*This paper provides broader economic underpinnings for the specific issues relating to international discussions or negotiations on investment. It starts with a discussion of the effects of foreign direct investment on development through trade, one third of which takes place within corporate production systems. Then, it explores its impact on development beyond trade. By its nature, foreign direct investment brings into the recipient economy resources that are only imperfectly tradable on markets, especially technology, management know-how, skilled labor, access to international production networks, access to major markets and established brand names. The effects of foreign direct investment on development often depend on the initial conditions prevailing in the recipient countries, on the investment strategies of transnational corporations and on host government policies.--Publisher's description.*

Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: "Why am I here?" and "Will I ever use this?" Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.

The seventh edition of Equity and Trusts: Commentary and Materials builds on the strengths of the previous editions, and maintains its focus on prefacing case and statutory extracts by statements of principle to guide the student, and following extracts by comments and questions that both test the readers understanding and develop aspects of extracted material. Every effort has been made to make the work as accessible to the student as possible in the main by ensuring that most extracts are not unduly lengthy while at the same time focusing, chiefly via questions and commentary, on the learning outcomes essential to the study of equity and trusts. This new edition includes extracts from important judgments delivered since late 2014, including *Thorne v Kennedy* on undue influence, *Wilaci Pty Ltd v Torchlight Fund No 1 LP* (in receivership) on penalties and *Jones v Matrix Partners Pty Ltd* on the insolvency of trustees. Other significant decisions, including *Crown Melbourne Ltd v Cosmopolitan Hotel (Vic) Pty Ltd* on estoppel, *Paciocco v Australia and New Zealand Banking Group Ltd* and *Cavendish Square Holdings BV v Makdessi* on penalties, are the subject of briefer extracts and commentary in the notes. This new edition, to this

end, retains its progressive focus, and challenges readers to evaluate Australian law in its modern context. The casebook works as an ideal companion to the seventh edition of Equity and Trusts in Australia, which adopts the same chapter order and structure. Being written by the same author, the text and casebook present a consistent style and approach, making them ideal for teaching on equity courses, trusts courses or combined equity and trusts courses.

Modern Principles: Macroeconomics

**A landmark book that completely transforms our understanding of the crisis of liberalism, from two pre-eminent intellectuals Why did the West, after winning the Cold War, lose its political balance? In the early 1990s, hopes for the eastward spread of liberal democracy were high. And yet the transformation of Eastern European countries gave rise to a bitter repudiation of liberalism itself, not only there but also back in the heartland of the West. In this brilliant work of political psychology, Ivan Krastev and Stephen Holmes argue that the supposed end of history turned out to be only the beginning of an Age of Imitation. Reckoning with the history of the last thirty years, they show that the most powerful force behind the wave of populist xenophobia that began in Eastern Europe stems from resentment at the post-1989 imperative to become Westernized. Through this prism, the Trump revolution represents an ironic fulfillment of the promise that the nations exiting from communist rule would come to resemble the United States. In a strange twist, Trump has elevated Putin's Russia and Orbán's Hungary into models for the United States. Written by two pre-eminent intellectuals bridging the East/West divide, The Light that Failed is a landmark book that sheds light on the extraordinary history of our Age of Imitation.**
