Effetti Collaterali Morte Le Confessioni Di Un Manager Pentito Delle Grandi Multinazionali Del Farmaco

Nei media di massa, a partire dal Dopoguerra, abbiamo visto diversi animali felici consigliare al pubblico di mangiarli. Vacche danzanti, polli rapper, maiali beati in mondi bucolici e fiabeschi accompagnati da attori (o pastori) famosi. Al di là di questo confine illusorio vi era, e vi è, in realtà, un mondo totalmente opposto, fatto di allevamenti intensivi e carne da macello. Questo secondo mondo splatter è venuto fuori a partire dagli anni Ottanta, quando per la prima volta si è assistito a casi di malattie connesse agli allevamenti intensivi: mucca pazza, aviaria, suina ecc. sono diventate quasi una specie di nuova peste medioevale che incombe sulle teste dei consumatori. Soltanto allora ci si siamo resi conto, pian piano, di come in Occidente si è vissuti nell’impostura mediatica. Con l’avvento della rete Internet questa presa di coscienza si è diffusa prepotentemente, fino alla diffusione dei tmi anti-specieisti ed ecososietati. Tutti i media di massa, imperberziti e in modo contraddittorio, cercano di “salvare il salvabile” creando uno stato di schizofrenia mediatica attorno ai temi che riguardano il non umano, ovvero la “carne da macello”. "Side Effects: Death" is the true story of corruption, bribery, and fraud written by the man called the Big Pharma Insider. During his 35 years in the pharmaceutical industry, most notably as general manager of Eli Lilly and Company in Sweden, Virapen was responsible for the marketing of several drugs, all with side effects.

Healing Invisible Wounds
Get Us Out of Here!
The planet is sick. Human beings are guilty of damaging it. We have to pay. Today, that is the orthodoxy throughout the Western world. Distrust of progress and science, calls for individual and collective self-sacrifice to ‘ save the planet ’ and cultivation of fear: behind the carbon commissars, a dangerous and counterproductive ecological catastrophism is gaining ground. Modern society ’ s susceptibility to this kind of thinking derives from what Bruckner calls “ the seductive attraction of disaster. ” as exemplified by the popular appeal of disaster movies. But ecological catastrophism is harmful in that it draws attention away from other, more solvable problems and injustices in the world in order to focus on something that is portrayed as an Apocalypse. Rather than preaching catastrophe and pessimism, we need to develop a democratic and generous ecology that addresses specific problems in a practical way.
A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue—the inmate’s situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and presented to disclose the rest of its family.
Big Brother gets up close and personal. Do you know about RFID (Radio Frquency Identification)? Well, you should, because in just a few short years, this explosive new technology could tell marketers, criminals, and government snoops everything about you. Welcome to the world of spychips, where tiny computer chips smaller than a grain of sand will trace everyday objects/and even people/keeping tabs on everything you own and everywhere you go. In this startling, eye-opening book, you'll learn how powerful corporations are planning a future where: Strangers will be able to scan the contents of your purse or briefcase from across a room. Stores will change prices as you approach-squeezing extra profits out of bargain shoppers and the poor. The contents of your refrigerator and medicine cabinet will be remotely monitored. Floors, doorways, ceiling tiles, and even picture frames will spy on you/leaving virtually no place to hide. microchip implants will track your every move/and even broadcast your conversations remotely or electroshock you if you step out of line. This is no conspiracy theory. Hundreds of millions of dollars have already been invested in what global corporations and the government are calling "the hottest new technology since the bar code." Unless we stop it now, RFID could strip away our last shreds of privacy and usher in a nightmare world of total surveillance!o keep us all on a truly creepy book and well worth reading."

Segnali rassicuranti sui modi e mezzi per combattere le malattie, segnali inquietanti sui rischi – individuali e collettivi – per la salute, giungono dalla società in cui viviamo. Il controllo della patologia e l'uso razionale dei farmaci, le condizioni socioambientali patogene e il protrarsi dei tempi di vita assistita per la popolazione anziana, la politica della salute e l'organizzazione sanitaria, il rapporto tra sanità pubblica e privata,

l'assistenza negli ospedali e a domicilio, la medicina di base e di domani, la bioetica delle nascite e delle morti, le prospettive aperte dalle biotecnologie e dalla manipolazione genetica, la socializzazione della medicina e la medicalizzazione della società, le variabili sanitarie della crescente globalizzazione e gli aspetti medici di una società mullietnica: sono temi e problemi che esigono una riflessione critica, la quale non può non passare anche attraverso la storia. La «grande storia» può essere arricchita non poco dalla «piccola storia» di idee ed eventi relativi al nostro benessere. Dare voce a una umanità – fatta di pazienti e di curanti, di infermieri e di medici, di religiosi e di laici, di ricercatori e di politici, di imprenditori e di operai – che ha scritto, essa per prima, la «storia della medicina e della sanità», è lo scopo di questa collana, che viene a situarsi in un contesto poco e non adeguatamente esplorato. Giorgio Cosmacini, Vittorio A. Sironi Attraverso studiosi, pensatori e clinici del più remoto e del più recente passato, come Ippocrate, René Favalaro, Averroè, Samuel Hahnemann, Paracelso, Vesalio, Semmelweis e altri ancora, gli autori ripercorrono il sentiero accidentato della storia della medicina. Un racconto, dunque, della rivoluzione del pensiero medico che si è sviluppato attraverso continue eresie e scontri con il pensiero dominante, quasi sempre contro il potere politico, spesso contro le dottrine religiose, per la salvaguardia dell'uomo.

From the critically acclaimed author of the New York Times bestseller The Confessions of Max Tivoli comes The Impossible Lives of Greta Wells, a rapturously romantic story of a woman who finds herself transported to the ‘other lives’ she might have lived. After the death of her beloved twin brother and the abandonment of her long-time lover, Greta Wells undergoes electroshock therapy. Over the course of the treatment, Greta finds herself repeatedly

sent to 1918, 1941, and back to the present. Whisked from the gas-lit streets and horse-drawn carriages of the West Village to a martini-fueled lunch at the Oak Room, in these other worlds, Greta finds her brother alive and well—though fearfully masking his true personality. And her former lover is now her devoted husband...but will he be unfaithful to her in this life as well? Greta Wells is fascinated by her alter egos: in 1941, she is a devoted

mother; in 1918, she is a bohemian adulteress. In this spellbinding novel by Andrew Sean Greer, each reality has its own losses, its own rewards: each extracts a different price. Which life will she choose as she wrestles with the unpredictability of love and the consequences of even her most carefully considered choices?

La millenaria rivolta contro il pensiero omologato

ARIAs traces Western man's attitudes toward mortality from the early medieval conception of death as the familiar collective destiny of the human race to the modern tendency, so pronounced in industrial societies, to hide death as if it were an embarrassing family secret. -- Newsweek

Corrado Alvaro's Fear in the World was published a decade before Orwell's 1984, but is not well known outside Italy, perhaps because of the timing of the publication just before the Second World War. Alvaro had visited the Soviet Union as a journalist, but was probably motivated to write this dystopian novel by aspects of modernity that concerned him, particularly the use of fear for political purposes which was not afflicting Russia alone. He was interested in the psychology of fear and the extent to which individuals and the crowd participate in their own regimentation. The names of countries, cities and leading political figures such as Stalin are never referred to, but as in the works of Orwell they are clearly identifiable from their descriptions: the author was writing in a Fascist country against a Fascist censor and had to cut his cloth accordingly. This is a dark novel, not quite as dark as 1984, but it is more claustrophobic. The feeling of inevitability is there from the first page, and it is experienced as we experience real life. The imagined truth takes us closer to where we really are. The travails of the love affair at the core of this novel quite possibly arise from perceptions that the regime exploits in a quite ad hoc manner. And it leads the reader through an extraordinary sequence of events and observations which encompass a vast range of emotions and ideas expressed in a unique prose style. The modern Leviathan appears to be a well-oiled machine, but towards the end it becomes clear that this is merely an appearance of efficiency and omniscience, but appearances can be powerful. Alvaro is particularly interested in how the state uses quasireligious mechanisms and rituals to assert its power. The central character returns to the country after a long period abroad, and sees things initially through foreign eyes, living a life similar to the one Alvaro did when in Russia. He is not a natural rebel, but very much wants to fit in, but he finds this difficult to achieve. The regime boasts that it has an ally in history, but destiny is elusive, however much the characters feel that they are driven by it.

The Struga Prize-winning author of The Girl with a Lizard delivers a novel that hinges on one of the bloodiest World War II battles and those who fought it. In this highly original novel, Janacek retells the four-month-long Battle of Monte Cassino from the point of view of the Maori, Gurkha, Polish, North African, small-town American and other Allied foot soldiers who fought and died under German fire near that 6th century Benedictine abbey. Twined through the battle is another story, a memory of the drowned and the saved in Janacek's own family in wartime Eastern Europe, where Jews who did not go to Nazi death camps went to Soviet gulag camps, and sometimes survived, and even went on to fight at Monte Cassino. A powerful reflection on all the ways that rights can be taken from us. "Helena Janacek's novel is this: a tattoo etched on the skin, and not painlessly. A vast design that brings together threads from all the various lives that converged in that legendary battle. The beauty of her tale lies in its structure, the way opposites converge: the chaos of battle and the silence of the defeated, ordinariness and the heroism of the powerless, carefully guarded memory and impetuous youth, the past perpetually intertwined with the present." --Roberto Saviano, author of Gomorrah

Il suicidio è un problema di tutti. Una scelta privata che richiede discrezione e rispetto, ma le cui cause interpellano la responsabilità collettiva. Perché ci si toglie la vita? Perché si suicidano più gli uomini delle donne? Perché in certi Paesi più che in altri? Émile Durkheim alla fine dell'Ottocento sottolineò come la mancanza d'integrazione degli individui nella società fosse una delle cause fondamentali del suicidio. Un'analisi acuta e insuperata, che studia il problema dal punto di vista sociale, e segna una svolta non solo per la filosofia, ma anche per la psicoanalisi e la biologia. Arricchisce il volume un'ampia e aggiornata analisi delle ricerche, sociologiche e statistiche, condotte fino a oggi, che aiutano a capire il fenomeno forse più misterioso e inesplicabile dell'aggressività umana.

Confessions of a Pharma-Insider: Death

Why Are You Afraid? Have You No Faith?

1985. Dopo la morte del suo amato fratello gemello Felix, e la fine della lunga relazione con il compagno Nathan, Greta Wells decide di iniziare un trattamento psichiatrico. Ma la cura ha effetti collaterali inattesi, e Greta si ritrova trasportata nelle vite che avrebbe potuto vivere se fosse nata in epoche diverse. Nel 1918, in cui Greta è un'adultera bohémienne; e nel 1941, dove Greta si scopre invece madre e moglie devota. Anche se lontane nel tempo e diverse tra loro, le tre vite di Greta Wells hanno innegabiliifinità: sono tutte segnate da tensioni famigliari e scelte difficili, da perdite e doni del destino, e in ciascuna vita c'è un prezzo da pagare per riuscire a spuntarla. Così la Greta del 1985 scopre che le sue alias sono imprevedibili, uniche, come forse lo è anche lei. Perché questo viaggio nel tempo è un viaggio all'udace scoperta di se stessa. Mentre la cura volge al termine, e il tempo avrà svelato i suoi paradossi, Greta dovrà scegliere quale se stessa voler essere, quale tempo e vita abitare. Avvolto da un'atmosfera magica, Le vite impossibili di Greta Wells non è solo un romanzo che racconta un viaggio nel tempo, ma delinea il ritratto stragente e indimenticabile di una donna dalla complessità inasuribile, cui neppure il tempo può tracciare i confini.

Just as the "all powerful" Wizard of Oz was unmasked in the 1939 film classic, the men behind the curtain who are controlling the pharmaceutical industry are about to be exposed!Whether you know it or not, the pharmaceutical industry (lovingly referred to as Big Pharma) controls many facets of your life - making the world a "medicine cult." The frightening thing is that the "cabal" is deeply mired in politics, deception, scandal and corruption. Instead of having the health and welfare of its customers in mind, many of those in control are primarily focused on money. Yet, thanks to skillful marketing tactics, everything seems rosy and everyone depends on the latest drug to combat their health woes. The author, John Virapen, has been called THE Big Pharma Insider. During his 35 years in the pharmaceutical industry internationally (most notably as general manager of Eli Lilly and Company in Sweden), Virapen was responsible for the marketing of several drugs, all of them with side effects. He shocked the world with his first tell-all confessional, "Side Effects: Death - Confessions of a Big Pharma Insider." Now he is ready to take on the "powers that be" again with this explosive followup!

Decisioni delle Gran Corti civili in materia di diritto pubblicate da Michele Agresti ...

Un saggio caustico e provocatorio, scritto come un romanzo, dove l'autore ci racconta dei suoi anni passati a creare finte notizie per attirare attenzione nei confronti di alcuni prodotti dei suoi clienti. Un libro fondamentale per tutti coloro che vogliono capire come, partendo da un piccolo blog di provincia fino a diventare una vera e propria notizia ufficiale, le informazioni possano (e vengano) manipolate dalla Rete e dai Media.

Dear Reader,What you are now holding is a most interesting book. The word beyond is speaking. It is offering advice, asking for help and giving answers. It exists and speaks about life -- our life here on earth and of possible consequences of our behaviour. It tells us that it is not the same to be humble, loving, good, merciful, loyal and honest as it is to be proud, loveless, bad, merciless, betraying and dishonest. Atdeath this is not forgotten but rather remembered in total clarity. Not only is the punishment, or better yet the cleansing, spoken about; but also the length of this cleansing is so very much more.Then you ask yourself, is it possible?In the Catholic church one speaks about a transitory state which for a very long time has been referred to as Purgatory. Despite there being different theories, this state is always taken seriously. One needs it because one can only come before God cleansed and pure.
