The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of “islands” both distinct and connected. Though drawing on philosophers of Europe’s past, Cacciari calls not to resist Europe’s sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable

cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve. In 1591, Giovanni Paolo Gallucci published his *Della simmetria dei corpi humani*, an Italian translation of Albrecht Dürer's *Four Books on Human Proportion*. While Dürer's treatise had been translated earlier in the sixteenth-century into French and Latin, it was Gallucci's Italian translation that endured in popularity as the most cited version of the text in later Baroque treatises, covering topics that were seen as central to arts education, connoisseurship, patronage, and the wider appreciation of the *studia humanitatis* in general. The text centres on the relationships between beauty and proportion, macrocosm and microcosm: relationships that were not only essential to the visual arts in the early modern era, but that cut

across a range of disciplines - music, physiognomics and humoral readings, astronomy, astrology and cosmology, theology and philosophy, even mnemonics and poetry. In his version of the text, Gallucci expanded the educational potential of the treatise by adding a Preface, a Life of Dürer, and a Fifth Book providing a philosophical framework within which to interpret Dürer's previous sections. This translation is the first to make these original contributions by Gallucci accessible to an English-speaking audience. Gallucci's contributions illuminate the significance of symmetry and proportion in the contemporary education of the early modern era, informing our understanding of the intellectual history of this period, and the development of art theory and criticism. This is a valuable resource to early modern scholars and students alike, especially those specialising in history of art, philosophy, history of

"This lavish book is the first ever art historical study to survey this specific and crucial period in the history of 'La Serenissima' – the Baroque. The 17th century saw Venice's last big drive to respond on a cultural and artistic level to the Republic's inexorable decline on the great stage of European politics. The city's fabric still reflects the desire that was felt at the time for grandiloquent displays of hoped-for triumph. Excess and ostentation prevailed, fuelling a tendency for abundant ornamentation, a taste for the grotesque and the bizarre, and a zeal for enormity and greatness. Here, the authors trace the progression of painting, sculpture and architecture in 17th-

century Venice in a series of scholarly essays illuminated by hundreds of glorious illustrations celebrating the city's seminal exemplars of Baroque style, among them Santa Maria della Salute, the mosaics of St Mark's and the paintings of Giambattista Tiepolo."--Publisher's description.

work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international

connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

This landmark publication celebrates one of the most exciting periods in European art. It brings together 93 paintings and 85 drawings from the Royal Collection and accompanies an exhibition of international importance.

The earliest paintings in the book date from the beginning of the sixteenth century and include Giovanni Bellini's Portrait of a Young Man, Lorenzo Costa's Portrait of a Lady with a Lapdog, and the Portrait of a Man, which has previously been attributed to Raphael. From the end of the seventeenth century is the series of

twelve paintings on copper by Luca Giordano, illustrating the story of Cupid and Psyche. In between are works by Andrea del Sarto, Bronzino, Caravaggio, Correggio, Titian, Giulio Romano, Jacopa Bassano, Lorenzo Lotto, Palma Vecchio, Veronese, Parmigianino, Tintoretto, Annibale Carracci, Domenichino, Domenico Fetti, Orazio and Artemisia Gentileschi, Guido Reni, and Guercino; ranging in scale from small devotional paintings to large altarpieces, and from religious narratives to mythological subjects and portraiture. The sixteenth and seventeenth centuries also saw some of the richest and most dynamic developments in Italian drawing, and this book includes some of the finest drawings by many of the

greatest artists of the period - from the achievements of the High Renaissance (including works by Leonardo, Raphael, Michelangelo, Andrea del Sarto and Parmigianino), through the later Renaissance in northern Italy (Barocci, Tintoretto, the Carracci), to the Baroque in Rome (Domenichino, Bernini, Maratti), Bologna (Reni, Guercino) and beyond. Several of the drawings are published under new attributions, and all the entries reflect recent developments in this field. Scholarly thinking on a number of the paintings is also reassessed, in some cases for the first time since John Shearman 's The Early Italian Paintings in the Collection of Her Majesty The Queen (1983) and Michael Levey 's The

Later Italian Pictures in the Collection of Her Majesty The Queen (2nd edn 1991). Fresh insights are drawn from the latest research, and from recent cleaning and conservation, which has transformed critical opinion on a number of the paintings, in particular The Calling of Saints Peter and Andrew, a painting that is now firmly attributed to Caravaggio himself, rather than a follower. There are also further fascinating works by artists rarely encountered in British collections, such as Polidoro da Caravaggio, Francesco Salviati, Federico Zuccaro, Cristofano Allori and Guido Cagnacci.

Hand drawing and sketching are fundamental aspects for visual communication in the design field. Individuals can

use these two techniques to improve their understanding of spatial concepts, to provide common language for translation of visual ideas and to assist with developing creative design solutions. This book provides every student with an opportunity to learn hand design drawing skills. Students are progressed from very basic drawing techniques to the drawing of complete interior perspective rooms. The step-by-step instructions, hand drawn illustrations and video demonstrations, provide effective support material for this process. In addition, creative strategies and helpful hints throughout the book encourage students to overcome typical obstacles. Creating realistic drawings in proportion depends on the

ability to draw a box in perspective. Therefore, the basic theory of this book uses the box method of drawing. Furthermore, all of the objects illustrated are interior elements, furniture and accessories. Each of the three sections in the book builds upon the other. Part I, Drawing Fundamentals, focuses on techniques for learning basic line drawing skills. It covers drawing various forms and the adding of value, texture, pattern, shade and shadow. Part II, Drawing Interior Elements, demonstrates techniques for drawing furniture in one-point and two-point perspective. It also includes instruction for drawing plants, tabletop objects, accessories and window treatments. Finally, Part III,

Perspective Drawing, provides detailed instructions for drawing one-point and two-point perspectives of interior spaces. This section provides students the opportunity to bring together all they have learned in previous sections and apply it to toward communicating design ideas. This edition also contains a new section on Advanced Perspective Techniques, which provides a variety of tips and techniques for creating and embellishing perspective drawings.

Dosso Dossi has long been considered one of Renaissance Italy's most intriguing artists. Although a wealth of documents chronicles his life, he remains, in many ways, an enigma, and his art continues to be as elusive as it is compelling. In *Dosso's Fate*, leading scholars

from a wide range of disciplines examine the social, intellectual, and historical contexts of his art, focusing on the development of new genres of painting, questions of style and chronology, the influence of courtly culture, and the work of his collaborators, as well as his visual and literary sources and his painting technique. The result is an important and original contribution not only to literature on Dosso Dossi but also to the study of cultural history in early modern Italy.

imagery for research, teaching, and publication in the history of art. This book offers a series of case studies intended to introduce and define an important class of fifteenth-century Italian art not previously recognized. It is argued that the paintings and sculptures discussed were created privately by artists for personal satisfaction and internal needs, outside the traditional framework of patronage and commercial gain. Since there is no direct documentation from this period of a work being privately made, the selection presented here is necessarily speculative. Instead, the essays focus on works by Piero della Francesca, Mantegna,

Michelangelo, Bellini, and Titian that appear in the artists testaments, letters of refusals to sell, and inventories showing ownership at the time of death. The task at hand is to uncover the motivation and meaning of works of art in which the medieval craftsman began to rise to the status of independent artist, and the maker and the viewer confront each other face to face for the first time.

Today, the National Museum of Antiquities in Leiden is internationally known for its outstanding archaeological collections. Yet its origins lie in an insignificant assortment of artefacts used for study by Leiden University. How did this transformation come about? Ruurd Halbertsma has delved into the archives to show that the appointment of Caspar Reuvens as Professor of Archaeology in 1818 was the crucial turning point. He tells the dramatic

story of Reuven's struggle to establish the museum, with battles against rival scholars, red tape and the Dutch attitude of neglect towards archaeological monuments. This book throws new light on the process of creating a national museum, and the difficulties of convincing society of the value of the past.
