Thoroughly revised and updated, CLINICAL ASSESSMENT IN RESPIRATORY CARE teaches assessment techniques from the most basic skills for the student learning the process of patient care, to the more advanced skills for the student or practitioner involved with patients in the intensive care unit. An entirely new section will teach students and practitioners the skills necessary to record patient cases. The Instructor's Manual/Test Bank allows instructors to customize their approach to assessment and includes a ready-made

selection of test questions. Covers the basics of patient assessment from the first encounter, including how to initially approach, interview, monitor, and examine the patient in a professional and sensitive manner. Teaches the student to recognize basic and life ECG patterns that may occur in the cardiopulmonary patient. Discusses the unique situations that apply to neonatal and pediatric patients, differences in assessment, and how to document the young patients history and interpret test results. Covers monitoring patients with sleep-

maintaining a focus on the clinical applications. Instead of just reading a technical description of ventilators you'll learn how to select modes, set parameters, monitor the equipment, and respond to alarms. This "how to?" approach prepares you to work with the entire spectrum of equipment. UNIQUE! Clinical "how to?" approach helps you identify equipment, understand how it works, and apply the information to clinical practice. UNIQUE! Organization of ventilators by application area rather than by manufacturer further emphasizes the clinical focus. UNIQUE! Clinical Rounds boxes introduce you to problems you may encounter when using the equipment in a clinical setting. Chapter assessment questions in

and critical care, and preventive and long-term care. Clinical Practice Guidelines (CPGs) and Therapist Driven Protocols (TDPs) in appropriate chapters familiarize you with patient care guidelines and decision trees as they are used in practice. A full-color format makes the text easier to read and brings out key detail in the illustrations. Mini-Clinis provide short vignettes applying content in the text to actual patient care, asking you to think critically on problems you may encounter. Clinical Practice Guidelines (CPGs) cover the steps of patient care with important information on indications/contraindications, hazards and complications, assessment of need, assessment of

outcome, and monitoring. Therapist-Driven Protocols (TDPs) provide decision trees developed by hospitals, helping you to assess patients, initiate care, and evaluate outcomes. Rules of Thumb highlights rules, formulas, and key points important to clinical practice. Measurable Learning Objectives parallel the areas tested by the NBRC exam, helping you identify important information that goes beyond memorization and recall. Key Point summaries in bulleted format help you clearly identify key concepts covered in each chapter. A Workbook includes a wide range of activities such as NBRC-type multiple-choice questions, case studies, experiments, and hands-on activities, allowing you to apply the knowledge you've

gained from the text. New History of Respiratory Care chapter describes the evolution and challenges of this profession. Updated content reflects changes in the field, with additions to the text including: More coverage of evidence-based care Information on HIPAA A discussion of computer applications in a health care setting An emphasis on how nutrition impacts the respiratory system The role of the respiratory therapist in disease management is discussed in the Cardiopulmonary Diseases section. A new appendix cross-references the NBRC examination matrices for the CRT and RRT to content in the book, making it easier to prepare for the NBRC exams. New editor Robert Kacmarek, a well-known figure in

respiratory care, has joined Robert Wilkins and James Stoller.

Now edited by a pulmonologist, the 3rd edition is still one of the most well-written texts for students learning to understand the assessment and treatment of patients with respiratory disease. Each chapter begins with a background of selected disorders, followed by a case study with questions and answers designed to stimulate critical thinking skills.

Includes a wide variety of activities such as review questions (3 levels following the NBRC question format), vocabulary review, chapter objectives, chapter highlights, case studies, and critical-thinking questions.
