*Meticulously researched and written by Dr Amer K. Hirmis the book takes readers 6000 years back to early Mesopotamian polity, culture, and religious codes which shaped the economy, and continue to shape much of the body of Iraq's polity, economy and society today. Economic inefficiency, inequality and lack of sufficient employment are common threads that run throughout Mesopotamian/Iraqi economic history. The persistence of*

*poverty, high unemployment, conscious discrimination against women, and a polity dictating blind allegiance and obedience from the subjects to the ruler, denied the Iraqis achieving economic development, the ultimate aim of which is the sustained improvement of the well-being of the people. Even when economic growth was attained, it was desperately non-inclusive. With a novel approach to economic development, this book examines Iraq's economy over the past 100 years. It establishes the historical roots in the consumption patterns, nature of the producers, the economic*

*structure, trade, monetary and fiscal policy and resource allocation. In all these areas the echoes from the ancient past are striking. The principles of Sumerian taxes are still applied in present-day Iraq. The book proposes a set of conditions, which will need to be created for Iraq to achieve economic development and functional democracy, in the distant future.*

*According to the author, rather than alleviating poverty, microfinance financialises poverty. By indebting poor people in the Global South, it drives financial expansion and opens new lands of*

*opportunity for the crisis-ridden global capital markets. This book raises fundamental concerns about this widely-celebrated tool for social development. This book looks at a number of contemporary issues in relation to the current role China plays in trade investments, especially outward investments, a fairly new phenomenon in Australia, Africa, and Europe, three major strategic destinations for China. Through Eurozone crisis, Chinese investments, and migration into Europe, the authors paint a new picture of the world with China, the dragon dancing in*

*the centre of the stage with rotating dancing partners. They show a new perspective on the China-US relationship, especially through the case of Huawei, the new Chinese telecommunication giant who is consistently challenging the position of CISCO commercially and now politically. This book adds another tool to the tool box of those who are aiming to continue dealing, trading, and working with China and the Chinese.*

*As economic crises, growing inequality and climate change prompt a global debate on the meaning and trajectory of development,*

*increasing attention is focusing on 'social and solidarity economy' as a distinctive approach to sustainable and rights-based development. While we are beginning to understand what social and solidarity economy is, what it promises and how it differs from 'business as usual', we know far less about whether it can really move beyond its fringe status in many countries and regions. Under what conditions can social and solidarity economy scale up and scale out - that is, expand in terms of the growth of social and solidarity economy organizations and*

*enterprises, or spread horizontally within given territories? Bringing together leading researchers, blending theoretical and empirical analysis, and drawing on experiences and case studies from multiple countries and regions, this volume addresses these questions. In so doing, it aims to inform a broad constituency of development actors, including scholars, practitioners, activists and policy makers. sustainability, the global financial system, trade and protectionism, and growth and employment. Since the outbreak of the financial as well as national debt crises in the Euro zone, the focus of the G20 has shifted back to addressing short-term issues. These issues range from the dynamic effects of global imbalances and the appropriate degree of financial sector regulation to questions of austerity versus growth and the lack of a comprehensive framework for managing the international monetary system. A further issue is the relevance of the G20 agenda for emerging market economies. Global economic recovery still remains fragile and downside risks to global

growth remain. Additionally, much of the agenda of the Seoul Development Consensus for shared growth launched in 2010 has yet to be fulfilled. A key discussion point in the book, therefore, is how to make a tangible and significant difference in peoples' lives by implementing an agenda of inclusive growth.

European economic integration has relied on policies intended to make the European Union strong and resilient economically, socially and politically. The Eurozone crisis and Brexit have demonstrated, however, how fragile this hope was and how contested reforms to the major European economic policies have

become. Dariusz Adamski explains the evolution of these policies - from the Economic and Monetary Union to the internal market, international trade, the EU's climate policy, as well as its redistributive policies - and demonstrates how this evolution has made European economic integration increasingly frail. He shows how erroneous economic and political assumptions regarding the direction of the European integration project have interplayed with the EU's constitutional context. Arguing that flaws in individual policies contributing to European economic integration can be remedied in compliance with the existing constitutional setup, he explains why

Neoclassical economics, the intellectual bedrock of modern capitalism, faces growing criticisms, as many of its key assumptions and policy prescriptions are systematically challenged. Yet, there remains one field of economics where these limitations continue virtually unchallenged: the study of cities and regions in built-environment economics. In this book, Franklin Obeng-Odoom draws on institutional, Georgist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about

urban economics. In doing so, he demonstrates the widespread tensions and contradictions in the status quo, showing how to reconstruct urban economics in order to create a more just society and environment.

Climate Crisis Economics draws on economics, political economy, scientific literature, and data to gauge the extent to which our various communities – political, economic, business – are making the essential leap to a new narrative and policy approach that will accelerate us towards the necessary transition to a decarbonized economy and sustainable future. The book draws out policies and practices with both

national and local examples, which will demonstrate various complementary approaches that are empowering states and people as they seek to pursue the carbon neutral goal. The author delineates a climate crisis economics approach that is fit for purpose and which can help achieve necessary climate change goals in the decades ahead. Ensuring economic and ecological sustainability is neither easy nor cost-free; there is no single solution to the climate crisis. All aspects of our economies, policies, business, and personal practices must come into alignment in order to succeed. Frustratingly, we know what is needed and we have many of the

technologies and systems to make the leap to a carbon neutral economy, yet we still fail to act with alacrity. Leaders, communities, and businesses must shift their narratives in how they talk about and think about the climate crisis. In doing so, in making the narrative leap to a new understanding about what is possible and necessary, we can stop endangering our common future and single, fragile, global habitat, and instead set the stage for Green Globalisation 2.0 and a new, sustainable industrial revolution. Climate Crisis Economics will appeal to academics, students, investors, and professionals from varying disciplines including politics,

This volume presents a contemporary analysis of the impact of China's rise on the Mekong Region at a critical point in Southeast Asian history. As the most populated country and the second largest economy in the world, China has become an increasingly influential player in global and regional affairs in recent decades. Economic ties between China and

her southern neighbors are particularly strong. Yet relations between China and the Mekong region are embedded in complex socio-cultural and political issues. China's accelerated growth, increasing economic footprint, rapid military modernization, and global search for energy, natural resources, and food security have created a wide range of new challenges for smaller countries in Southeast Asia. These new challenges both encourage and limit cooperation between China and the emerging ASEAN Economic Community (AEC). The authors pay close attention to these challenges with particular focus on the impact of

fundamentally reframes budget debates in the United States. Author Edward D. Kleinbard explains how the public's preoccupation with tax policy alone has obscured any understanding of government's ability to complement the private sector through investment and insurance programs that enhance the general welfare and prosperity of our society at large. He argues that when we choose how government should spend and tax, we open a window into our "fiscal soul," because those choices are the means by which we express the values we cherish and the regard in which we hold our fellow citizens. Though these values are being diminished by short-sighted decisions to starve government, strategic government spending can directly make citizens happier, healthier, and even wealthier. Expertly combining the latest

economic research with his insider knowledge of the budget process into a simple yet compelling narrative, he unmaskes the tax mythologies and false arguments that too often dominate contemporary discourse about budget policies. Large quantities of comparative data are succinctly distilled to situate the United States among its peer countries, so that readers can judge for themselves whether contemporary budget choices really reflect our aspirational fiscal soul. Kleinbard's presentation takes a multi-disciplinary approach, drawing on economics, finance, law, political science and moral philosophy. He uniquely weaves economic research and moral philosophy together by emphasizing our welfare, not just our national income, and by contrasting the actual beliefs of Adam Smith, a great moral

philosopher, with the cartoon version of the man presented by proponents of the most extreme forms of private market triumphalism.

Airline Operations and Management: A Management Textbook is a survey of the airline industry, mostly from a managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical, rather than strategic, management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry

The Global Financial Crisis is undoubtedly the most severe financial crisis the world witnessed since the Great Depression of 1929. The crisis has been analysed by a number of experts offering distinct narratives and counter-narratives. Systemic Risk and Macroprudential Regulations examines causes and consequences of the global financial crisis and proposes a regulatory reforms policy—macroprudential regulations.

The book emphasizes 'systemic risk' as the new-found villain of the financial space and narrates how such risk can be addressed through macroprudential tools. It, thus, offers a possible solution to avoid financial crises in future and facilitates building a safer financial system globally. The book also examines

major crisis management frameworks, stress testing, relevant regulatory and supervisory development, and early warning mechanism with detailed cross-country analysis.

*high rates that show signs of becoming structural, there is a pressing need for an in-depth exploration of this economic injustice. Unemployment is one of the problems most likely to put critical pressure on our political institutions, disrupt the social fabric of our way of life, and even threaten the continuation of liberalism itself. Despite the obvious importance of the problem of unemployment, however, there has been a curious lack of attention paid to this issue by contemporary non-Marxist political philosophers. On Unemployment explores the moral implications of the problem of unemployment despite the*

*continuing uncertainty involving both its causes and its cures. Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do, if anything, to alleviate it. The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world. It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions, but from more basic moral disagreements about whether the reduction of unemployment is indeed an*

*In recent years, the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional-National Economic*

*Problem brings attention to the highly centralised, top down governance structure that the UK deploys, and demonstrates that it is less than ideally placed to rectify these inequalities. The 'North-South' divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag*

*behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy*
