In the period between the Civil War and the Great Depression, Louisville, Kentucky was host to what George C. Wright calls "a polite form of racism." There were no lynchings or race riots, and to a great extent, Louisville blacks escaped the harsh violence that was a fact of life for blacks in the Deep South. Furthermore, black Louisvillians consistently enjoyed and exercised an oft-contested but never effectively retracted enfranchisement. However, their votes usually did not amount to any real political leverage, and there were no radical improvements in civil rights during this period. Instead, there existed a delicate balance between relative privilege and enforced passivity. A substantial paternalism carried over from antebellum days in Louisville, and many leading white citizens lent support to a limited uplifting of blacks in society. They helped blacks establish their own schools, hospitals, and other institutions. But the dual purpose that such actions served, providing assistance while making the maintenance of strict segregation easier, was not incidental. Whites salved their consciences without really threatening an established order. And blacks, obliged to be grateful for the assistance, generally refrained from arguing for real social and political equality for fear of jeopardizing a partially improved situation and regressing to a status similar to that of other southern blacks. In *Life Behind a Veil: Blacks in Louisville, Kentucky, 1865 - 1930*, George Wright looks at the particulars of this form of racism. He also looks at the ways in which blacks made the most of their less than ideal position, focusing on the institutions that were central to their lives. Blacks in Louisville boasted the first library for blacks in the United States, as well as black-owned banks, hospitals, churches, settlement houses, and social clubs. These supported and reinforced a sense of community, self-esteem, and pride that was often undermined by the white world. *Life Behind a Veil* is a comprehensive account of race relations, black response to white discrimination, and the black community behind the walls of segregation in this border town. The title echoes Blyden Jackson's recollection of his childhood in Louisville, where blacks were always aware that there were two very distinct Louisvilles, one of which they were excluded from. The Oxford Encyclopedia of American Social History is the first reference work to eschew a narrow focus on past presidents, intellectuals, military heroes, and other exhaustively studied and well-remembered persons, and instead examine the history of ordinary Americans. The more than 450 entries in the Encyclopedia examine our shared history "from the bottom up," with entries on the way automobiles shaped American lives, the westward movement of settlers and farmers in the eighteenth and nineteenth centuries, the transformation of work over time, the women's suffrage movement, counterculture, leisure activities, consumption patterns, voting habits, population movements, racial divides, and many more fascinating topics intended to help readers develop a richer framework for understanding the social experience of Americans throughout history.

A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Youth Work in the Commonwealth: A Growth Profession establishes a baseline to inform the planning and implementation of initiatives to professionalise youth work in Commonwealth member countries. The study was conducted in 35 countries in the Africa, Asia, the Caribbean/Americas, Europe and Pacific regions. It catalogues the extent to which the youth work profession is formally recognised in these countries and examines the qualities and rights-based ethos of the various forms of youth work promoted and practised in the Commonwealth. The report aims to help countries learn from good practices, and assess gaps in establishing youth work as a recognised profession in diverse contexts.

Effective marketing is essential for any successful sport organization, from elite international teams to local leagues. Now in a fully revised and updated third edition, *Advanced Theory and Practice in Sport Marketing* is still the only text to introduce key theory and best practice at an advanced level. This new edition goes beyond the introductory marketing course by exploring advanced marketing theories related to social responsibility, global issues, information systems, consumer behavior, product management, logistics, sales, promotions, and social/digital/mobile media. New to the edition are sections on branding, destination marketing, and performance evaluation that demonstrate how to measure impacts through sport marketing and how to use analytics to determine sport marketing success. Every chapter contains extended case studies and theory-to-practice insights from marketing professionals around the world and a companion website includes an impressive array of additional teaching and learning resources. *Advanced Theory and Practice in Sport Marketing* goes further than any other textbook to prepare students for the real world of sport marketing. It is essential reading for any upper-level undergraduate or postgraduate course in sport marketing or sport business.
