Abstract: Basic communication and instructional techniques which may be used by employees at all levels within Child Nutrition Programs (CNP) are included in the "Employee Training" module, one of four units on the second level of a sequential five level series. With particular emphasis on situations encountered in CNP facilities, the participants should have

competencies, after completing the 20 hour course in: formulating behavioral training objectives, writing job descriptions, evaluating training effectiveness, solving training problems and preparing training aids. Each lesson outlines the lecture or discussion content and lists individual and group activities and resources needed to meet stated objectives. The Complete Idiot's Guide to Dealing with Difficult Employees

The Training Manuals

If you have tried to set up an employee training program on sexual harassment, you already know how time consuming & overwhelming such a task can be. The information that does exist is in bits & pieces, spread throughout literally hundreds of sources so that just pulling the information together is a major undertaking. Insuring that the information is up-to-date, designing the training sessions, & finally presenting the sessions to employees all require time & expertise that few people have available to them. There is widespread consensus that such training programs do have an impact on preventing &/or eliminating sexual harassment in the workplace. Employee training has been suggested by the Equal Employment Opportunity's 1980 Guidelines on Sexual Harassment as well as by federal courts. The purpose of this Training Manual is to allow individuals to set up sexual harassment training programs for employees in a number of days or weeks rather than the months usually required. It is a "how to" manual, with specific & detailed instructions for accomplishing the entire training effort from beginning to end. The manual includes training materials for both trainer & trainees. When you purchase the Training Manual, you also receive the Resource Manual; they are sold as a set & should be used in conjunction with each other. While the Training Manual provides step-by-step instructions & materials, the Resource Manual provides background information to give the trainer the knowledge & understanding he or she should have before undertaking a training program.

With comprehensive coverage of topics related to learning, training, and development, this volume is a must-have

resource for industrial and organizational (I/O) psychologists, human resource (HR) scholars, and adult education specialists. Brown provides a forward-looking exploration of the current research on workplace training, employee development, and organizational learning from the primary point of view of industrial organizational psychology. Each chapter discusses current practices, recent research, and, importantly, the gaps between the two. In analyzing these aspects of the topic, the chapter authors both present the valuable knowledge available and show the opportunities for further study and practice.
