Like its previous editions, the Seventh Edition of Accounting Theory presents complex materials in a clear and understandable manner.

Incorporating the latest accounting standards and presenting the most up-to-date

Access Free Eitf Issue No Fasb Home

accounting theory from the top academic journals in accounting and finance throughout the world, this book comprehensibly presents both the theoretical structure of accounting theory as well as the politics of the standard-setting process, which often opposes

the theoretical structure. Key Features: - A reorganized table of contents with a thoroughly revised chapter on International Accounting (Chapter 10) - Discussion of the conceptual framework of the IASB (Chapter 7) - An emphasis on

Access Free Eitf Issue No Fasb Home

principles-based standards as opposed to rules-based standards - More theoretical issues are related to real world examples coming from the popular news media. - New questions, cases, problems, and writing assignments--many from corporate annual reports. - An

Instructor's Resource CD includes answers to end-of-chapter materials, chapter summaries, test banks, and PowerPoint slides. This book is both revolutionary and traditional, using primary materials rather than author narrative. By adopting this

Access Free Eitf Issue No Fasb Home

traditional approach for law and accounting, Cunningham's new book puts the subject on par with other law school courses. This traditional "cases and materials" approach underscores how accounting standards bear earmarks of functional law. To facilitate analogical

Access Free Eitf Issue No Fasb Home

and critical engagement on par with other law school teaching books, pedagogical design follows the classic casebook method of arranging cases and materials in pairs of opposites and complements. This arrangement enables conceptualizing accounting as

analytical matters as
well. This original
content also
illuminates
transaction
economics, factors
associated with
accounting
irregularities and the
lawyer's role in
financial reporting.
Under IFRS, U.S.

GAAP, and the SEC rules and regulations, business enterprises must recognise measure and disclose information regarding equity items on the face of the statement of financial position, other specific statements, or in the notes to the financial

statements.

However, under both IFRS and U.S.

GAAP there is no all-inclusive general standard on

stockholders' equity.

This book clarifies the process of reporting stockholders' equity in a manner which can be reconciled under all the relevant standards.
