*"Do Androids Dream of Electric Sheep?" is one out of at least six novels by Philip K. Dick that deal substantially with the questions surrounding androids. It is exactly the distortion between the real as the jumping-off point cited above and the hypothetical, unreal, fictional which creates a critical comment on the world the present reader lives in. The special focus on humanlike androids in "Do Androids Dream of Electric Sheep" implies a particular philosophical issue. Of course, the somewhat murky, obscure and intransparent depiction of androids involves the problem of man-machine relationships, which can to a certain extent be equated with human-android relationships. But Dick goes a step further, pointing out the differences as well as the parallels between*

One could even argue that Dick tried to create a kind of meeting halfway between man and android. This description meets exactly to core of our analysis, which deals with the impact and the effects created by this somewhat ambiguous representation of human and android life."*

Abstract: The characters in Philip K. Dick's novel "Do Androids  
Dream of Electric Sheep?" are either humans or androids, these

androids are inferior to human beings and among the humans there  
are bounty hunters whose task it is to kill the androids. The androids  
intend to be like human beings by the way they live and by behaving  
like humans. It is interesting to examine what distinguishes the

androids in the novel from human beings and if these distinctions are clear or if there are some contradictions or problems when it comes to distinguishing between androids and humans. First of all, this paper will investigate the differences between androids and human beings according to Dick 's novel in general and then it will focus on empathy which plays an important role in the story. It will be dealt with general definitions of empathy and the question if empathy is really a distinguishing factor or if androids are also able to feel empathy to a certain extent. Furthermore, the paper will concentrate on the role of animals for human beings in general and on the role animals play for the human beings in the novel.

Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's Do Androids Dream of Electric Sheep? The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These

essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in Paradise Lost, Frankenstein, detective fiction, and previous science fiction cinema.

Selected Stories of Philip K. Dick contains twenty-one of Dick's most dazzling and resonant stories, which span his entire career and show a world-class writer working at the

peak of his powers. In “The Days of Perky Pat,” people spend their time playing with dolls who manage to live an idyllic life no longer available to the Earth’s real inhabitants. “Adjustment Team” looks at the fate of a man who by mistake has stepped out of his own time. In “Autofac,” one community must battle benign machines to take back control of their lives. And in “I Hope I Shall Arrive Soon,” we follow the story of one man whose very reality may be nothing more than a nightmare. The collection also includes such

classic stories as “The Minority Report,” the basis for the Steven Spielberg movie, and “We Can Remember It for You Wholesale,” the basis for the film Total Recall. With an introduction by Jonathan Lethem, Selected Stories of Philip K. Dick is a magnificent distillation of one of American literature's most searching imaginations.

### Detailed Summary, Analysis and Reading Guide

Seminar paper from the year 2016 in the subject English - Literature, Works, grade: A+, , course: Literary History and Theory, language: English, abstract: Published in 1968 "Do Androids Dream of Electric Sheep?" by Philip K. Dick, the novel is set in a post-apocalyptic near-future America, which is falling apart, after a nuclear war called World War Terminus. Animals are almost extinct and keeping and owning animals have become an obsession for the remaining society. The worst thing a human can do is to harm an animal or to feel nothing at

the idea of harming an animal. Thus caring for an animal has become symbol of one's humanity. However, because genuine animals are extremely expensive very few people can afford them and so most people are forced towards the much cheaper electric animals to keep up the pretence. To own a real animal is a sign of distinction and prestige. Before the story's beginning Deckard owned a genuine sheep, but it died, and Deckard had to replace it with an electric one. Deckard's electric sheep leaves him discontent as he yearns for the prestige that would come with the ownership of a real animal. The novel is arguably as influential and relevant today as when it came out. Its social commentary and critique of a twenty-first century America in the grip of soul-crushing hyper-

capitalism can be said to be poignant still. The works of Philip K. Dick and, in particular, *Do Androids Dream* has attracted a small army of scholars and theorist who have applied everything from psychoanalytical criticism to postmodernism. However, a Marxist criticism has not been applied to *Do Androids Dream* so far. Such a reading is the focus of this paper, as I find that there are several reference to Marxist theory. Throughout the novel, Dick provides a profound social commentary through the vision of a near-future dystopian society. Dick vividly demonstrates how consumerism and capitalism can create a society loaded with socialist elements, even in a world that has suffered nuclear war. Through Deckard who contemplates his place in society via his disdain

of his electric sheep, Dick forces the reader to consider the importance of material possessions and how they can affect social status. One would assume that material things would have less significance in a world that has suffered a nuclear holocaust, however, Do Androids Dream shows the opposite; namely, a scenario where one's possessions in society are of the utmost importance. To illustrate how a dystopian society would still hold material possessions in such high regard, Dick embeds numerous Marxist elements into his work as h Science fiction-roman om livet på Jorden efter en altødelæggende krig, hvor de få overlevende kommer i konflikt med de menneskelignende robotter, androider, som de selv har skabt

fourteen years in prison, Gerald "Stew Pot" Reeves, age thirty-one, returns home to live with his mom in Parkland, a black middle-class neighborhood on Chicago's South Side. A frightening delinquent before being sent away, his return sends Parkland residents into a religiously infused tailspin, which only increases when Stew Pot announces that he experienced a religious awakening in prison. Most neighbors are skeptical of this claim, with one notable exception: Mrs. Motley, a widowed retiree and the Reeves's next-door neighbor who loans Stew Pot a Bible, which is seen by Stew Pot and many in the community as a friendly gesture. With uncompromising fervor (and with a new pit bull named John the Baptist), Stew Pot appoints himself the moral judge of Parkland. He discovers that a
