The two halves of the well-received first Realm Hunter story arc (Pursuit of the Silver Dirk and Trail of the Elder Gods) are brought together in a single volume. Bear Waters, a simple bounty hunter from the magic-laden city of Northport, discovers the existence of parallel worlds as he pursues the Silver Dirk, a mad cultist bent on bringing the Elder Gods back to not only his world, but also at least four others. All in one volume, this volume includes the modern "police procedural" investigations of World One, the magical adventures of World Two, the two-fisted pulp action of World Three, the prehistoric adventures of World Four, and the mysterious World Zero, as well as the Lovecraft-inspired horrors that Bear and his friends must battle. Throughout his travels, Bear gathers an ever-growing collection of new friends and allies, and battles a more varied collection of enemies than he'd ever imagined.

Werewolves living in the Surrey Hills battle with deadly family secrets, an unforgeting ancient mythology, and monsters - human and created - striving for species dominance. One hell of a storm is coming. When all hangs in the balance, what do you sacrifice for the future you want? Emotional, humorous and highly erotic in places, this is dark paranormal fantasy, not for the faint of heart.

FINALLY! ALL FOUR BOOKS IN ONE VOLUME. THE PATTERN SHIP, POD, NUBL WARS AND EXODUS Ex-Marine, Zeke Callaghan is befriended by a lone alien and two partially sentient AIs who save his life. Life on Earth develops quickly as alien technology is introduced along with a warning of an apocalyptic threat to all humanity. The Nubl, a warning artificial lifeform views biological races as infestations and is set to annihilate humanity when it arrives. The world will never be ready, but there's always a chance. At the same time Zeke is physically changing. A wartime surgical implant is forcing a mutation to his DNA. One of the alien AI also becomes infested when it's contaminated with Zeke's DNA. The physical changes in them both are unexpected. Look out for the new series coming in 2022 starting with The Transhuman War

Children of the Fallen

When you're responsible for the Entire Universe it's important to get each day off to a good start. But today has begun on the wrong foot and it's getting steadily worse. There are four horsemen in Reception, endless incompetence in the Boardroom and the ghastly shadow of Celestial Audit waiting in the wings. Someone has discovered a glitch in the system and there's an unauthorised planet on the loose. As the doom-mongers gather to warn of the apocalyptic prophecies of the Mayan Calendar we take a look from the inside at the build-up to Armageddon. Relax...smile...and build a shelter in the garden.

All three books in C.J. Cherryl's epic The Faded Sun trilogy, Kesrith, Shon'jir, and Kutath, collected in one volume. They were the mrī-tall, secretive, bound by honor and the rigid dictates of their society. For aeons this golden-skinned, golden-eyed race had provided the universe mercenary soldiers of almost unimaginable ability. But now the mri have faced an enemy unlike any other—an enemy whose only way of war is widespread destruction. These "humans" are mass fighters, creatures of the herb, and the mri have been slaughtered like animals. Now, in the aftermath of war, the mri face extinction. It will be up to three individuals to save whatever remains of this devastated race: a warrior—one of the last survivors of his kind; a priestess of this honorable people; and a lone human—a man sworn to aid the enemy of his own kind. Can they retrace the galaxy-wide path of this nomadic race back through millennia to reclaim the ancient world that first gave them life?

An omnibus edition consisting of all three volumes of Madeline Ashby's epic sci-fi masterwork, The Machine Dynasty. Collects vN, iD and ReV. vN Amy Peterson is a von Neumann machine, a self-replicating humanoid robot. For the past five years, she has been grown slowly as part of a mixed organic/synthetic family. She knows very little about her android mother's past, so when her grandmother arrives and attacks her mother, little Amy wastes no time: she eats her alive. Now she carries her malfunctioning granny as a partition on her memory drive, and she's learning impossible things about her clade's history – like the fact that the failsafe that stops all robots from harming humans has failed.. Which means that everyone wants a piece of her, some to use her as a weapon, others to destroy her. iD Javier is a self-replicating humanoid on a journey of redemption. Javier's quest takes him from Amy's island, where his actions have devastating consequences for his friend, toward Mecha where he will find either salvation... or death. ReV The Rapture, which vN were engineered for, finally comes to pass. Now that the failsafe that once kept vN from harming humans has been hacked, all are discovering the promise – and the peril – of free will. With her consciousness unleashed across computer systems all across the world, the vicious vN Portia stands poised to finally achieve her lifelong dream of bringing humanity to its knees. The old battle between her and her granddaughter Amy comes to an epic conclusion in the war for the very systems that keeps the planet running. Can Amy get her family to the stars before Portia destroys every opportunity for escape and freedom?

"A departure at right angles to thinking in the modern Western world. An important, original work, that should get the widest possible hearing" (Iain McGilchrist, author of The Master and his Emissary) Middle Way Philosophy is not about compromise, but about the avoidance of dogma and the integration of conflicting assumptions. To rely on experience as our guide, we need to avoid the interpretation of experience through unnecessary dogmas. Drawing on a range of influences in Buddhist practice, Western philosophy and psychology, Middle Way Philosophy questions alike the assumptions of scientific naturalism, religious revelation and political absolutism, trying to separate what addresses experience in these doctrines from what is merely assumed. This Omnibus edition of Middle Way Philosophy includes all four of the volumes previously published separately: 1. The Path of Objectivity, 2. The Integration of Desire, 3. The Integration of Meaning, and 4. The Integration of Belief.

Original Sin by Michael Jan Friedman Centuries after the death of the original Ellen Ripley, her clone has joined the fight against the Alien threat. With the help of an android named Call, a brutal hired gun named Johner, and a paraplegic mechanic named Vriess, she will battle an Alien horror, and discover the answer to a question that pierces the Alien mystery to its seething acid-chamber of a heart. DNA War by Diane Carey In a bleak galaxy, the hospitable planet Rosamond 6 is a rare find. But while it may look like an oasis among the stars, it harbors a fatal secret: it is infested with Aliens. Eager to prove her theory that the Aliens can be reasoned with, anthropologist Jocasta Malvaux has set up an observation post there. And something unexpected happens: the Aliens don't attack. But, why? Could it be that the monsters are evolving? Or is it a matter of time until every person on the planet must fight for their lives?
