformations linked to mobility and ends with empirical discussions on the new forms of mobility and their implications for everyday life. The book opens with a study of the social changes unique to the second age of modernity, with contributions from Ulrich Beck, John Urry, Wolfgang Bonss and Sven Kesselring. It continues with a discussion of the implications of these changes for sociological research. Authors such as Vincent Kaufmann, Weert Canzler, Norbert Schneider, Beate Collet, Ruth Limmer and Gerlinde Vogl focus on a series of field examinations, both qualitative and quantitative, of emerging mobilities. The book is a foray into the exciting new field of interdisciplinary mobility research informed by theoretical reflection and empirical investigation.

This book provides a detailed description of how to apply Lean Six Sigma in the health care industry, with a special emphasis on process improvement and operations management in hospitals. The book begins with a description of the Enterprise Performance Excellence (EPE) improvement methodology developed by the author that links several methodologies including systems thinking, theory of constraints, Lean and Six Sigma to provide an enterprise-wide prioritization and value-chain view of health care. The EPE methodology helps to improve flow at the macro or value-chain level, and then identifies Lean Six Sigma detailed improvements that can further improve processes within the value-chain. The book also provides real-world health care applications of the EPE and Lean Six Sigma methodologies that showed significant results on throughput, capacity, operational and financial performance. The Enterprise Performance Excellence methodology is described, and also the Six Sigma DMAIC (Define-Measure-Analyze-Improve-Control) problem solving approach which is used to solve problems for health care processes as they are applied to real world cases. The case studies include a wide variety of processes and problems including: emergency department throughput improvement; operating room turnaround; operating room organization; CT imaging diagnostic test reduction in an emergency department; linen process improvement; implementing sepsis protocols in an emergency department; critical success factors of an enterprise performance excellence program.

***The study of everyday life is fundamental to our understanding of modern society. This agenda-setting book provides a coherent, interdisciplinary way to engage with everyday activities and environments. Arguing for an innovative, ethnographic approach, it uses detailed examples, based in real world and digital research, to bring its theories to life. The book focuses on the sensory, embodied, mobile and mediated elements of practice and place as a route to understanding wider issues. By doing so, it convincingly outlines a robust theoretical and methodological approach to understanding contemporary everyday life and activism. A fresh, timely book, this is an excellent resource for students and researchers of everyday life, activism and sustainability across the social sciences.***

***Dreaming, according to my personal and convincing analysis, is the reviewing of the previous days activities and committing them to memory. Each dream episode is symbolized by what we already have stored in our memory banks. Emotions or events will evoke a symbol that will appear in the dream along with other symbols already encoded to create a story line that seems strange, funny, or even slightly confused. The massive numbers of memories we have would be impossible to categorize separately. It is much more efficient to draw out these encoded symbols from our memory and store yesterdays memorable happenings in the same code. If we do not have a symbolic representation for something or someone, then that person, item, or activity will represent itself and create a new code. What compounds the mystery of symbolism is that each individual has established his own very personal ones throughout his own life experiences. Thus, no one is truly able to decipher another's dream. A dream can even be the result of a radio or TV story heard during sleep and absorbed into the dream. The dialogue may be repeated quite accurately but the dreamer creates his own picture images. I have experienced this quite often, waking to ask, Why did she or he say this or that? and compare the reality to my dream scenes. (Perhaps we should give credence to the possibility that we might learn during sleep while a recorded voice recites the lesson repeatedly.) On the other hand, watching a TV program that impresses or evokes certain emotions can trigger a dream later with our own symbols to create our own episode. A sound can produce a quick little dream. Instantaneously - between a click before an alarm rings and the ring itself can cause a flash of a dream according to what that sound conjured up from our memory bank. If a sound does not wake us, we will weave it into our dream story in marvelous ways. Just a touch that probably would be unexplainable unless one woke up to the ongoing sound and recognize it as having been in our dream. Recurring dreams, I am convinced, represent a certain emotion or feeling that we experienced somewhere back in time and that scene is brought forward whenever it is needed to depict that emotion. The scene is representative of a prior emotional experience and comes forth as the same scene in our dream each time that same emotion is reflected from the previous day. Thus the recurrence. Our life experiences being different, so would our storage areas be comprised of different methods of remembering. The swimming scenes that recur occasionally in my dreams are always very pleasing to me. Even though I do not swim, simply watching swimmers evokes a relaxing, soothing sensation within me. I'm sure the previous day had pleasurable times that were being reflected. On the other hand, when I dream of flooding or turbulent water, a negative experience in the previous day is revived in that same night's dream as an unpleasant water scene. Actually, the last swimming episode in my life was a near disaster for me and perhaps that particular occasion was the one that influences the negative evocation of water. Yet, strangely enough, watching people swim is a pleasure to me, hence the positive sensation. Other emotions anxiety, sadness, fear, anger, joy, etc., are represented in a symbolic manner that is unique to us alone, as is the original encoded episode. We require codes or symbols as mental shorthand to store in a compact unit the massive number of thoughts, activities and emotions we experience during a lifetime. The recurrence of certain episodes or metaphors eliminates the necessity to store another code. I believe it is erroneous to infer mystical or psychological interpretations. Dreams are a natural function of the marvelous composition of the human body such as blinking, swallowing, smiling, etc. There has not been a single dream that I have been unable to reconcile with the activities***

What drives attractive male cousins to rape and kill ten young women? Why do an altar girl and her boyfriend lure innocent victims into their customised torture van? Couples who kill comprise only twenty per cent of killers, but they often murder serially and are responsible for particularly inhumane deaths. Sadistic friends, psychotic sisters and an increasingly pathological mother-son team are amongst those profiled in this exploration of the world's most deviant duos. There are infamous British cases, such as the Moors Murderers and the Wests, as well as many equally disturbing but less well-known ones. In the third of this series, which focuses on the psychology of murderers, Carol Anne Davis explores the formative influences of these killers and their deadly dynamics. Comprising of thirteen in-depth case studies and exclusive interviews with experts and one of the Wests' surviving victims, *Couples Who Kill* provides an unequalled study of this disturbing subject.

The emotional, social, and economic challenges faced by migrants and their families are interconnected through complex decisions related to mobility. *Tangled Mobilities* examines the different crisscrossing and intersecting mobilities in the lives of Asian migrants, their family members across Asia and Europe, and the social spaces connecting these regions. In exploring how the migratory process unfolds in different stages of migrants' lives, the chapters in this collected volume broaden perspectives on mobility, offering insight into the way places, affects, and personhood are shaped by and connected to it.

Russia's Great Reforms of 1861 were sweeping social and legal changes that aimed to modernize the country. In the following decades, rapid industrialization and urbanization profoundly transformed Russia's social, economic, and cultural landscape. Barbara Alpern Engel explores the personal, cultural, and political consequences of these dramatic changes, focusing on their impact on intimate life and expectations and the resulting challenges to the traditional, patriarchal family order, the cornerstone of Russia's authoritarian political and religious regime. The widely perceived "marriage crisis" had far-reaching legal, institutional, and political ramifications. In *Breaking the Ties That Bound*, Engel draws on exceptionally rich archival documentation—in particular, on petitions for marital separation and the materials generated by the ensuing investigations—to explore changing notions of marital relations, domesticity, childrearing, and intimate life among ordinary men and women in imperial Russia. Engel illustrates with unparalleled vividness the human consequences of the marriage crisis. Her research reveals in myriad ways that the new and more individualistic values of the capitalist marketplace and commercial culture challenged traditional definitions of gender roles and encouraged the self-creation of new social identities. Engel captures the intimate experiences of women and men of the lower and middling classes in their own words, documenting instances not only of physical, mental, and emotional abuse but also of resistance and independence. These changes challenged Russia's rigid political order, forcing a range of state agents, up to and including those who spoke directly in the name of the tsar, to rethink traditional understandings of gender norms and family law. This remarkable social history is thus also a contribution to our understanding of the deepening political crisis of autocracy.
