

Duncan Fry Live Sound Mixing

Winner of the 2007 National Book Critics Circle Award for Criticism A New York Times Book Review Top Ten Book of the Year Time magazine Top Ten Nonfiction Book of 2007 Newsweek Favorite Books of 2007 A Washington Post Book World Best Book of 2007 In this sweeping and dramatic narrative, Alex Ross, music critic for The New Yorker, weaves together the histories of the twentieth century and its music, from Vienna before the First World War to Paris in the twenties; from Hitler's Germany and Stalin's Russia to downtown New York in the sixties and seventies up to the present. Taking readers into the labyrinth of modern style, Ross draws revelatory connections between the century's most influential composers and the wider culture. The Rest Is Noise is an astonishing history of the twentieth century as told through its music.

Virginia Woolf was not a religious person in any traditional sense, yet she lived and worked in an environment rich with religious thought, imagination, and debate. From her agnostic parents to her evangelical grandparents, an aunt who was a Quaker theologian, and her friendship with T. S. Eliot, Woolf's personal circle was filled with atheists, agnostics, religious scholars, and Christian converts. In this book, Stephanie Paulsell considers how the religious milieu that Woolf inhabited shaped her writing in unexpected and innovative ways. Beginning with the religious forms and ideas that Woolf encountered in her family, friendships, travels, and reading, Paulsell explores the religious contexts of Woolf's life. She shows that Woolf engaged with religion in many ways, by studying, reading, talking and debating, following controversies, and thinking about the relationship between religion and her own work. Paulsell examines the ideas about God that hover around Woolf's writings and in the minds of her characters. She also considers how Woolf, drawing from religious language and themes in her novels and in her reflections on the practices of reading and writing, created a literature that did, and continues to do, a particular kind of religious work. A thought-provoking contribution to the literature on Woolf and religion, this book highlights Woolf's relevance to our post-secular age. In addition to fans of Woolf, scholars and general readers interested in religious and literary studies will especially enjoy Paulsell's well-researched narrative. This charming book introduces one of the most popular artists of the twentieth century, Diego Rivera, to young readers. It tells the story of Diego as a young, mischievous boy who demonstrated a clear passion for art and then went on to become one of the most famous painters in the world. Duncan Tonatiuh also prompts readers to think about what Diego would paint today. Just as Diego's murals depicted great historical events in Mexican culture or celebrated native peoples, if Diego were painting today, what would his artwork depict? How would his paintings reflect today's culture? Diego Rivera: His World and Ours is a wonderful introduction to this great artist. Praise for Diego Rivera « "By establishing a link between modern readers and Rivera and challenging them to "make our own murals," the author makes art both aspiration and action. Both solid introduction and exhortation, this book will thrill budding artists." –Kirkus Reviews, starred review "Kids will want to talk about the great painter, and young artists will find inspiration for their own creations." –Booklist

The Biology of Humans at Our Best and Worst

Good and Cheap

(Book). This up-to-date book comprehensively covers all aspects of speech and music sound reinforcement. It is roughly divided into four sections: Section 1 provides the tutorial fundamentals that all audio engineers will need, discussing subjects such as fundamentals of acoustics, psychoacoustics, basic electrical theory and digital processing. Section 2 deals with the fundamental classes of hardware that the modern engineer will use, such as loudspeaker systems and components, microphones, mixers, amplifiers and signal processors. Special attention is given to digital techniques for system control and to audio signal analysis. Section 3 deals with the basics of system design, from concept to final realization. It covers topics such as basic system type and speech intelligibility, site survey, user needs analysis and project management. Section 4 discusses individual design areas, such as sports facilities, large-scale tour sound systems, high-level music playback, systems for the theater, religious facilities, and other meeting spaces. The book is written in an accessible style, but does not lack for ample amounts of technical information. It is truly a book for the 21st century! The Senior Director of Product Development and Application for JBL Professional, John Eargle is the author of The Handbook of Recording Engineering, The Microphone Book, Handbook of Sound System Design, Electroacoustical Reference Data, Music, Sound and Technology and The Loudspeaker Handbook . A 2000 Grammy Award-winner for Best Classical Engineering, Mr. Eargle is an honorary member and past national president of the Audio Engineering Society, a faculty-member of the Aspen Audio

Recording Institute, and a member of the National Academy of Recording Arts and Sciences and the Academy of Motion Picture Arts and Sciences.

Anne of Windy Poplars' is the fourth book in the 'Anne of Green Gables' series. In this novel, 22-year-old Anne has left college to serve as principal of Summerside High School and settles down in Windy Poplars. Anne has to overcome opposition to her presence from an influential family, the Pringles. The Pringles family make it well known she was not what they had hoped for in their new Principal. She also finds new friends in Aunt Kate, Aunt Chatty and Rebecca Dew. This early work by Lucy Maud Montgomery was originally published in 1936 and we are now republishing it with a brand new introductory biography. Lucy Maud Montgomery was born on 30th November 1874, New London, in the Canadian province of Prince Edward Island. Her mother, Clara Woolner (Macneil), died before Lucy reached the age of two and so she was raised by her maternal grandparents in a family of wealthy Scottish immigrants. In 1908 Montgomery produced her first full-length novel, titled 'Anne of Green Gables'. It was an instant success, and following it up with several sequels, Montgomery became a regular on the best-seller list and an international household name. Montgomery died in Toronto on 24th April 1942.

Listening to the Twentieth Century

" Prepare for a snow-frosted, blood-drenched fairy tale where the monsters steal your heart and love ends up being the nightmare. " - Roshani Chokshi, New York Times bestselling author of The Star-Touched Queen A girl who can speak to gods must save her people without destroying herself. A prince in danger must decide who to trust. A boy with a monstrous secret waits in the wings. Together, they must assassinate the king and stop the war. In a centuries-long war where beauty and brutality meet, their three paths entwine in a shadowy world of spilled blood and mysterious saints, where a forbidden romance threatens to tip the scales between dark and light. Wicked Saints is the thrilling start to Emily A. Duncan `s devastatingly Gothic Something Dark and Holy trilogy. " This book destroyed me and I adored it. " - Stephanie Garber, New York Times bestselling author of Caraval This edition uses deckle edges; the uneven paper edge is intentional.

An exhilarating journey of natural renewal through a year with MacArthur fellow Carl Safina Beginning in his kayak in his home waters of eastern Long Island, Carl Safina's The View from Lazy Point takes us through the four seasons to the four points of the compass, from the high Arctic south to Antarctica, across the warm belly of the tropics from the Caribbean to the west Pacific, then home again. We meet Eskimos whose way of life is melting away, explore a secret global seed vault hidden above the Arctic Circle, investigate dilemmas facing foraging bears and breeding penguins, and sail to formerly devastated reefs that are resurrecting as fish graze the corals algae-free. "Each time science tightens a coil in the slack of our understanding," Safina writes, "it elaborates its fundamental discovery, connection." He shows how problems of the environment drive very real matters of human justice, well-being, and our prospects for peace. In Safina's hands, nature's continuous renewal points toward our future. His lively stories grant new insights into how our world is changing, and what our response ought to be.

Why do we do the things we do? Over a decade in the making, this game-changing book is Robert Sapolsky's genre-shattering attempt to answer that question as fully as perhaps only he could, looking at it from every angle. Sapolsky's storytelling concept is delightful but it also has a powerful intrinsic logic: he starts by looking at the factors that bear on a person's reaction in the precise moment a behavior occurs, and then hops back in time from there, in stages, ultimately ending up at the deep history of our species and its genetic inheritance. And so the first category of explanation is the neurobiological one. What goes on in a person's brain a second before the behavior happens? Then he pulls out to a slightly larger field of vision, a little earlier in time: What sight, sound, or smell triggers the nervous system to produce that behavior? And then, what hormones act hours to days earlier to change how responsive that individual is to the stimuli which trigger the nervous system? By now, he has increased our field of vision so that we are thinking about neurobiology and the sensory world of our environment and endocrinology in trying to explain what happened. Sapolsky keeps going—next to what features of the environment affected that person's brain, and then back to the childhood of the individual, and then to their genetic makeup. Finally, he expands the view to encompass factors larger than that one individual. How culture has shaped that individual's group, what ecological factors helped shape that culture, and on and on, back to evolutionary factors thousands and even millions of years old. The result is one of the most dazzling tours de horizon of the science of human behavior ever attempted, a majestic synthesis that harvests cutting-edge research across a range of disciplines to provide a subtle and nuanced perspective on why we ultimately do the things we do...for good and for ill. Sapolsky builds on this understanding to wrestle with some of our deepest and thorniest questions relating to tribalism and xenophobia, hierarchy and competition, morality and free will, and war and peace. Wise, humane, often very funny, Behave is a towering achievement, powerfully humanizing, and downright heroic in its own right.

Mixing with Your Mind

I Know Why the Caged Bird Sings

Audio Engineering for Sound Reinforcement

Practical Ethics

Hello World

Pulling great sounds in the studio is a peculiar mix of art and science. Mike Stavrou's unique perspective has helped thousands of readers via his column in AudioTechnology magazine, and now the closely guarded secrets of one of the world's top sound balance engineers have been laid bare in this book.

This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

This volume comes as an addition to the extensive scholarship on the Bloomsbury Group. For the first time all the woodcuts, lithographs, etchings and other prints created by Vanessa Bell, Dora Carrington, Roger Fry and Duncan Grant are catalogued with numerous colour and black and white reproductions. Carefully catalogued, and with most of the entries illustrated in either colour or in black and white (a number to the original size), this book provides a treasure trove for the large and enthusiastic audience keenly interested in the art and literature of the Bloomsbury Group. In addition, the catalogue is a valuable reference work for university and art historical libraries.

Recounts the life and career of the inventive and controversial rock musician, and includes information on his philosophies on art, his opinions on the music industry, and his thoughts on raising children.

A perfect and irresistible idea: A cookbook filled with delicious, healthy recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who rewetted the link to the campaign; Francis Lam, who called it "Terrific!"; and Michael Pollan, who cited it as a "cool Kickstarter." In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Ruth loves to bake cakes. When she is alone, she dreams up variations on recipes. When she meditates, she imagines herself in the warm, comforting center of a gigantic bundt cake. If there is a crisis, she bakes a cake; if there is a reason to celebrate, she bakes a cake. Ruth sees it as an outward manifestation of an inner need to nurture her family—which is a good thing, because all of a sudden that family is rapidly expanding. First, her mother moves in after robbers kick in her front door in broad daylight. Then Ruth's father, a lounge singer, who she's seen only occasionally throughout her life, shatters both wrists and, having nowhere else to go, moves in, too. Her mother and father just happen to have a deep and poisonous emotion reserved only for life-long enemies. Oh, yes indeed! Add to this mix two teenagers, a gainfully employed husband who is suddenly without a job, and a physical therapist with the instincts of a Cheryl Richardson and you've got a delightful and amusing concoction that comes with its own delicious icing. One of Jeanne Ray's specialties is giving us believable, totally likable characters, engaged in the large and small dramas and amusements of life. Eat Cake is whimsical, warm, and satisfying. Eat Cake is Jeanne Ray at her best. Pull up a chair and eat cake!

The World of DJs and the Turntable Culture

How Active Citizens and Effective States Can Change the World

Anne of Windy Poplars

The View from Lazy Point

A Novel

*(Book). **Step behind the wheels of steel and into the world of professional DJs. The World of DJs and the Turntable Culture is the only book that clearly and thoroughly teaches the tools, technologies and techniques of contemporary DJing. It also goes further, exploring the culture, history and aesthetics of hip-hop, dance music and turntablism. Souvignier traces the turntable's evolution from consumer playback device into a professional musical instrument, right up to the latest CD scratching decks. He also traces the evolution of the DJ from selector and record announcer to producer/performer. This book features exclusive interviews with GrandWizzard Theodore (the inventor of scratching) and other superstars including DJ Qbert, Rob Swift (K-cutters), Armand Van Helden and mash-up maven The Freeland Hellraiser. The wide ranging topics covered include a mechanical history of turntables and a DJ technology roundup; Alan Freed, Dick Clark and payola; John Cage's Cartridge Music; Grandmaster Flash; Jamaican sound systems; the rise and fall of disco; house, techno and garage music; a dictionary of scratches; and developing DJ skills. The World of DJs and the Turntable Culture includes hands-on chapters that explain the basic tools DJs use, teaches the fundamental techniques, and explores the creative possibilities for DJs. There is a special focus on state-of-the-art gear, spotlighting the most exciting, cutting-edge features.***

Basic Live Sound has the answers for setting up equipment for live performance and DJ techniques. Discover how to work in different spaces with a variety of performance events, and the equipment required to get the sound just right.

For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Here is a book as joyous and painful, as mysterious and memorable, as childhood itself. I Know Why the Caged Bird Sings captures the longing of lonely children, the brute insult of bigotry, and the wonder of words that can make the world right. Maya Angelou's debut memoir is a modern American classic beloved worldwide. Sent by their mother to live with their devout, self-sufficient grandmother in a small Southern town, Maya and her brother, Bailey, endure the ache of abandonment and the prejudice of the local "powhitetrash." At eight years old and back at her mother's side in St. Louis, Maya is attacked by a man many times her age—and has to live with the consequences for a lifetime. Years later, in San Francisco, Maya learns that love for herself, the kindness of others, her own strong spirit, and the ideas of great authors ("I met and fell in love with William Shakespeare") will allow her to be free instead of imprisoned. Poetic and powerful, I Know Why the Caged Bird Sings will touch hearts and change minds for as long as people read. "I Know Why the Caged Bird Sings liberates the reader into life simply because Maya Angelou confronts her own life with such a moving wonder, such a luminous dignity."—James Baldwin from the Paperback edition.

Read by millions since its launch in 2004, BLDGBLOG is the leading voice in speculation about architecture, landscape, and the built environment. Now The BLDGBLOG Book distills author Geoff Manaugh's unique vision, offering an enthusiastic, idea-filled guide to the future of architecture, with stunning images and exclusive new content. From underground exploration to the novels of J.G. Ballard, from artificial glaciers in the mountains of Pakistan to weather control in Olympic Beijing, The BLDGBLOG Book is "part conceptual travelogue, part manifesto, part sci-fi novel," according to Joseph Grima, executive director of New York's Storefront for Art and Architecture. "BLDGBLOG is something new and substantially different from anything else I have seen," says Errol Morris, Director of Fast, Cheap & Out of Control and the Academy Award-winning documentary Fog of War. "Secretly, I had always hoped it would become a book. Geoff Manaugh has provided the reader with an excursion into a new world—part digital fantasy, part reality at the intersection of art, architecture, landscape design, and pure ideas. Like the blog, the book is personal, idiosyncratic, and, best of all, incredibly interesting."

Return once again to the enduring account of the Permian Panthers of Odessa -- the winningest high school football team in Texas history.

***'One of the best books yet written on data and algorithms... deserves a place on the bestseller charts.'** (The Times) You are accused of a crime. Who would you rather determined your fate - a human or an algorithm? An algorithm is more consistent and less prone to error of judgement. Yet a human can look you in the eye before passing sentence. Welcome to the age of the algorithm, the story of a not-too-distant future where machines rule supreme, making important decisions - in healthcare, transport, finance, security, what we watch, where we go even who we send to prison. So how much should we rely on them? What kind of future do we want? Hannah Fry takes us on a tour of the good, the bad and the downright ugly of the algorithms that surround us. In Hello World she lifts the lid on their inner workings, demonstrates their power, exposes their limitations, and examines whether they really are an improvement on the humans they are replacing. A BBC RADIO 4- BOOK OF THE WEEK SHORTLISTED FOR THE 2018 BAILLIE GIFFORD PRIZE AND 2018 ROYAL SOCIETY SCIENCE BOOK PRIZE*

Road stories and observations of the Australian Music Industry taken from a collection of articles from the author's 'No No column age in several 'Connections' books. The author spent many years on the road as a musician, sound engineer and a director of ARX systems and is author of the audio textbook, 'Live Sound Mixing'.

Doony, Ryder, Wyatt, Bodhi. The names of Kristin Hersh's sons are the only ones included in her new memoir, Seeing Sideways. As the book unfolds and her sons' voices rise from its pages, it becomes clear why: these names tell the story of her life. This story begins in 1990, when Hersh is the leader of the indie rock group Throwing Muses, touring steadily, and the mother of a young son, Doony. The chapters that follow reveal a woman and mother whose life and career grow and change with each of her sons: the ups and downs of her relationship with her oldest son, Bodhi; the challenges of raising two boys; the loss of her youngest son, Ryder; the ups and downs of her relationship with her second son, Wyatt; the ups and downs of her relationship with her youngest son, Doony; the ups and downs of her relationship with her oldest son, Bodhi; the ups and downs of her relationship with her second son, Wyatt; the ups and downs of her relationship with her youngest son, Doony. The chapters that follow reveal a woman and mother whose life and career grow and change with each of her sons: the ups and downs of her relationship with her oldest son, Bodhi; the challenges of raising two boys; the loss of her youngest son, Ryder; a period of writers' block coincides with the development of Wyatt as an artist and the family's loss of their home; and finally, soon after Bodhi's arrival, Hersh and her boys face crises from which only strange angels can save them. Punctuated with her own song lyrics, Seeing Sideways is a memoir about a life strain

It can only be real.

Offers a look at the causes and effects of poverty and inequality, as well as the possible solutions. This title features research, human stories, statistics, and compelling arguments. It discusses about the world we live in and how we can make it a better place.
