The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments. While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering companion is the first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'. Written by acknowledged experts from Germany, the UK and the US, the various chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or Rammstein. While these acts have shaped the international profile of German pop music, the volume also undertakes in-depth examinations of the specific German contributions to genres such as punk, industrial, rap and techno. The survey is concluded by an interview with the leading German pop theorist Diedrich Diederichsen. The volume constitutes an indispensable companion for any student, teacher and scholar in the area of German studies interested in contemporary popular culture.

This wonderful project focuses on the use of chord shapes (mainly triads) in building a single line solo. It also opens up some of the mystery of the fretboard by showing exactly how the fretboard relates to diatonic harmony without using single note scales. Not only will new lines appear easier, but new and usable chord voicings will also appear. These chords will be related to the lines being played. It also will help move away from position playing and open up the neck, removing any black holes. There is also a look at phrasing and how rhythmic understanding is important to the improving harmonic and melodic development. Companion CD included.

The Street of Crocodiles in the Polish city of Drogobych is a street of memories and dreams where recollections of Bruno Schulz's uncommon boyhood and of the eerie side of his merchant family's life are evoked in a startling blend of the real and the fantastic. Most memorable - and most chilling - is the portrait of the author's father, a maddened shopkeeper who imports rare birds' eggs to hatch in his attic, who believes tailors' dummies should be treated like people, and whose obsessive fear of cockroaches causes him to resemble one. Bruno Schulz, a Polish Jew killed by the Nazis in 1942, is considered by many to have been the leading Polish writer between the two world wars.

Sounds of Articulating Identity - Tradition and Transition in the Music of Palau, Micronesia, provides an overview of historical and contemporary music-making practices and their social contexts in the Republic of Palau. The study identifies and analyzes strands of musical development over the course of, roughly, the last century. Its secondary focus is on the conceptualization of the musical transition in Palauan discourse(s) and its interaction with local identity negotiation. As the ethnomusicological exploration of the Palauan world proceeds, the book demonstrates how a study of the music of a small island nation is capable of transcending the boundaries of ethnomusicology as an academic discipline, and it adds rich material to the discourse about globalization and to the field of cultural studies.

Sprache und Stil in der Artusdichtung Charles Williams

A philosophical exploration of the power that poetry, music, and the erotic have on us.

Vormorgen aims to collect all of Ernst Toller's poetic works in a single volume; the first to appear in nearly a century. This edition, in German and English, includes Toller's three principle poetic works: Vormorgen, The Poems of the Imprisoned, and The Book of Swallows, as well as his scattered, uncollected poems. Toller was a Jewish anarchist working in Munich, and was briefly the president of the Bavarian Soviet Republic (M ü nch n e r R ä t e r e p u b l i k / Munich Worker's Republic), which was predominantly organized by poets and playwrights, so it's often been referred to as the regime of coffeehouse anarchists. The occupation began peacefully, with the anarchists occupying Munich without firing a shot, but was ended brutally a month later, on May Day, when the Freikorps were sent in. Over 600 people were killed, half of which were citizens killed in street fighting. Some were sentenced to death by firing squad, others were sentenced to prison. Ernst Toller was sent to Niedersch ö n e n f e l d prison for five years, where he began working on the majority of his poems. When he was released, he was exiled to the UK, and later to the States. While living in New York, he received word that his mother and sister were sent to concentration camps, and he took his life in 1939.

The world's largest and longest-running song competition, the Eurovision Song Contest is a significant and extremely popular media event throughout the continent and abroad. The Contest is broadcast live in over 30 countries with over 100 million viewers annually. Established in 1956 as a televised spectacle to unify postwar Western Europe through music, the Contest features singers who represent a participating nation with a new popular song. Viewers vote by phone for their favourite performance, though they cannot vote for their own country's entry. This process alone reveals much about national identities and identifications, as voting patterns expose deep-seated alliances and animosities among participating countries. Here, an international group of scholars from a variety of disciplines, including musicology, communications, history, sociology, English and German studies, explore how the contest sheds light on issues of European politics, national and European identity, race, gender and sexuality, and the aesthetics of camp. For some countries, participation in Eurovision has been simultaneously an assertion of modernity and a claim to membership in Europe and the West. Eurovision is sometimes regarded as a low-brow camp spectacle of little aesthetic or intellectual value. The essays in this collection often contradict this assumption, demonstrating that the contest has actually been a significant force and forecaster for social, cultural and political transformations in postwar Europe.

☞ Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

This book delivers the first comprehensive study on German modal verbs which summarises and critically reflects the discussion of the last 500 years, checks these findings against large corpus data and is accessible to the English reader. It is shown that non-epistemic modal verbs modify events, whereas their epistemic counterparts modify the proposition, and how the latter developed from the former.

This uniquely fascinating volume is not merely a learned treatise in historical semantics; it is itself a stupendous display of world harmony as a creed—a vivid demonstration that "all is all."

In this book, native popular musicologists focus on their own popular music cultures from Germany, Austria and Switzerland for the first time: from subcultural to mainstream phenomena; from the 1950s to contemporary acts. Starting with an introduction and two chapters on the histories of German popular music and its study, the volume then concentrates on focused, detailed and yet concise close readings

from different perspectives (including particular historical East and West German perspectives), mostly focusing on the music and its protagonists. Moreover, these analyses deal with very original specific genres such as Schlager and Krautrock as well as transcultural genres such as Punk or Hip Hop. There are additional chapters on characteristically German developments within music media, journalism and the music industry. The book will contribute to a better understanding of German, Austrian and Swiss popular music, and will interconnect international and especially Anglo-American studies with German approaches. The book, as a consequence, will show close connections between global and local popular music cultures and diverse traditions of study.

It is undeniable that technology has made a tangible impact on the nature of musical listening. The new media have changed our relationship with music in a myriad of ways, not least because the experience of listening can now be prolonged at will and repeated at any time and in any space. Moreover, among the more striking social phenomena ushered in by the technological revolution, one cannot fail to mention music's current status as a commodity and popular music's unprecedented global reach. In response to these new social and perceptual conditions, the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification. Concentrated listening, the form of musical reception fostered by Western art music, now appears to be but one of the many ways in which audiences respond to organized sound. Cinema, for example, has developed specific ways of combining images and sounds; and, more recently, digital technology has redefined the standard forms of mass communication. Information is aestheticized, and music in turn is incorporated into pre-existing symbolic fields. This volume - the first in the series Musical Cultures of the Twentieth Century - offers a wide-ranging exploration of the relations between sound, technology and listening practices, considered from the complementary perspectives of art music and popular music, music theatre and multimedia, composition and performance, ethnographic and anthropological research. James and Stumpf first met in Prague in 1882. James soon started corresponding with a "colleague with whose persons and whose ideas alike I feel so warm a sympathy." With this, a lifelong epistolary friendship began. For 28 years until James's death in 1910, Stumpf became James's most important European correspondent. Besides psychological themes of great importance, such as the perception of space and of sound, the letters include commentary upon Stumpf's (Tonpsychologie) and James's main books (The Principles of Psychology, The Varieties of Religious Experience), and many other works. The two friends also exchange views concerning other scholars, religious faith and metaphysical topics. The different perspectives of the American and the German (European) way of living, philosophizing and doing science are frequently under discussion. The letters also touch upon personal questions of historical interest. The book offers a critical edition and the English translation of hitherto unpublished primary sources. Historians of psychology and historians of philosophy will welcome the volume as a useful tool for their understanding of some crucial developments of the time. Scholars in the history of pragmatism and of phenomenology will also be interested in the volume.

In today's globalized world, traditions of a national Self and a national Other no longer hold. This timely volume considers the stakes in our changing definitions of national boundaries in light of the unmistakable transformation of German and Dutch societies. Examining how the literature of migration intervenes in public discourses on multiculturalism and including detailed analysis of works by the Turkish-German writers Emine Sevgi Özdamar and Feridun Zaimoglu and the Moroccan-Dutch writers Abdelkader Benali and Hafid Bouazza, *New Germans, New Dutch* offers crucial insights into the ways in which literature negotiates both difference and the national context of its writing.
