**Problems and Solutions**

**Theory and Practice**

**This comprehensive and concise book critically examines the essential principles, practices and approaches to financial accounting, cost and management accounting, and financial management. This book is intended for the postgraduate students of management and commerce. Besides, it is equally useful for the students of engineering and technology. The objective of this book is to assist the students and readers in developing an understanding of the theories of various branches of accounting and financial management, and to integrate the knowledge with practice in evaluating the strategic management decisions. The book contains thirty-three chapters divided into three parts. Part A comprising ten chapters discusses the key principles and practices of financial accounting. Part B containing eight chapters explains various methods and techniques of cost and management accounting. Part C comprising fifteen chapters provides an insight into the numerous dimensions of financial management policies and practices. Key Features • A systematic presentation of the subject matter, supported with substantial number of Examples, Diagrams and Tables for easy understanding. • The topics of 'Accounting for Fixed Assets' (Chapter 4), 'Depreciation Accounting' (Chapter 5), 'Revenue Recognition' (Chapter 6), 'Accounting for Inventories' (Chapter 8) and 'Cash Flow Statement' (Chapter 20) have been written thoroughly in accordance with the Accounting Standards (AS) issued by the ICAI. • Review questions covering examination problems and their answers are given at the end of each chapter. The detailed answers are available in the Instructors' Manual. • An exhaustive glossary of terms have been provided to explain the core concepts. • Solutions Manual is also available.**

**Basic financial management**

The Second Edition of the book encompasses two new chapters—Strategic Cost Management and Business Ethics—A Strategic Financial Management Instrument. The book, being an augmented version of the previous edition, equips the young managers with the fundamentals and basics of strategic management and financial management in a cogent manner. The text now provides a better orientation to the students on the topics like corporate restructuring, divestitures, acquisitions, and mergers in the global context with the help of examples and caselets. The book has been revised keeping in view the requirements of postgraduate students of management and the students pursuing professional courses such as CA, MFC and CS. In addition, professionals working in the corporate sector may also find the book beneficial to integrate the financial management functions into business strategy and financial operations. Distinctive features

- Model question papers have been appended at the end of the book.
- Better justification of topics by merging the contents wherever required.
- Theory supported with caselets inspired from global as well as Indian context.
