Ed Fox has been called the new Elmer Batters, but he's clearly no imitator. Yes, there's that "little secret" he shares with the late Mr. Batters, but Fox celebrates the female foot in his own way, creating a style that is unique, contemporary and technically impeccable. Because he draws inspiration from both still photography and music video there's a strong sense of movement in his photos, reflecting his own energetic personality. Fox is a native of Los Angeles, so its no surprise his specialty is finding and shooting the most compelling beauties in the adult film industry. Says Fox, "A beautiful foot is an extra, the same as shapely breasts or a nice ass, and all part of a feminine shape. It's all about voluptuousness." Accordingly, most of his models are exceptionally curvy from top to bottom. Fox was one of the first to shoot strip diva Dita von Teese, as well as Valentina Vaughn, Tera Patrick, Brittany Andrews, Jill Kelly, Kelly Madison, Temptress, Tall Goddess, Aria Giovanni, Jewel De'Nyle, Belladonna, Terri Weigel, Penny Flame, and Ginger Jolie, all of whom appear in his very first book. Bonus: an hour-long DVD featuring many of the stars, with an original musical score.

"As I write in my quiet library the history of those stirring events which began and ended while the bells of 19— were ringing in the New Year in the Kingdom of Bharbazonia, I am interrupted on my literary journey by the sound of a sweet voice singing, in the room below, the robust melody of "The King and the Pope," my favourite song." -an excerpt

After looking at the early careers of Wurtz's two mentors, Liebig and Jean-Baptiste Dumas, Rocke describes Wurtz's life and career in the politically complex period leading up to 1853. He then discusses the turning point in Wurtz's intellectual life—his conversion to the "reformed chemistry" of Laurent, Gerhardt, and Williamson—and his efforts to persuade his colleagues of the advantages of the new system. In 1869, Adolphe Wurtz (1817-1884) called chemistry "a French science." In fact, however, Wurtz was the most internationalist of French chemists. Born in Strasbourg and educated partly in the laboratory of the great Justus Liebig, he spent his career in Paris, where he devoted himself to introducing German ideas into French scientific circles. His life therefore provides an excellent vehicle for considering the divergent trajectories of French and German chemistry—and, by extension, French and German science—during this crucial period. After looking at the early careers of Wurtz's two mentors, Liebig and Jean-Baptiste Dumas, Rocke describes Wurtz's life and career in the politically complex period leading up to 1853. He then discusses the turning point in Wurtz's intellectual life—his conversion to the "reformed chemistry" of Laurent, Gerhardt, and Williamson—and his efforts (social and political, as well as scientific) to persuade his colleagues of the advantages of the new system. He looks at political patronage, or the lack thereof, and at the insufficient material support from the French government, during the middle decades of the century. From there Rocke goes on to examine the rivalry between Wurtz and Marcellin Berthelot, the debate over atoms versus equivalents, and the reasons for Wurtz's failure to win acceptance for his ideas. The story offers insights into the changing status of science in this period, and helps to explain the eventual course of both French and German chemistry.
