years (the 40s, 50s, and 60s), to the stories of El informe de Brodie and the poems of La cifra and other later collections. Robin Fiddian analyses the development of a postcolonial sensibility in works such as 'Mythical Founding of Buenos Aires', 'Tlon, Uqbar, Orbis Tertius', 'Theme of the Traitor and the Hero', and 'Brodie's Report'. He examines Borges's treatment of national and regional identity, and of East-West relations, in several essays and poems, contained, for example, in Other Inquisitions and Seven Nights. The

theoretical concepts of 'coloniality' and 'Occidentalism' shed new light on several works by Borges, who acquires a sharper political profile than previously acknowledged. Fiddian pays special attention to Oriental subjects in Borges's works of the 70s and 80s, where their treatment is bound up with a critique of Occidental values and assumptions. Classified by some commentators over the years as a precursor of post-colonialism, Borges in fact emerges as a prototype of the postcolonial intellectual exemplified by

James Joyce, Aime Cesaire (for example), and Edward Said. From a regional perspective, his repertoire of geopolitical and historical concerns resonates with those of Leopoldo Zea, Enrique Dussel, Eduardo Galeano, and Joaquin Torres Garcia, who illustrate different strands and kinds of Latin American post-colonialism(s) of the twentieth century. At the same time, manifest differences in respect of political and artistic temperament mark Borges out as a postcolonial intellectual and creative writer who is sui generis.

How do we talk meaningfully about the sacred in contexts where conventional religious expression has so often lost its power? Inspired by the influential work of David Jasper, this important volume builds on his thinking to identify sacrality in a world where the old religious and secular debates have exhausted

Access Free Discovering The Tempest Discovery Rubric

themselves and theology struggles for a new language in their wake. Distinguished writers explore here the idea of the sacred as one that exists, paradoxically, in a space that is both possible and impossible: profoundly theological on the one hand, but also deeply this-worldly and irreligious on the other. This is a sacredness that is simultaneously 'present' and 'absent': one which encompasses – as Jasper himself characterises it – 'the impossible possibility of an absolute vision'. The book teaches us that the sacred assumes a renewed potency when fully engaged with the creativity that happens across religion, literature, philosophy and the arts.

geographical literature comparable to that of Marco Polo and Ibn Battuta. William accompanied King Louis IX of France on the Seventh Crusade in 1248. On May 7, 1253, on Louis' orders, he set out from Constantinople on a missionary journey to convert the Tatars to Christianity. He actually followed the route of the first journey of the Hungarian Friar Julian. With William's party were Bartolomeo da Cremona, an attendant called Gosset, and an interpreter named in William's report *Homo Dei*, meaning "man of God", perhaps representing the Arabic Abdullah, "servant of God." After reaching the Crimean town of Sudak, William continued his trek with oxen and carts. Nine days after crossing the Don he met Sartaq Khan, ruler

Five weeks later, after the departure from Sudak, he reached the encampment of Batu Khan, Mongol ruler of the Volga River region. Batu refused conversion but sent the ambassadors on to the Great Khan of the Mongols, Möngke Khan. He and his travelling companions set off on horseback on September 16, 1253 on a 9,000 km journey to the court of the Great Khan at Karakorum. Upon arrival they were received courteously, and he was given an audience on January 4, 1254.

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-

Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early

twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from Mansfield Park to Heart of Darkness and Aida. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, Culture and Imperialism reopens the dialogue between literature and the life of its time.

The design of school curriculums involves deep

thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in What Should Schools Teach? The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects,

but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in
