GCSE Maths is Easy: the ultimate guide for anyone who finds mathematics challenging and for those wanting to pass GCSE maths with ease. This exciting new guide is filled with fun and interesting facts for you to understand maths in a way that makes it more compelling to learn, and more importantly, easier to understand! This book contains plenty of sample questions to assist you through GCSE stage mathematics and it provides detailed step-by-step instructions to work out basic arithmetic. This maths book is like no other; it uses real life scenarios and interesting facts (such as sunken ships and car rallies), to help build your mathematical skills and engage with numbers in a more fun and absorbing way. This book includes everything you will need to know to understand the basics of any math problem including: fractions, ratios, percentages, data interpretation, multiplications, long division, bearings, triangulation and many other mathematical formulas ideal for all GCSE students. Written in conjunction with Qualified Maths Teachers and created by the UK's leading recruitment experts; this comprehensive guide includes: A breakdown of each mathematical formula. Detailed instructions of how to complete each question type. Lots of interesting facts that makes learning maths fun. Plenty of exercises for you to work through. Memorable methods to ensure you get the correct answer every time. Insider GCSE tips and advice All of the content within this guide will help you prepare for the GCSE maths syllabus and can be applied in your practice of past papers for AQA, CCEA, Cambridge, Edexcel, iGCSE, OCR, Scottish and WJEC. This guide is perfect for those on GCSE maths courses, those who want to know how to get a GCSE maths qualification, touch up on their mathematics and those who want the ultimate revision aid.

This book supports students preparing for the Edexcel International GCSE exam. It comprises of 4 full practice papers. Each practice paper contains 25 questions and detailed solutions. The practice papers in the book are carefully modelled after past papers and specifications of exam board to ensure that the papers as a whole provide a rich and varied practice to meet all requirements of IGCSE mathematics with an appropriate difficulty. Solutions are easy and comprehensible by people of all skill levels. They offer students ways of dealing with common problems but also more complex questions that students may struggle with under examination pressure. The solutions have been reviewed by many students of varying skill, to ensure that they are easily understandable while being the fastest and most re-applicable.

Exam Board: Edexcel Level & Subject: International GCSE Biology and Double Award Science First teaching: September 2017 First exams: June 2019

Oxford's best-selling Revision and Practice books are renowned for their clear explanations and examples supported by a wealth of practice exercises and past examination questions that build students' confidence for the exams ahead. Building on the experience of earlier best-selling titles, David Rayner's new textbook provides valuable practice and challenging revision exercises for all students aiming for higher grades at GCSE. · Up-to-date curriculum coverage · New non-calculator work in line with curriculum changes · Clear explanations and worked examples · Numerous carefully constructed exercises and a section of ideas for longer investigations to encourage students to use and apply the mathematics they have learnt · Practice exam questions · Numerical answers to all questions

This book constitutes the refereed proceedings of the 15th Conference on Computability in Europe, CiE 2019, held in Durham, UK, in July 2019. The 20 revised full papers presented were carefully reviewed and selected from 35 submissions. In addition, this volume includes 7 invited papers. The conference CiE 2018 had the following six special sessions: computational neuroscience, history and philosophy of computing, lowness notions in computability, probabilistic programming and higher-order computation, smoothed and probabilistic analysis of algorithms, and transitive computations.

Offering students support for the Edexcel GCSE modular specification, this book provides an easy-to-follow course structure, extra practice questions and revision exercises tailored to each module. Page numbers for the Edexcel GCSE mathematics student books are given for reference.

Exam board: Pearson Edexcel Level: IGCSE Subject: Mathematics First teaching: September 2016 First exams: Summer 2018 Target success in Pearson Edexcel International GCSE Mathematics with this proven formula for effective, structured revision; key content coverage and plentiful worked examples are combined with exam-style questions to create a revision guide that students can rely on to review, strengthen and test their knowledge. · Plan and manage a successful revision programme using the topic-by-topic planner · Consolidate subject knowledge by working through clear and focused content coverage · Strategically target revision with diagnostic questions to establish which areas need focus · Get assessment-ready with short exam-style questions and review questions that focus on problem-solving and reasoning; answers are provided in the back of the book with full worked solutions online for free · Improve exam technique through expert tips and examples of typical mistakes to avoid

Motivating readers by making maths easier to learn, this work includes complete past exam papers and student-friendly worked solutions which build up to practice questions, for all round exam preparation. It also includes a Live Text CDROM which features fully worked solutions examined step-by-step, and animations for key learning points.

Igcse Mathematics for Edexcel

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This new edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum topics specified in the IGCSE Chemistry syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

Most of us understand the benefits of getting a good education. Not only can it open doors to university and better job prospects, but can help to broaden an individual's outlook on life. For some people, however, getting the right qualifications can be a real challenge, especially if they aren't in mainstream education. It's no wonder then that an increasing number of people are turning to distance learning, or home education, as their preferred way of passing exams. This book focuses on GCSEs and A-Levels: the main school-leaving qualifications that are universally recognised in the UK. It explains the main features of the qualifications, how to study them, and how to take the exams involved. This book is intended to be used as a guide for prospective students who might want to undertake this form of learning, but have some difficulty in working out where to start.

New edition of our best-selling IGCSE Mathematics textbook

This Cambridge IGCSE® Mathematics Core and Extended series has been authored to meet the requirements of the Cambridge IGCSE® Mathematics syllabus (0580/0980), for first examination from 2020. This Core practice book accompanies the Cambridge IGCSE® Mathematics Core and Extended Coursebook and provides students with additional practice activities focused on the skills required for the (0580/0980) syllabus. These activities are ideal as extra classroom materials, homework activities or for self-study. Answers are included at the back of the book to help students track their progress.

GCSE MATHS IS EASY

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Indexes the Times and its supplements.

An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when

Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Collins New GCSE Maths Edexcel Linear Teacher's Pack Higher 1 contains everything you need to deliver effective lessons in mathematics with confidence for students working at Grades D to A*. Fully matched to Edexcel's new GCSE Maths Linear specification, these teacher resources offer well-differentiated lesson plans and additional support. The Teacher's Pack allows you to:

- * Capture the essence of chapters at a glance with chapter overviews
- * Easily access learning objectives and references to exam board specifications, KS4 Programme of Study, Functional Skills Standards and Personal Learning and Thinking Skills (PLTS) for each chapter
- * Link maths concepts and help students to access functional and problem-solving scenarios
- * Raise standards by providing the right level of progression for every student by using the well-differentiated lesson plans
- * Involve the whole class in engaging activities and discussions using the Starter
- * Lead students into the main concepts and exercises with the Main Lesson Activity
- * Consolidate and summarise learning using the Plenary
- * Quickly access the answers to all questions in the corresponding Student Book and Homework Book
- * Plan ahead and save time using the ready-made Scheme of Work
- * Customise your lessons using Lesson Plans in Word format on the CD-Rom

This book focuses on the delivery of public examinations offered by the main examining boards in England since Victorian England. The investigation reveals that the provision of examinations was as controversial in the nineteenth century as it is today, particularly since the government is now determined to bring in reform. The issues of grade inflation, the place of coursework in marking, and the introduction of technological change all feature in this book. Educational policy is primarily examined as well as some reference to the global scene. The study analyses archival material from a wide range of sources, including those records stored at the National Archives and the London Metropolitan Archives. An emphasis is placed upon the various institutions that contributed to the process, including the Royal Society of Arts, the London Chamber of Commerce, the City of Guilds of London Institute and the University of London. Attention is given to the findings of the Taunton Commission and the Bryce Commission and shorter reports such as the Northcote-Trevelyn Report which served to radicalise entry and recruitment to the Civil Service. The modern GCSE and the plans for I-levels are considered and key observations are made about the efficacy of those examinations offered by Oxford and Cambridge universities and O-levels, A-levels and NVQs. The reader is given every opportunity to benefit enthusiastically in this account of examinations, and those engaged in education, whether teachers, examiners, students or administrators, will be able to gain useful insights into the workings of the examination system.
