

## East Of West 1 Jonathan Hickman Netinnore

This book takes the study of development and social change out of the confines of the Modernization Theory - Dependency Theory debate. The author examines social change against a background of the rise of the West and the global spread of its institutions. Spybey analyzes the development of the nation-state system in the modern world, emphasizing its Western origins. He also traces out the emergence of colonialism, the capitalist world-economy and Western dominance over other parts of the world. The author goes on to examine these developments after the Second World War, against the background of the Cold War and the end of European colonialism, the reaffirmed of the existence of nation-state system by new global institutions, global military order and capitalist world economy. The First, Second and Third Worlds are placed in their social, political and economic contexts and traced through to the post-Bretton Woods period of oil crises, global recession and new international division of labour.

Oil palms are ubiquitous—grown in nearly every tropical country, they supply the world with more edible fat than any other plant and play a role in scores of packaged products, from lipstick and soap to margarine and cookies. And as Jonathan E. Robins shows, sweeping social transformations carried the plant around the planet. First brought to the global stage in the holds of slave ships, palm oil became a quintessential commodity in the Industrial Revolution. Imperialists hungry for cheap fat subjugated Africa's oil palm landscapes and the people who worked them. In the twentieth century, the World Bank promulgated oil palm agriculture as a panacea to rural development in Southeast Asia and across the tropics. As plantation companies tore into rainforests, evicting farmers in the name of progress, the oil palm continued its rise to dominance, sparking new controversies over trade, land and labor rights, human health, and the environment. By telling the story of the oil palm across multiple centuries and continents, Robins demonstrates how the fruits of an African palm tree became a key commodity in the story of global capitalism, beginning in the eras of slavery and imperialism, persisting through decolonization, and stretching to the present day.

And, recently, he added a 101st, the most audacious ever: "Solve everything."
