"As a mom, wife, and social media entrepreneur, Mallika Chopra frequently wondered how she could possibly do one more thing. Like so many, she was taking lousy care of herself and having a difficult time finding richer meaning and purpose in each day, even though that was her business's mission. Living with Intent is a practical yet deeply personal look at her year-long journey to discover some workable answers. Along the way, she sat down with Andrew Weil, Eckhart Tolle, Gretchen Rubin, Marianne Williamson, Daniel Siegel, and others, who shared their valuable input and insight"--

NOMINATED FOR TATA LITERATURE LIVE AWARDS AND SHORTLISTED FOR GAJA CAPITAL BEST BUSINESS BOOK PRIZE The book is an untold human story of an enterprise and its creator, Dilip Shanghvi, who raced ahead of Mukesh Ambani to become the richest Indian in 2015 Shanghvi is one of the most interesting and least understood business minds of India whose journey has been shrouded in mystery because of his reticence. The book reveals the riveting story of the fiercely intense personality that lies beneath his calm demeanour. Based on interviews with over 150 friends, family members, rivals, former aides and Shanghvi himself, it traces his transformation from a quiet, curious child working in his father's small shop to an astute strategist, who built India's largest pharma company, Sun Pharma, despite being untrained in science. The tale unravels his contrarian and controversial bets that made Sun a global force, and him a 'turn-around' artist. It is also about the friends and family Shanghvi started his company with, the hurt and emotional conflicts surrounding their separation, and how Shanghvi staked his closest relationships to professionalize Sun. This book is an extraordinary story of an ordinary man, who chooses to stay anti-famous. He would rather have his face unrecognized, his story untold. But at a time, when a billion dreams are simmering in an aspiring India, this tale is for everyone who has once had a secret dream, an insanely bold one.

Decades of State and non-State violence in India's landlocked North-east have taken a heavy toll on livelihoods, incomes, governance, growth and image, besides lives. Despite vast amounts of money being pumped into the region, basic needs and minimum services are yet to be met in terms of connectivity, health, education and power. What are the possible ways forward as the region stands at a crossroads? These fifteen personal essays provide an insider's take on wide-ranging issues: from the Brahmaputra and the use of natural resources to peace talks in Nagaland; from the Centre's failure to repeal the hated Armed Forces Special Powers Act, threats to the environment, corruption in government and extortion by armed groups to New Delhi's Look East Policy and much more. Yet, as these essays make clear, hope, though distant, is not absent or lost. Restoring governance through people-driven development programmes, peace building through civil society initiatives, assuring the pre-eminence of local communities as evident in Hazarika's conversations with the legendary Naga leader, Th. Muivah, and simple economic interventions through appropriate technologies — boats and health care, community mobilization and micro-credit — hold promise for solutions to the web of violence, poverty and marginalization. Writing on the Wall is a passionate call to all stakeholders in the North-east to embrace dialogue and use given platforms for peace, to go beyond the politics of tolerance to that of mutual respect. Only such multi-disciplinary, innovative approaches, rooted in realism, can bring stability and sustainable change to the region.

Şiirler ve Sözler

Love takes work, but, when it comes to relationships, it pays to work smarter. Couple Skills, Second Edition, revised and updated from the therapist-recommended classic, will show you how to work smarter in your relationship. You'll learn to improve communication, cope better with problems, and resolve conflicts with the one you love in healthy and creative ways. Each chapter teaches you an essential skill that supports greater relationship satisfaction and deeper intimacy. New to this edition is a chapter on using acceptance skills, developed from the revolutionary new acceptance and commitment therapy (ACT). These new approaches will help you to accept your partner's feelings (and your own emotions) without judgment. Using these techniques will help you decide what you really value in your relationship and then commit to acting in ways that further those values every day.

Highly valued by both therapists and educators, Occupational Therapy: Performance, Participation, and Well-Being has been integral to the evolution of occupational therapy services and functions.

Incorporated within this impressive third edition are new features and topics that shape the modern era in occupational therapy practice. Senior editors Charles H. Christiansen and Carolyn M. Baum, along with contributing editor Julie Bass-Haugen have worked collectively to go beyond the presentation of occupational therapy theories. The third edition uses a more learner-friendly approach by explaining how the theories apply in various practice settings. This format enables students, instructors, and practitioners to connect the crucial link between theory and practice. Charles H. Christiansen, Carolyn M. Baum, and Julie Bass-Haugen have organized the first section in a manner that first develops and then establishes a clear understanding of human occupation. Section Two makes explicit the Person-Environment-Occupation-Performance Model that can be used at an individual, organization, or population level. Section Three covers current and emerging trends and introduces major intervention strategies that are used in the field, as well as comprehensive literature support for use in occupational therapy practice. Occupational Therapy: Performance, Participation, and Well-Being, Third Edition is designed to be used in all curricula in occupational therapy by providing a framework for educational preparation that addresses the ACOTE Accreditation Standards. A variety of helpful features are provided that will evoke classroom discussion and direct the students toward evidence to guide their clinical reasoning. New Topics: Social justice and advocacy roles for occupational therapy. The value of occupational therapy in fulfilling society's current and future needs. Occupational performance in person, community, and organizational contexts. The important and emerging area of community health. A useful framework for intervention planning. Features: An impressive appendix comparing the language of the International Classification of Functioning and Disability, the PEOP Model, and the American Occupational Therapy Practice Framework. A valuable description of the terms most frequently used in occupational therapy prepared by occupational therapy's noted scholar and historian Dr. Kathlyn Reed. Contributions from 28 of the most renowned experts in occupational therapy. A reflection section at the end of each chapter to reinforce important topics. Active learning activities for individuals and groups to assist with the application of theories to practice. Internet-based activities are included as part of the active learning exercises. Evidence worksheets to demonstrate the application of evidence to practice. Look to the standard textbook in occupational therapy to understand today's services and functions and tomorrow's possibilities. Children of the Albatross is considered by critics to be one of Anaïs Nin's most beautifully written books; it is also a groundbreaker in that it eloquently addresses androgyny and homosexuality, which few literary works dared to do in 1940s America. We are introduced to three of Nin's most significant characters: Djuna, Lillian, and Sabina, all of whom represent different aspects of Nin's character--serenity, earthiness, and the femme fatale, respectively. In the first part of the novel, "The Sealed Room," we witness Djuna's developing perception of sexuality as we follow her from when, as an adolescent, she has learned to fear powerful, masculine, potent men, to her search for love in young, sexually ambivalent men--the "transparent children"--finally fusing with an airy teenage boy to whom she introduces the world of love and sexuality. In the second part, "The Café," Nin reveals the psychological truth of her relationship with her lover and mentor, Henry Miller, via her main characters' interactions with the powerful, omnipotent Jay, whom Nin fashioned after Miller. Children of the Albatross offers the reader Anaïs Nin's sense of "inner reality" perhaps more beautifully and effectively than in any other work.

"Analyzes life as we are living it, and the analysis is truthful and profound."--New York Times Loneliness, boredom, emptiness: These are the complaints that Rollo May encountered over and over from his patients. In response, he probes the hidden layers of personality to reveal the core of man's integration--a basic and inborn sense of value. Man's Search for Himself is an illuminating view of our predicament in an age of overwhelming anxieties and gives guidance on how to choose, judge, and act during such times. Can a disease, more importantly, cancer, be a potent tool of self-evolution for both, the person who suffers from it, and his/her caregivers, especially parents? The value of good health is realized when it no more remains with us. The journey to salvage the lost friend can still offer myriad opportunities of redemption and self-discovery. It is up to us how we decide to tread this formidable path leading to self-actualization. Time has made us realize that it is not fair to stereotype a person suffering from cancer from the point of view of cure or recovery. Many a time, such stereotyping comes from our own society, and sometimes, ironically, from the medical fraternity, for its inability to go beyond a point, after which you feel you are condemned and vegetative. All these negativities passively entrap the patients and their parents in the viciousness of the disease where they die many times before the actual death. This is the worst form of cancer which has plagued our mindset. In the case of Divyansh Atman, the authors' son, it was not so. Divyansh was the embodiment of courage and self-determination in the face of adversities. His life journey shows us how the path of opportunities can still be paved in the middle of adversities. He lived a big and a meaningful life that made a huge impact on the lives of people around him. Cancer can bring in self-evolution, both for the sufferer and his caregivers. An inspirational memoir. A soul stirring account of a young boy who suffered from cancer but lived a life which inspired many. A true story of grit and human strength. To be read by every parent who grieves the

Oxidative Stress and Antioxidant Protection: The Science of Free Radical Biology and Disease Oxidative Stress and Antioxidant Protection begins with a historical perspective of pioneers in oxidative stress with an introductory section that explains the basic principles related to oxidative stress in biochemistry and molecular biology, demonstrating both pathways and biomarkers. This section also covers diagnostic imaging and differential diagnostics. The following section covers psychological, physiologic, pharmacologic and pathologic correlates. This section addresses inheritance, gender, nutrition, obesity, family history, behavior modification, natural herbal-botanical products, and supplementation in the treatment of disease. Clinical trials are also summarized for major medical disorders and efficacy of treatment, with particular focus on inflammation, immune response, recycling, disease progression, outcomes and interventions. Each of the chapters describes what biomarker(s) and physiological functions may be relevant to a concept of specific disease and potential alternative therapy. The chapters cover medical terminology, developmental change, effects of aging, senescence, lifespan, and wound healing, and also illustrates cross-over exposure to other fields. The final chapter covers how and when to interpret appropriate data used in entry level biostatistics and epidemiology. Authored and edited by leaders in the field, Oxidative Stress and Antioxidant Protection will be an invaluable resource for students and researchers studying cell biology, molecular biology, and biochemistry, as well professionals in various health science fields.

"Erica Garza has written a riveting, can't-look-away memoir of a life lived hardcore...In an era when predatory male sexual behavior has finally become a topic of urgent national discourse...Getting Off makes for a wild, timely read" (Elle). A fixation on porn and orgasm, strings of failed relationships and serial hook-ups with strangers, inevitable blackouts to blunt the shame—these are not things we often hear women share publicly, and not with the candor, eloquence, and introspection Erica Garza brings to Getting Off. What sets this courageous and riveting account apart from your typical misery memoir is the absence of any precipitating trauma beyond the garden variety of hurt we've all had to endure in simply becoming a person—reckoning with family, learning to be social, integrating what it means to be sexual. Whatever tenor of violence or abuse Erica's life took on through her behavior was of her own making, fueled by fear, guilt, self-loathing, self-pity, loneliness, and the hopelessness those feelings brought on as she runs from one side of the world to the other in an effort to break her habits—from East Los Angeles to Hawaii and Southeast Asia, through the brothels of Bangkok and the yoga studios of Bali to disappointing stabs at therapy and twelve-steps back home. In these remarkable pages, Garza draws an evocative, studied portrait of the anxiety that fuels her obsessions, as well as the exhilaration and hope she begins to feel when she suspects she might be free of them. Getting Off offers a brave and necessary voice to our evolving conversations about addiction and the impact that internet culture has had on us all—"a profoundly genuine, gripping story that any reader can appreciate" (Vice). "In reading Garza's insight into her own experiences, we better understand ourselves" (The New York Times Book Review).

The "raging frenzy" of the sex drive, to use Plato's phrase, has always defied control. However, that's not to say that the Sumerians, Victorians, and every civilization in between and beyond have not tried, wielding their most formidable weapon: the law. At any given point in time, some forms of sex were condoned while others were punished mercilessly. Jump forward or backward a century or two (and often far less than that), and the harmless fun of one time period becomes the gravest crime in another. Sex and Punishment tells the story of the struggle throughout the millennia to regulate the most powerful engine of human behavior. Writer and lawyer Eric Berkowitz uses flesh-and-blood cases—much flesh and even more blood—to evoke the entire sweep of Western sex law, from the savage impalement of an ancient Mesopotamian adulteress to the imprisonment of Oscar Wilde in 1895 for "gross indecency." The cast of Sex and Punishment is as varied as the forms taken by human desire itself: royal mistresses, gay charioteers, medieval transvestites, lonely goat-lovers, prostitutes of all stripes, London rent boys. Each of them had forbidden sex, and each was judged—and justice, as Berkowitz shows, rarely had much to do with it. With the light touch of a natural storyteller, Berkowitz spins these tales and more, going behind closed doors to reveal the essential history of human desire.

"A fascinating look at how scientists are working to help doctors treat the aging process itself, helping us all to lead longer, healthier lives." —Sanjay Gupta, MD Aging—not cancer, not heart disease—is the underlying cause of most human death and suffering. The same cascade of biological changes that renders us wrinkled and gray also opens the door to dementia and disease. We work furiously to conquer each individual disease, but we never think to ask: Is aging itself necessary? Nature tells us it is not: there are tortoises and salamanders who are spry into old age and whose risk of dying is the same no matter how old they are, a phenomenon known as "biological immortality." In Ageless, Andrew Steele charts the astounding progress science has made in recent years to secure the same for humans: to help us become old without getting frail, to live longer without ill health or disease.

"Presenting an effective treatment approach specifically tailored to the unique challenges of body dysmorphic disorder (BDD), this book is grounded in state-of-the-art research. The authors are experts on BDD and related conditions. They describe ways to engage patients who believe they have defects or flaws in their appearance, not a psychological problem. Provided are clear-cut strategies for helping patients overcome the self-defeating thoughts, impairments in functioning, and sometimes dangerous ritualistic behaviors that are core features of BDD. Clinician-friendly features include step-by-step instructions for conducting each session and more than 50 reproducible handouts and forms; the large-size format facilitates photocopying. See also the related self-help guide by Dr. Wilhelm, Feeling Good about the Way You Look, an ideal recommendation for clients with BDD or less severe body image problems."--

In this delightful conclusion to the Heiress trilogy, Julianne MacLean brings us a fresh twist on classic historical romance—London society as seen through the eyes of a lovely, light-hearted young outsider. Adele Wilson firmly believes life should be calm and entirely without emotional drama. So the first landed gentleman her mother puts in front of her is the one she

agrees to marry, and wedding preparations begin as neatly as she hoped. Until, on the way to seal the deal, her carriage is overtaken by ransomers. And then the ransomers are overtaken by someone handsomer, namely Damien Renshaw, Baron Alcester, cousin to her betrothed. Prim, stately Adele finds that she too is being overtaken, by the manliness of this heroic, albeit complicated man. And Damien is not totally unmoved by her challenging nature, which he believes hides a passion and recklessness never before explored. If only he can get her to explore it with him, there is no telling what kind of love—and excitement—the two of them might discover together.

This gripping narrative explores today's scientific pursuit of immortality, with exclusive visits inside Silicon Valley labs and interviews with the visionaries who believe we will soon crack into the aging process and cure death. We live in an age when billionaires are betting their fortunes on laboratory advances to prove aging unnecessary and death a disease that can be cured. Researchers are delving into the mysteries of stem cells and the human genome, discovering what it means to grow old and how to keep those processes from happening. This isn't science fiction; it's real, it's serious, and it's on track to revolutionize our definitions of life and mortality. In *Immortality, Inc.*, veteran science journalist Chip Walter gains exclusive access to the champions of this radical cause, delivering a book that brings together for the first time the visions of molecular biologist and Apple chairman Arthur Levinson, genomics entrepreneur Craig Venter, futurist Ray Kurzweil, rejuvenation trailblazer Aubrey de Grey, and stem cell expert Robert Hariri. Along the way, Walter weaves in fascinating conversations about life, death, aging, and the future of the human race.

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in

returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

"This book provides vital insights into the elements of strategy and their application to media firms. Solidly grounded in theory but not pedantic, it is essential reading for those who make or wish to comprehend choices of media companies." - Robert Picard, University of J ö nk ö ping "Insightful, contextually analytical, yet easy to comprehend, Strategic Management in the Media successfully applies the adaptive and interpretative areas of strategic theory in the media sectors. It provides a unique perspective in which common themes linking media strategy and industry environment are thoughtfully discussed." - Sylvia M. Chan-Olmsted, University of Florida "...an invaluable asset for students of media management. The use of pertinent examples and case studies throughout brings the analysis to life and contributes to a highly readable introduction." - Gillian Doyle, University of Glasgow This book is a comprehensive, accessible and expert introduction to strategy within a media management context. It is divided into two parts - part one provides an introduction to and overview of the media industry from a strategic management perspective, looking in detail at the sectors that together comprise the industry - newspaper, book and magazine publishing, music, radio and television - and the strategic forces at work in each. This provides the foundation for part two, which analyses a number of strategic topics central to the media sector, such as technological change, organisational structure, leadership, and creativity and innovation. The chapters follow the same structure: the relevant theory is outlined, its application to the media industry is discussed, and case studies from the media industry are used to illustrate the theory and illuminate its relevance for the media field. The cases and examples used come from all sectors of the industry and a range of geographic regions and include News Corporation, Endemol, BBC, Bertelsmann, CNN, MTV, Disney and Pixar.

How can India become a great country once again, is the question explored in this book. In the past, India had significant achievements in science, technology, mathematics and business. A failure to build robust institutional networks of information and trust and indifference of the state to business communities, brought all that crashing down within a generation. Many of these historical patterns persist till today. The ability to create wealth has everything to do with such networks. There was never any shortage of innovation in India. What was lacking was the ability to learn from their own experience. The building of learning networks and a learning ecosystem that could be used by people to leverage success – this is what is needed to unlock the huge talent pool that India possesses. This book addresses young, educated and aspiring Indians in different walks of life who are interested in contemporary issues relating to nation, society and economy. It puts forward some solutions to the problems that India faces. It would be of interest to anyone who would like to know how history can teach us to re-write the Indian growth story and to re-build a great nation. The book could also be used as reading material for students of history, political science, public administration, business administration, in under-graduate and post-graduate classes. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

From the tiniest microchip to the information superhighway, the modern world is dominated by and dependent upon science. Yet whether we realize it or not, we live in an age where faith is still an important influence in our lives. The majority of Americans profess a belief in a Christian God and Islam acts as a unifying, energizing force for many of the world's most dispossessed people. In the UK congregations may be shrinking, but popular belief in the supernatural - ghosts and spirits, fortune-telling, faith healing - is stronger than ever. In *The Story of God* Robert Winston examines the relationship between science and religion across time, beginning with the primitive worship of early ancestors and concluding with a vivid portrait of faith in the modern world. Grand in scope, adventurous in tone - and written from the perspective of a respected scientist who is also committed to Judaism - this groundbreaking work traces a line across continents, cultures and eras.

This book would have been completed earlier but for events that disrupted millions of lives across India, including those of journalists : the demolition of the Babri Masjid at Ayodhya, by a Hindu mob on 6 December 1992 and the communal riots that followed across the country. In January 1993, the selective massacres of Muslims at Bombay and the devastating revenge bomb blasts there two months later led to extensive travelling and reporting for the New York Times. In addition, there was 'normal reporting' : the Punjab, environmental, economic and political issues such as the billion dollar scam.

The internet has made access to sexually explicit content radically more easy than ever before. This book is essential reading for those who are troubled by their own relationship with pornography, and for those who want to understand the world we now live in. Republished with extensive revisions in December 2017.
