Within 24 hours, his skin breaks out in pus-filled lesions, and his organs fail, one by one ... Soon hysteria breaks out in Castleboyne, with a quarantine imposed on the town by the Department of Health and nasty tabloid speculation that the disease has been brought to the area by the new immigrant population. Illaun has to get to the bottom of what was in the coffin to reassure herself that a deadly disease hasn't been unleashed upon the community because of her carelessness. Then a young boy is brought into the hospital, with the same symptoms as Terry ... The Lazarus Bell - Illaun Bowe Crime Thriller #2

The Complete Story from Pantah to Scrambler

How do you replace a legend? For Ducati, the Italian motorcycle manufacturer worshiped by racers and riders all over the world, the answer was to start from scratch. When the company decided to produce a successor to its immensely popular 916/996/998 series, it allowed designer Pierre Terblanche to create a completely new bike built from the inside out. This approach resulted in a radically styled motorcycle whose improved ergonomics offer greater comfort and control, with more agile handling at all speeds. Ducati also broke with tradition by allowing two of the worlds top motorcycling writers, Alan Cathcart and Marc Cook, to document the birth of the 999-from the earliest design ideas through final production. In an industry where product plans and manufacturing techniques are usually guarded like state secrets, Cathcart and Cook were given complete access to the designers, engineers, and technicians who worked to make the 999 a superbike sensation.

Excerpt: The next new Ducati engine to appear after the Ducati Apollo was the 90 V twin, initial Grand Prix racing versions being 500 cc, and the production bikes were 750 cc. There was also the Ducati 750 Imola Desmo that won at Imola in 1972. These engines had bevel gear shaft drive to the overhead camshaft, and were produced in round, square, and Mille crankcases. In the 1980s these gave way to the belt drive camshaft engines that have continued to this day, in air and liquid cooled form. The Mille used a plain bearing crank, like the belt models. Generally, any two-cylinder motorcycle engine with its two cylinders at an equidistant opposite angles from the center rotation of the crankshaft is referred to as a V-twin. The Ducati V-twin is unique in that the "V" is tilted forward so the front cylinder is nearly parallel to the ground, leading many to refer to it as an "L-Twin" engine instead. Either usage is correct since a "V-twin" engine is not designated by a specific angle. L-twin refers, in fact, to a configuration with a 90 degree angle between...
