A child's dream takes us on a journey through space. The child looks for a place to land while exploring each planet, but some are too hot, some are too cold, and some are just made of liquid and gas. Only planet Earth is just right. Fun rhyming text introduces children to each planet and basic facts about it. The text is accompanied by stunning images of a rocket traveling through the solar system, interspersed by close up images of each planet in order. While each planet is amazing in its own way, there is only one we can call home. If parents choose, this can be the start to a conversation about how we can take better care of our planet. Identifies the characteristics most likely to promote the healthy development of a growing child, and offers advice on parent evaluation in child custody cases

Parenting with Awareness blends old age wisdoms, new age concepts and current child development research to create a unique approach to parenting which honors the integrity of childhood. In today's competitive society parents have bought into the myth that they are solely responsible for molding their child's intelligence, talents and ultimate success creating enormous pressure to be the perfect parent. Our good intentions and expectations for our children to be better than average result in over-programmed, over-stressed families. Children are crying out for us to do better. They are showing us numerous signs that currently our way of raising children is not working. Less play, more structured activities and parental pressure to excel are creating children who are obese, exhibiting signs of stress, depression and anxiety in unprecedented numbers. We are all suffering. Often the opportunity to enjoy parenthood has dwindled down to a fleeting moment in an overloaded schedule. Marcie draws upon experts, sages and experience inviting parents to embark on a process of self-discovery to uncover their innermost passions, values, dreams and expectations for their children. It takes honest, secure parents who are at peace with themselves, free of ego demands, to be able to unconditionally love a child into adulthood. Whether you are a new parent just embarking on your parenting journey or a seasoned parent, these ideas will present a new way to explore life and approach parenting that will create children who are self-empowered, self-disciplined and self-motivated. Parenting from these principles will encourage and permit children to live in their own pace, driven by their own passions and dreams, while not trying to fit a patterned mold of conformity. Brain research has proven that children learn through experimentation. This book offers playful ways to teach children to embrace life with all of its wonder and potential through hands-on creative, fun activities designed for ages five and above. These inspiring projects coincide with guided conversations that will teach children self-awareness and self-reliance. They will also offer opportunities to develop the essential qualities of trust; intuition, passion, gratitude, confidence, compassion, courage, morality and patience as they strive to become successful, compassionate human beings. Children are born with open minds and hearts. They are eager to learn all that we have to teach. If we allow them to explore new ideas and assimilate the ones they resonate to, they will become empowered to create their own destiny. They will begin to appreciate their own uniqueness and value that in others. They will see the similarities in the human spirit and build respect for each other's differences. This is founded in the hope of creating the understanding that we are all in search of the same things on this journey called life - unconditional love, happiness and peace.

Mentoring Your Child to Win

Ending the Nightmare of Child Abuse and Neglect

Terrie and Doug Oxtal gave their lives to a dream. After over 35 years of marriage the result of their devotion to four children and each other, life was perfect until the day they left the hospital with only their youngest son Andrew's jacket. The unspeakable grief that took over their lives is captured in letters written to Andrew where the love spills on to every page. The journey is there, the love is there, the sense of loss is there between the lines of shock and pain, with a true understanding of compassion. The Oxtal family knows Andrew has gone home, and they live with him in their hearts, until they meet again. For those who have suffered the loss of a child, this mother's letters will take you to

a place so familiar they won't make you feel alone. For those who have not lost a child, this book will take you to a place where love is all that matters.

Battered child syndrome is a tragic and disturbing phenomenon. Unfortunately, it is a crime that is often successfully hidden by its perpetrators. Law enforcement has an important role to play in uncovering cases of battered child syndrome and gathering evidence for their successful prosecution. This guide contains practical information on the circumstances that point to the willful rather than the accidental injury or death of an infant or child and the specific evidence required to prove it. It places special emphasis on obtaining an expert medical examination, immediately documenting the injuries through photographs, and collecting and preserving physical evidence. The guide also shows investigators how their interviews with caretakers, family members, neighbors, school personnel, and others can shed light on the treatment the child has received over time and produce witnesses who can corroborate or refute suspected abuse. Many jurisdictions are beginning to develop training programs to help police investigate this crime more effectively. This guide is an important contribution to this end and will aid child protection personnel and others in a position to identify, investigate, and prosecute cases of battered child syndrome.

Childhood Denied: Ending the Nightmare of Child Abuse and Neglect is an exposé of how America ignores and often discards its most vulnerable children. Delving into the political, legal, and social factors of children at risk for abuse and neglect, it chronicles the plight of abused children across the nation and provides a "report card" for each U.S. state. With a practical, journalistic, and social scientific approach, this fervent book emboldens child welfare professionals, government representatives, lawmakers, child attorneys, law enforcers, and the general public to respond more effectively and consistently to the needs of children at risk.

This study explores whether and how enshrining children's rights in national constitutions improves implementation and enforcement of those rights by comparing Danish, Finnish, Icelandic, Norwegian and Swedish law.

A delightful children's picture book with endearing illustrations and a verse story in the best tradition of English nonsense poetry. For every copy of this book sold, the NSPCC receives 1. For Katherine and her three American children, Greece was meant to be a one-year refuge from the late 1930's Depression. Her husband's family-owned orchard should have provided for their well-being, but instead embroiled them in legal debate. WWII Axis bombings of Kalamata prompted the young family to flee to the remote mountain village of Katherine's birth, but Nazi invasion—and seemingly endless occupation of their village and their house—trapped them there until the war's end. Told through the eyes of John, Katherine's youngest child, he shares a universal story of fear and frustration faced by all innocent civilians during war in occupied countries. **American Kid** is a moving recollection of Katherine's courage, their family's sparse village existence on Mt. Parnon, and years of fear-filled interactions with Nazi soldiers.

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, Under-standing Child Abuse and Neglect, which provided an overview of the research on child abuse and neglect. New Directions in Child Abuse and Neglect Research updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. New Directions in Child Abuse and Neglect Research recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. New Directions in Child Abuse and Neglect Research identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response. "Understanding the fall is Susan's first book and is based on her own personal experience of growing up with an alcoholic parent. She has performed readings of her book and has donated it to recovery houses and institutions throughout Los Angeles." -- P. [4] of cover.
