commercial systems. The primary function of this book is to provide a guideline to those interested in gaining a skill-set from aquaponics that can be used in the for profit sector or to increase their hobby experience. Have you always desired to establish a good plant cultivation practice or improve an existing one, and even combine that with

fish farming but you either don't have enough space, you don't have enough time or capacity to maintain both practices -or don't even know where to begin? Then keep reading... Aquaponics refers to an alternative DIY gardening system that combines traditional aquaculture gardening with hydroponics gardening in a single,

symbiotic environment. In this system, the water byproduct from an existing aquaculture system is processed, firstly, into nitrites, and then into nitrates that are fed to plants as life-sustaining vitamins and minerals. Afterwards, the nutrient-rich water is recycled back to the aquaculture system. Have you got a strained back or
