This volume presents detailed descriptions of methods for evaluating, monitoring and assessing bioremediation of soil contaminated with organic pollutants or heavy metals. Traditional soil investigation techniques, including chemical, physical and microbiological methods, are complemented by the most suitable modern methods, including bioreporter technology, immunological, ecotoxicological and molecular assays. Step-by-step procedures, lists of required equipment and reagents and notes on evaluation and quality control allow immediate application

Intensive Care Unit Manual is a practical, hands-on, how-to manual that covers the full spectrum of conditions encountered in the ICU, guiding you step-by-step from your initial approach to the patient through diagnosis and treatment. Compact, affordable, and comprehensive, the ICU Manual puts all the critical care information you need right at your fingertips! Stay at the forefront of critical care with a practice-oriented, relevant, and well-illustrated account of the pathophysiology of critical disease, presented in a highly readable format. Gain valuable insight into the recognition, evaluation, and management of critical conditions such as respiratory, hemodynamic, and infectious diseases; management of ICU patients with special clinical conditions; cardiovascular, hematologic, and neurological disorders; poisoning and overdoses; trauma and burns; and much more!

THE authoritative guide for clinical laboratory
immunology For over 40 years the Manual of
Molecular and Clinical Laboratory Immunology has
served as the premier guide for the clinical
immunology laboratory. From basic serology testing to
the present wide range of molecular analyses, the
Manual has reflected the exponential growth in the
field of immunology over the past decades. This eighth
edition reflects the latest advances and developments
in the diagnosis and treatment of patients with
infectious and immune-mediated disorders. The
Manual features detailed descriptions of general and
specific methodologies, placing special focus on the
interpretation of laboratory findings, and covers the
immunology of infectious diseases, including specific
pathogens, as well as the full range of autoimmune
and immunodeficiency diseases, cancer, and
transplantation. Written to guide the laboratory
director, the Manual will also appeal to other
laboratory scientists, especially those working in
clinical immunology laboratories, and pathologists. It
is also a useful reference for physicians, mid-level

providers, medical students, and allied health students with an interest in the role that immunology plays in the clinical laboratory.

Rock Climbing: The AMGA Single Pitch Manual is intended to serve as a textbook for past and future participants of the AMGA SPI program. The book more specifically address the needs of the professional climbing instructor and advanced recreational climbers. It presents the most current, internationally recognized standards for technical climbing systems used in single pitch rock terrain. Included are chapters on effective teaching in the outdoor environment, risk management, professionalism, environmental awareness, and rescue

This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas–diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions,

weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

All toxicity data developed by the Columbia National Fisheries Research Laboratory since 1965 was evaluated for quality, and a database established for 4,901 tests with 410 chemicals (mainly pesticides) and 66 species of aquatic animals. Insects were the most sensitive group, followed by crustaceans, fishes, and

amphibians. Rainbow trout was found to be highly sensitive.

The Manual of Commercial Methods in Clinical Microbiology 2nd Edition, International Edition reviews in detail the current state of the art in each of the disciplines of clinical microbiology, and reviews the sensitivities, specificities and predictive values, and subsequently the effectiveness, of commercially available methods – both manual and automated. This text allows the user to easily summarize the available methods in any particular field, or for a specific pathogen – for example, what to use for an Influenza test, a Legionella test, or what instrument to use for identification or for an antibiotic susceptibility test. The Manual of Commercial Methods in Clinical Microbiology, 2nd Edition, International Edition presents a wealth of relevant information to clinical pathologists, directors and supervisors of clinical microbiology, infectious disease physicians, point-of-care laboratories, professionals using industrial applications of diagnostic microbiology and other healthcare providers. The content will allow professionals to analyze all commercially available methods to determine which works best in their particular laboratory, hospital, clinic, or setting. Updated to appeal to an international audience, The Manual of Commercial Methods in Clinical Microbiology, 2nd Edition, International Edition is an invaluable reference to those in the health science and medical fields. Covering New York, American & regional stock exchanges & international companies.
