onthe “ Future

Direction on

Computers for

Handicapped

Persons ” : “ The

di?erent themes

show that a lot of

problems are solved by the usage of computer technology for helping handicapped persons, for instance for the blind and visually handicapped. A consequence of

the discussed themes there are two directions which should be done in the next years. One direction is obvious. The tools must be improved and research and development work should be

Online Library

Ecdl Icdl

Computer
Essentials

extended to all groups of handicapped (even if they are numerically not so large as for instance the blind or visually handicapped persons). On the other side in the area of social implications there is an

increasing demand on social science studies on overall computer use among disabled persons. Because sources are in principle missing today about disabled persons work tasks, research in

this field must begin by trying to survey this aspect. Particular attention should be paid to the extent and character of computer use among the handicapped in work life. There

Online Library

Ecdl Icdl

develop yourself – how
man becomes man:
pleading for a new
determination of the idea
of education – a mission
of past centuries
inadequate nowadays?
Regarding September
11th last year, the
conflicts and
confrontations round the
globe, and events in our
direct surroundings these
questions seem to be a

cry at least to reflect upon what is happening around us and where we – all of us – still play an active role. An International Conference on Computers Helping People with Special Needs is like an island – is this a topic at all these days, is it worth discussing the area of ICT and the situation of people with disabilities,

persons who are segregated from developing their personal and professional careers? Indeed the biennial meeting has never included these actualities, but the basic idea behind ICCHP, starting in 1989, was to focus on these fringe groups and to offer a platform of exchange on all aspects of Human Computer Interaction

anyone having

passed the

qualification has gained the essential computer skills needed to be able to use the most common applications effectively. This book guides the reader through the modules, presenting the information in an easy-to-follow, step-

by-step manner.

Points in the text are highlighted by tips and notes and examples are included to consolidate learning. This revised edition contains an interactive CD Rom which features a full multimedia tutorial

In light of the emerging global information infrastructure, information technology standards are

becoming increasingly important. At the same time, however, the standards setting process has been criticized as being slow, inefficient and out of touch with market needs. What can be done to resolve this

situation? To provide a basis for an answer to this question, Information Technology Standards and Standardization: A Global Perspective paints as full a picture as possible of the varied and diverse aspects

perspectives in one exceptional volume. More than any other source, it enables registered nurses to master this vital specialty, so they can contribute to the overall safety, efficiency, and effectiveness of

healthcare.

This publication covers different themes in the field of assistive technology. The theme New technologies will explore the significant advances in technology

Online Library

Ecdl Icdl

Computer
Essentials

research &
development and
how these can be
harnessed to
benefit people with
disabilities. This
will include
evolving
technologies,
affording
interesting insights
into the future. The

theme User

Centred Approach

will look at

fundamental ways

in which the EU

advocate a

philosophy of

citizenship and

governance and

how this philosophy

can be advanced

to ensure that

people with
disabilities become
central to the
assistive

technology process

Another issue that
is explored in this
publication is

Interdisciplinary
Approaches which
can be developed
within assistive

technology and the provision of services to people with disabilities.

Finally, it concentrates on ways in which practitioners and users, working together within assistive technology, can

Online Library

Ecdl Icdl

Essentials

achieve best
practice in the
development and
implementation of
Guidelines and
Standards across a
broad spectrum.

History of
Computing:
Learning from the
Past Why is the
history of

computing
important? Given
that the computer,
as we now know it,
came into
existence less than
70 years ago it
might seem a little
odd to some
people that we are
concerned with its
history. Isn't history

about 'old things'?
Computing, of course, goes back much further than 70 years with many earlier - vices rightly being known as computers, and their history is, of course, important. It is only the history of electronic digital

computers that is relatively recent.

History is often justified by use of a quote from George Santayana who famously said that: 'Those who cannot remember the past are condemned to repeat it'. It is arguable whether

there are particular mistakes in the history of computing that we should avoid in the future, but there is some circularity in this question, as the only way we will know the answer to this is to study our history. This book

Online Library
