In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

How to install a UK satellite TV system explained in simple terms. A comprehensive guide containing everything you need to know to install a system that will work and continue to work for many years. For readers in the UK and nearby Europe. The author has run a 'help desk' for people installing satellite TV since 1995 so there isn't much that he doesn't know. (And he's modest, too.) The tips in this book will save you money by helping you to avoid mistakes and unnecessary purchases.

The Expat Guide: Moscow is designed for the expatriate either planning to move to Moscow or who is already living in Moscow. It is hoped that information in this guide will help reduce the

steepness of the learning curve that the new expatriate in Moscow has to undergo in order to establish a rewarding, and fulfilling life in a huge and often bewildering city. The guide has been written by an expatriate who related the research she conducted to the progressive stages of her personal learning curve. The author has experienced first-hand the trials and tribulations... and the joys, of learning to live in Moscow.

The Digital Satellite TV Handbook and companion CD-ROM will serve as your complete interactive course in the new digital satellite TV technologies. This textbook, which provides a comprehensive overview of all the digital satellite TV platforms currently in use world-wide, includes the essential satellite coverage maps and transmission parameters that readers will need to receive digital TV services from any location around the world. It also presents those aspects of digital video compression and high definition TV that are of the highest relevance to installers, technicians, and other satellite professionals working in the global direct-to-home (DTH) satellite TV industry. The Digital Satellite TV Handbook analyzes the hardware requirements of digital DTH receiving systems by comparing and contrasting the new digital TV technologies with earlier analog TV transmission systems, so that readers can readily grasp all of the details required to make the transition from the analog era of yesterday to the new all-digital world of the future. The Digital Satellite TV Handbook is based on the author's extensive experience as an instructor for private corporations and trade associations around the world. To facilitate the learning experience, the author has included a series of "Quick Check" exercises and answer keys so that readers can determine for themselves whether or not they have adequately understood the various course segments provided. Mathematical formulas that are relevant to course content also are presented at the end of each chapter. Best of all, the companion CD-ROM version of the Handbook, which may be opened by any Internet browser software program, contains numerous Internet hyperlinks.

Readers can click on any textbook hyperlink to immediately access hundreds of additional pages of supplementary information from the world-wide web or obtain information updates concerning the current operations of satellite system operators and digital TV programmers around the globe. The CD-ROM also gives readers access to full-color versions of all the textbooks, footprint maps, charts and other illustrations. A graphic-intensive training manual "Quick Check" exercises in each chapter Mathematical formulas relevant to each chapter's content

Newnes Guide to Satellite TV is a practical guide, to the installation and servicing of satellite TV receiving equipment. Derek Stephenson provides all the essential background information without weighing it down with excessive theory or mathematics, and covers the practice of installation and servicing with clear step-by-step guidance. Essential data tables and numerous diagrams are included throughout. This book meets the practical need between theoretical textbook and simple installation guide. The work includes topics such as digital TV, including MPEG-2, reception requirements, LNB requirements, digital link budget extensions, and a new section on squinting antennas. The Guide has always been known for the practical nature of the information it contains, such as the control of problems involving 'sparklies', trees, rain and vandals (solved by the now famous 'two drunks high' dish mounting rule). The result is a text which provides the necessary information to specify, install and maintain both fixed and polar mount antenna systems along with small IF distribution systems for small blocks of flats and hotels. Derek Stephenson is a practising video/satellite TV repair engineer and the author of Satmaster Pro, a leading Windows-based software package for satellite TV. Practical guide without excessive maths or theory

Written by a practicing video/satellite TV repair engineer Provides all the necessary info to install and maintain Satellite TV systems
