The Freedom of Information Act 2000 received Royal Assent on 30 November 2000 and came into full effect on 1 January 2005. The Act gave the public, for the first time, a statutory right (subject to appropriate limitations) to i) find out if a public authority held specified information and, ii) if so, to be provided with access to it. This Memorandum revisits the original objectives and evaluates whether those have been met. It is felt that the FIOA has become embedded in the culture of public authorities and its effects on openness and transparency are clear. The successes do not come without cost, however, primarily in the form of concern at the time taken to process and respond to FOI requests, to conduct public interest tests and consider exemptions. The extent though to which original decisions are neither complained against, or are upheld on complaint, indicate that the FOIA is working largely as it should

confounding worlds: the California to which her parents have immigrated and the China of her mother's "talk stories." The fierce and wily women warriors of her mother's tales clash jarringly with the harsh reality of female oppression out of which they come. Kingston's sense of self emerges in the mystifying gaps in these stories, which she learns to fill with stories of her own. A warrior of words, she forges fractured myths and memories into an incandescent whole, achieving a new understanding of her family's past and her own present.

she had no idea just how different. For starters, Merci has never been like the other kids at her private school in Florida, because she and her older brother, Roli, are scholarship students. They don't have a big house or a fancy boat, and they have to do extra community service to make up for their free tuition. So when bossy Edna Santos sets her sights on the new boy who happens to be Merci's school-assigned Sunshine Buddy, Merci becomes the target of Edna's jealousy. Things aren't going well at home, either: Merci's grandfather and most trusted ally, Lolo, has been acting strangely lately — forgetting important things, falling from his bike, and getting angry over nothing. No one in her family will tell Merci what's going on, so she's left to her own worries, while also feeling all on her own at school. In a coming-of-age tale full of humor and wisdom, award-winning author Meg Medina gets to the heart of the confusion and constant change that defines middle school — and the steadfast connection that defines family.

Angel de La Cruz, affectionately called Big Angel, has summoned his entire clan for one last legendary birthday party. But as the party approaches, his mother, nearly one hundred, dies, transforming the weekend into a farewell doubleheader. Among the guests is Big Angel's half brother, known as Little Angel, who must reckon with the truth that although he shares a father with his siblings, he has not, as a half gringo, shared a life. Across two bittersweet days in their San Diego neighborhood, the revelers mingle among the palm trees and cacti, celebrating the lives of Big Angel and his mother, and recounting the many inspiring tales that have passed into family lore, the acts both ordinary and heroic that brought these citizens to a fraught and sublime country and allowed them to flourish in the land they have come to call home. *#1 New York Times Bestseller "THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In Think Again, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." –Brené Brown, Ph.D., #1 New York Times bestselling author of Dare to Lead The bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of*

*doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he*

You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. Think Again reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom. *it, in which case it will never achieve the intended safety benefit. Even if they have the technology, drivers may not use it if it is deemed unacceptable, or may not use it in the manner intended by the designer. At worst, they may seek to disable it. Bringing together contributions from international experts from around the world, the editors have shaped a book that covers the theory behind acceptance, how it can be measured and how it can be improved. Case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology. Although driver acceptance is the central focus of this book, acceptance of new technology by operators in other domains, and across cultures, is also investigated. The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’” (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

and don't have the answers. By looking at the very best of evidence for Christianity, Peter Harris presents the compelling case that Christianity is the truth. Writing in an accessible way about some challenging topics, Harris begins by deploying historical arguments for Jesus's resurrection. He then turns to science to contend that there is a creator. Using biblical data and the famous Trilemma, he demonstrates that the creator is also Jesus. He deals with other difficult questions such as "How is a miracle possible?" and "What about suffering and evil?" He ends by providing Christian responses to some thorny contemporary issues such as gender equality. The book is also designed to be used as the basis for discussion groups in the church where doubts can be safely discussed. A discussion guide specifically written as a companion piece to The Mother and Child Project that will prompt helpful conversations for book clubs, small groups, and others interested in the topic of women and child health throughout the world and how the church community should get involved. The discussion guide is divided into four sessions-- one to complement each section of the book, The Mother and Child Project. Each session is divided into two parts: “At Home”—several suggested essays to read from the book prior to the gathering to discuss—and “In Your Small Group”—several discussion questions, often supplemented by a pertinent quote from the book, plus a follow-up activity to

become personally involved. Dozens of influential leaders have heard the pleas of mothers and children in developing countries. Raising their voices to inspire a movement to increase healthy pregnancies and lower death rates, Melinda Gates, Kay Warren, Bill Frist, Kimberly Williams Paisley, Michael W. Smith and more speak out about why people of faith must get involved in *The Mother and Child Project: Raising Our Voices for Health and Hope*. Almost 287,000 women die each year because of pregnancy and birth complications. Many orphans are left behind in the wake of this tragedy, and without a mother, many of those children die as well. If only enough people knew. We have the resources to prevent this crisis, but we must take action. Fortunately, Hope Through Healing Hands, a nonprofit organization promoting awareness for healthy mothers and children worldwide, is already spreading the word. Not only can we save lives, reduce abortions, and decrease death rates, but also we can help build healthier, thriving families and bring stability and sustainability to families, communities and nations. The question is, will you join them?
