The world-wide developer community has downloaded over three million copies of BIRT (Business Intelligence and Reporting Tools) from the Eclipse web site. Built on the open-source Eclipse platform, BIRT is a powerful

reporting system that provides an end-to-end solution, from creating and deploying reports to integrating report capabilities in enterprise applications. The second of a two-book series on business intelligence and reporting technology, *Integrating and Extending BIRT, Second Edition* introduces

programmers to BIRT architecture and the reporting framework. BIRT technology makes it possible for a programmer to build a customized report using scripting and BIRT APIs. A programmer can also extend the BIRT framework by creating a new plug-in using the Eclipse Plug-in
