The International
Financial Reporting
Standards are quite
different from other
sets of accounting
standards, and are
fundamentally

different from US-

are based on

principles, and not on
detailed rules.

Financial Reporting
under IFRS:A topic-

offers a global
perspective on IFRS
by presenting the
prescribed rationale
and principles and
illustrating them

through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements, through examples, activities, questions and answers. The book is

broadly divided into
three sections.

Section one examines
the structure of the
Balance Sheet and
the Income
Statement, their links
and the accounting
mechanisms used to
prepare them. Section
two deals with the
identification,
evaluation and
reporting of Balance

Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks.

Throughout the book special topics are covered, including Derivatives and Hedge accounting (IAS 39), Business Combination (IFRS 3) and Operating

Segments (IFRS 8).
