In this “incredible read on some incredible days and nights in the old association” (Adrian Wojnarowski, ESPN senior NBA insider) Charles Oakley—one of the toughest and most loyal players in NBA history—tells his unfiltered stories about his basketball journey and his relationships with Michael Jordan, LeBron James, Charles Barkley, Patrick Ewing, Phil Jackson, Pat Riley, James Dolan, Donald Trump, George Floyd, and many others. If you ask a New York Knicks fan about Charles Oakley, you better prepare to hear the love and a favorite story or two. But his individual stats weren't remarkable, and while he helped power the Knicks to ten consecutive playoffs, he never won a championship. So why does he hold such a special place in the minds, hearts, and memories of NBA players and fans? Because over the course of nineteen years in the league, Oakley was at the center of more unbelievable encounters than Forrest Gump, and nearly as many fights as Mike Tyson. He was the friend you wish you had, and the enemy you wish you'd never made. If any opposing player was crazy enough to start a fight with him, or God forbid one of his teammates, Oakley would end it. “I can't remember every rebound I grabbed but I do have a story—the true story—of just about every punch and slap on my resume,” he says. In The Last Enforcer, Oakley shares one incredible story after the next—all in his signature “unflinchingly tough, honest, and ultimately endearing” (Harvey Araton, New York Times bestselling author) style—about his life in the paint and beyond, fighting for rebounds and respect. You'll look back on the era of the 1990s NBA, when tough guys with rugged attitudes, unflinching loyalty, and hard-nosed work ethics were just as important as three-point sharpshooters. You'll feel like you were on the court, in the room, can't believe what you just saw, and need to tell everyone you know about it. Thirteen-year-old Floey Packer feels like she's always blended into the background. After all, she's the frumpy younger sister of the Fabulous Lillian, a girl so popular and spontaneous that their house is always packed with a gaggle of admirers. But when Lillian suddenly gets married and heads off on a month-long honeymoon, Floey decides it's her time to shine. Armed with her trusty diary, some books on Zen philosophy, and a jar of Deep Wild Violet hair dye, Floey embarks on a self-improvement mission—with excellent results. People are finally noticing her, especially the boy who really counts. But then disaster strikes. Are people noticing Floey because she's so fabulous—or because her evil cousins posted her diary on the Internet? And how will Floey ever repair the damage? Paul Ritter's autobiography tells the story of the early days of Superbike racing. Paul shocked the racing community by winning the first AMA pro Superbike race he entered. His account of those days gives readers an up close and personal look into the days when professional racers in the sport were weekend warriors who traveled on shoestring budgets and fueled their bikes with passion and (if they were good) a few dollars of winnings.

The Ducati Story is brought right up to date in this new edition of Ian Falloon ' s authoritative book, covering the complete history of the marque. Initially under government control, Ducati went through several decades of ups and downs, characterized by dubious managerial decisions. Held together by the great engineer Fabio Taglioni, the father of desmodromic valve gear, Ducati produced some of the finest motorcycles of the 1950s, 1960s and 1970s: the Marianna, desmo 125 single, Mach 1, 750 and Pantah. Taglioni also instigated Ducati ' s return to racing, and victory in the 1972 Imola 200 was the turning point. Mike Hallwood rode the 900 Ducati to victory in the 1978 Isle of Man Formula One race and Tony Rutter took four World TT2 Championships. Cagiva purchased Ducati in 1985, bringing a new engineer, Massimo Bordi, and new designs - most famously the Desmoquattro. In various guises, this model dominated the World Superbike Championship during the 1990s, particularly in the hands of Carl Fogarty. Landmark models included the 916 and Monster, and, with the sale of Ducati to the Texas Pacific Group in 1996, the company continued to grow. The racing program expanded to MotoGP and new model families were introduced. With control taken by the Italian company InvestIndustrial in 2006, Ducati embarked on the next era of development: Casey Stoner winning the MotoGP World Championship in 2007. Now under the Audi umbrella Ducati continues to thrive. This new edition includes a brand new chapter featuring all the models from 2012 up to 2018.

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stoned lighter and decades wiser. She'd ridden through unfamiliar landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

A lively gift book, the first in a new series For the Wild at Heart.

Berni Spiegel's The Upper Half of the Motorcycle was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themself. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.

From the single-cylinder bikes of the 1950s to the high-performance superbikes of today, The Complete Book of Ducati Motorcycles showcases the entire spectrum of Ducati. Legendary Ducati motorcycles have something of a rags-to-riches story. This Italian motorcycle manufacturer began by selling motorized bicycles to impoverished residents of post-World War II Italy. Today, Ducati is the world's premier manufacturer of street motorcycles whose sales continue to rise year after year. Its sleek, hyper-accelerating motorcycles are two-wheeled wonders that are fluent in the language of speed. The Complete Book of Ducati Motorcycles traces the stunning chronology of the motorcycles dreamed up by Ducati, from the 1950s to present day. Laid out for the first time in encyclopedia form with gorgeous photography and insights from Ducati expert Ian Falloon, this book offers motorcycle enthusiasts a closer look at the craftsmanship, power, and beauty of these extraordinary motorcycles. The book features all of the motorcycles from Ducati's storied history, including the groundbreaking Desmodromic 750 Super Sport, the Mike Hallwood Replica, the Superbike-dominating 916, and the epic Panigale. From the street bikes that gave birth to the very notion of the modern superbike to the racing motorcycles that dominated tracks in Great Britain, Europe, and North America since the latter part of the twentieth century, The Complete Book of Ducati Motorcycles runs the full gamut of sportbikes. It's a collection that demands shelf space in the library of any true motorcycle collector or fan.

The 916 spearheaded the Ducati revival of the 1990s. Introduced at the end of 1993, this product of Massimo Tamborini and the Cagiva Research Centre took the water-cooled four-valve engine of the 851, placing it in an evolutionary chassis with revolutionary styling. The 916 immediately set new standards of performance for twin-cylinder machines, epitomised by its unequalled success in the World Superbike Championship. This book will trace the conception and development of the four-valve Ducati from its first appearance at the Bol d'Or in 1986. By 1990 Raymond Roche gave Ducati their first World Superbike Championship, this being followed by Tevan Dong Pilen. Star British rider Carl Fogarty then took over the reins, and along with Troy Coeser and Troy Bayliss dominated the World Superbike Championship from 1994 until 2001. Along with the factory racers, all the related four-valve models will be covered in depth, from the initial 851 and 888, to the 748, ST4 and 996. All the variants, including the Sport Production series, will be detailed, along with the rare and beautiful Supermona. This book is the definitive guide to these legendary Ducati models. Ian Falloon is one of the world's leading motorcycle historians. He has more than 40 years experience with motorcycles, spent 25 years writing for magazines around the world, and has written numerous books about motorcycles. He specialises in Italian marques such as Moto Guzzi, Laverda, MV Agusta, and of course, Ducati.
