Simple mindfulness practices to help your child (ages 5-12) deal with anxiety, improve concentration, and handle difficult emotions—with a 60-minute audio CD of guided exercises read by Myla Kabat-Zinn. Mindfulness—the quality of attention that combines full awareness with acceptance of each moment, just as it is—is gaining broad acceptance among mental health professionals as an adjunct to treatment. This little book is a very appealing introduction to mindfulness meditation for children and their parents. In a simple and accessible way, it describes what mindfulness is and how mindfulness-based practices can help children calm down, become more focused, fall asleep more easily, alleviate worry, manage anger, and generally become more patient and aware. The book contains eleven practices that focus on just these scenarios, along with short examples and anecdotes throughout. Included with purchase is an audio CD with guided meditations, voiced by Myla Kabat-Zinn, who along with her husband, Jon Kabat-Zinn, popularized mindfulness-based stress reduction (MBSR) as a therapeutic approach. Continue your mindfulness practice with Eline Snel through her other mindfulness meditation titles, including Sitting Still Like a Frog Activity Book, which offers 75 fun mindfulness games and activities for children, and The Little Frog Awakes, which offers tools and advice for mindfully responding to younger children ages 18 months to 4 years.

500 reasons you'll never want to go outside again

500 of the most absurd and horrifying things that happen in nature! Crashing waves, stunning sunsets, sprawling landscapes. Nature is beautiful, right? Wrong. Nature Is the Worst. Need proof? The giant pitcher plant not only eats bugs, it's large enough to trap small mammals. Almost 90 percent of the koala population in Australia has chlamydia. A hailstorm in Bangladesh in 1986 killed 92 people with giant balls of ice weighing more than 2 pounds apiece. Crocodiles can climb trees. The poisonous Dracunculus vulgaris, or voodoo lily, smells like rotting flesh, looks like it's splattered in blood, and features a central black spike that can grow up to 4 feet tall. Cats often kill their first litter. A "haboob" is a biblically-huge wall of dust that can reduce visibility to zero, reach a height of 5,000 feet and stretch as far as 100 miles wide. Vampire bats are totally real, and yes, they love blood. Nature Is the Worst contains hundreds of cringe-worthy, shocking facts you never knew about nature that prove the world is a terrifying--and sometimes very strange--place. This volume contains Sapir's full edition of Hupa texts, with complete linguistic and textual annotations. The texts are accompanied by an analytic lexicon - a complete inventory of all stems and derivational bases contained in the corpus - and a detailed ethnographic glossary.

The World in Your Hands

Historical and Comparative Assessment

Frogs are worshipped for bringing nourishing rains, but blamed for devastating floods. Turtles are admired for their wisdom and longevity, but ridiculed for their sluggish and cowardly behavior. Snakes are respected for their ability to heal and restore life, but despised as symbols of evil. Lizards are revered as beneficent guardian spirits, but feared as the Devil himself. In this ode to toads and snakes, newts and tuatara, crocodiles and tortoises, herpetologist and science writer Marty Crump explores folklore across the world and throughout time. From creation myths to trickster tales; from associations with fertility and rebirth to fire and rain; and from the use of herps in folk medicines and magic, as food, pets, and gods, to their roles in literature, visual art, music, and dance, Crump reveals both our love and hatred of amphibians and reptiles—and their perceived power. In a world where we keep home terrariums at the same time that we battle invasive cane toads, and where public attitudes often dictate that the cute and cuddly receive conservation priority over the slimy and venomous, she shows how our complex and conflicting perceptions threaten the conservation of these ecologically vital animals. Sumptuously illustrated, Eye of Newt and Toe of Frog, Adder’s Fork and Lizard’s Leg is a beautiful and enthralling brew of natural history and folklore, sobering science and humor, that leaves us with one irrefutable lesson: love herps. Warts, scales, and all.

Procrastinators, be advised: Success is not a magical combination of genetics and fashion sense. Rather, it is a series of time management behaviors which must be practiced on a regular basis. Luckily, EAT THAT FROG! will show you how to deal with those challenging tasks you keep putting off in an accessible comic book format. Instead of slowing you down, completing these hard jobs only empowers you to tackle the rest of your day.

A unique, lavishly illustrated e-guide to the beauty and diversity of the Amazon--the rainforest and the river, its flora and fauna, and the people who live in the region. Applying the award-winning DK Eyewitness formula to the subject of the largest and most bio-diverse tract of tropical rainforest in the world, and the vast river that winds its way through it, this title profiles everything from the birds, animals, and insects that live there to the nine South American countries it extends across.
