For more than a century, the United States has been the world's most powerful state. Now some analysts predict that China will soon take its place. Does this mean that we are living in a post-American world? Will China's rapid rise spark a new Cold War between the two titans? In this compelling essay,

world renowned foreign policy analyst, Joseph Nye, explains why the American century is far from over and what the US must do to retain its lead in an era of increasingly diffuse power politics. What constitutes a fair procedure when it comes to EU competition law?

This innovative book seeks to understand the philosophical considerations at the core of conflicting procedural fairness arguments in EU

competition law practice.

The author argues for a conceptualisation of procedural fairness as a distributional issue that can be solved by a practical fairness theory and a comprehensive methodology. To illustrate the usefulness of the conceptualisation, three procedural fairness problems from recent EU competition law practice

are analysed: - the

KME–Chalkor cases; -

the Groupe Gascogne

cases; - the regulatory

question about using a
