This annual series presents fundamental research on the theory and practice of management. Volume 7 contains articles presented at the 2001 meeting of the International Conferences on Advances in Management (ICAM), held in Athens, Greece. ICAM's goal is to be truly comparative-in terms of the broad scope of management perspectives, in the broad-ranging locations of its research as well as its application, and in its comparisons of findings, methodologies, and operational definitions. This volume exemplifies ICAM's objectives. Part 1, "Organization Theory, Learning, and Effectiveness," revisits the management theory jungle, reports on the development organizational learning capabilities in Europe, encourages organizational learning through cultural diversity, and reviews the role of corporate parent . Part 2, "Behavior and Attitudes in Organizations," considers the relationships of religion to organizational citizenship and whistle-blowing behaviors, identifies antecedents of misbehavior among nurses and social welfare workers, and uses process framework as a method to depict encroaching processes and change in organizations. Part 3, "International and Cross-Cultural Management," looks at various issues of management abroad. Topics include the dimensions and levels of power bases and their relationships to subordinates' compliance and satisfaction in the U.S. and South Korea, the relationship between empowerment and quality of work life in Mexico, and case studies of organizational intellectual capital in China. Part 4, "Management in the Public Sector," turns attention to efforts to recognize and build on differences in public administration. Part 5, "Managing Human Resources," addresses the nature of researcher values in human resource management and considers recent publications in mainstream human resources in order to isolate the patterns of research. Part 6, "Role of Research in Management," discusses the need for processual thinking. It presents a list of factors contrasting two views of management: the classical view, and the "process view of management." This volume will be of particular interest to corporate executives, economists, and labor studies specialists. M. Afzalur Rahim is founding editor of the International Journal of Organizational Analysis and International Journal of Conflict Management, and is professor of management at Western Kentucky University. Robert T. Golembiewski is distinguished research professor at the University of Georgia, and has authored or edited over seventy-five books. Kenneth D. Mackenzie is the Edmund P. Learned Distinguished Professor and president of Mackenzie and Company. He has published numerous articles in scholarly journals and several books.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 146, Russia's Resurgence, examines recent developments in the foreign policy and strategy of the Russian Federation, including an examination of its aggression against neighboring states with Russian populations, its recent focus on strengthening its military capabilities, its larger strategy vis-à-vis NATO and the United States, its utilization of hybrid warfare in the "gray zone" to achieve its goals, its increasing influence on Middle Eastern politics, and the historical context within which these developments have occurred. This volume includes Congressional Research Service reports on security issues concerning the United States, Ukraine, and the Russian Federation, as well as an English-language version of the Military Doctrine of the Russian Federation made available to the public, NATO's Framework for Future Alliance Operations, and recent studies on Russia's hybrid warfare from the NATO Defense College and the Joint Special Operations University Press.

This book demonstrates the consequences of legislators' strategic communication for representation in American politics. Representational Style in Congress shows how legislators present their work to cultivate constituent support. Using a massive new data set of texts from legislators and new statistical techniques to analyze the texts, this book provides comprehensive measures of what legislators say to constituents and explains why legislators adopt these styles. Using the new measures, Justin Grimmer shows how legislators affect how constituents evaluate their representatives and the consequences of strategic statements for political discourse. The introduction of new statistical techniques for political texts allows a more comprehensive and systematic analysis of what legislators say and why it matters than was previously possible. Using these new techniques, the book makes the compelling case that to understand political representation, we must understand what legislators say to constituents.
