Market: cardiologists and fellows (26,000), second year medical students (18,000/year), internal medicine residents (23,000); internists (75,000), family practice clinicians and residents (55,000); nurse practitioners (50,000), physician assistants (40,000)

This lavishly illustrated and comprehensive volume is the first devoted entirely to the subject of Irish furniture and woodwork. It provides a detailed survey—encompassing everything from medieval choir stalls to magnificent drawing-room suites for the great houses—from earliest times to the end of the eighteenth century. The first part of the book presents a chronological history, illustrated with superb examples of Irish furniture and interior carving. In a lively text, the Knight of Glin and James Peill consider a broad range of topics, including a discussion of the influence of Irish craftsmen in the colonies of America. The second part of the book is a fascinating pictorial catalogue of different types of surviving furniture, including chairs, stools, baroque sideboards, elegant tea and games tables, bookcases, and mirrors. The book also features an index of Irish furniture-makers and craftsmen of the eighteenth century, compiled from Dublin newspaper advertisements and other contemporary sources.

In an eloquent history of landscape and land use, Vittoria Di Palma takes on the "anti-picturesque"—how landscapes that elicit fear and disgust have shaped our conceptions of beauty and the sublime. Built in 1610 during the reign of James I and remodeled in 1637–39 by the future first Earl of Dysart, Ham House and its gardens have endured through centuries of English history while remaining representative of the styles and culture of the original inhabitants. It is one of the few places where Caroline décor—as developed by British architect Inigo Jones and familiar to Peter Paul Rubens and Anthony van Dyck—can still be appreciated. To mark the 400th anniversary of one of the most famous houses in Europe, eighteen internationally recognized scholars join National Trust curators in documenting the history of Ham House and its collections. The new

discoveries, reattributions, and revelations of the contributors are accompanied by specially commissioned photography of the house and its contents. An appendix includes complete transcriptions of house inventories for the 17th, 18th, and 19th centuries, published here for the first time.

A groundbreaking study of the role of Muslims in eighteenth-century France From the beginning, French revolutionaries imagined their transformation as a universal one that must include Muslims, Europe's most immediate neighbors. They believed in a world in which Muslims could and would be French citizens, but they disagreed violently about how to implement their visions of universalism and accommodate religious and social difference. Muslims, too, saw an opportunity, particularly as European powers turned against the new French Republic, leaving the Muslim polities of the Middle East and North Africa as France's only friends in the region. In Muslims and Citizens, Collier examines how Muslims came to participate in the political struggles of the revolution and how revolutionaries used Muslims in France and beyond as a test case for their ideals. In his final chapter, Collier reveals how the French Revolution's fascination with the Muslim world paved the way to Napoleon's disastrous invasion of Egypt in 1798.
