The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected — but not challenged — the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to ‘bring back space’ into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss.

For years, Steve McVey's Grace Walk (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now The Grace Walk Experience workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

An already weakened U.S. economy crumbles after a rogue nation detonates a small nuclear bomb in a Los Angeles port. The disastrous economic domino effect known as "Black Autumn" threatens a group of Special Forces vets, their families, and friends, leaving serious doubt that their skills and fortitude will be enough to bridge the deadly gap between modern society and an epoch of American savagery.

Their competition has never been so irresistible The last person Ellie McDermott wanted to run into after returning to her hometown is Finn Donovan, her high school nemesis and the guy she crossed the line from enemies to lovers with one night years ago. Now ex-military, tattooed, and still sexy as hell, Finn is a complication Ellie doesn't need-she needs to concentrate on saving her family business. Finn's entire life, Ellie was there, going head-to-head with him in every class, bee, and test. So it's no surprise she'd show up just as he was about to take over her father's struggling business. It is a surprise, though, that his attraction to her is even more explosive than it had been. Acting on their attraction is one thing, but Finn has to turn a profit to save his own family, and nothing-not even love-will get in his way. What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a reponse to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.

"You're Ellie Spencer." I opened my mouth, just as he added, "And your eyes are opening." Seventeen-year-old Ellie Spencer is just like any other teenager at her boarding school. She hangs out with her best friend Kevin, she obsesses over Mark, a cute and mysterious bad boy, and her biggest worry is her paper deadline. But then everything changes. The news headlines are all abuzz about a local string of serial killings that all share the same morbid trademark: the victims were discovered with their eyes missing. Then a beautiful yet eerie woman enters Ellie's circle of friends and develops an unhealthy fascination with Kevin, and a crazed old man grabs Ellie in a public square and shoves a tattered Bible into her hands, exclaiming, "You need it. It will save your soul." Soon, Ellie finds herself plunged into a haunting world of vengeful fairies, Maori mythology, romance, betrayal, and an epic battle for immortality.

A comprehensive text offers coverage of news, features, sports, politics, and contemporary issues and includes interviews with leading professionals, technical illustrations, and summaries of the latest research in the field.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Becausestudents who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. Theauthors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging,race/raicism and health, mental health, and healers and healing.

Issues in the Conservation of Photographs is the first publication to chronicle the emergence and systematic development of photograph conservation as a profession. In seventy-two essential texts from the nineteenth century to the present day, this anthology collects key writings that have influenced both the philosophical and the practical aspects of conserving photographic materials. The materials were carefully selected by the editors along with an advisory board of international experts and include some--particularly the lectures, memos, and letters--that have never been published. Many of the topics--safe environmental parameters, silver image permanence, and proper treatment methods--have been debated since the introduction of photography. By promoting an understanding of these issues, this volume seeks to advance the education of rising conservation professionals, inspire new scholarship, and contribute to the field's ongoing evolution.

Reference source for the care and preservation of photographs and motion picture film. Evaluates the light fading and dark fading/yellowing characteristics of color transparency films, color negative films, and color photographic papers, with recommendations for the longest-lasting products. High-resolution ink jet, dye sublimation, color electrophotographic, and other digital imaging technologies are discussed, as are conservation matting, mount boards, framing, slide pages, negative and print enclosures, storage boxes, densitometric monitoring of black-and-white and color prints in museum and archive collections, the care of color slide collections, the permanent preservation of color motion pictures, the preservation of cellulose nitrate films, and many other topics.

In a straightforward approach, Hanania Benklifa provides readers the practical knowledge needed to trade options conservatively in Profiting with Iron Condor Options: Strategies from the Frontline for Trading in Up or Down Markets. The objectives are simple: make 2%-4% a month staying in the market as little as possible. Market experts use option condors to consistently earn monthly returns while trading conservatively and staying in the market as little as possible. Benklifa--who manages \$10+ million in condor trades each month--shows you exactly how to run these trades and earn these returns, delivering all the details you need to master every nuance of this remarkable strategy. Benklifa shares option condors examples using market realities, not oversimplified abstractions. You'll learn how to handle real-life market dynamics that can dramatically impact results, including rising and falling volatility, changing bid-ask spreads, and distorted call parity. You'll learn how to profit in the sideways markets where condor options are most widely used--and also in extreme-trending markets that offer their own surprising opportunities. Traders who focus on a specific type of trade have a history of outperforming stock pickers and directional investors. This book will give you that deep and usable level of knowledge about one of today's most well-proven strategies: option condors.

"This is the magnum opus on digital printing and the book to read before color calibrating your monitor or wondering about differences in pigmented and dye-based inks. With little in the way of "how-to," the book focuses more on why and showcases eloquent photographs, including a heartbreakingly beautiful portrait of Marilyn Monroe, a naked World War II bomber tail gunner, and the inevitable "Emperor's New Clothes" work. Equally heartbreaking for far different reasons is Henry Wilhelm's essay "A History of Permanence" that includes a section called "The Totally Lost Kodacolor Era" that will leave you stunned by the corporate callousness that's described. This book not only deserves to be on the bookshelf of anybody who cares about photography, it deserves to be read." -- Joe Farace, Shutterbug Most of us know him as one member of the band Crosby, Stills, Nash and Young, but what you may not know is that at the same time Graham Nash was rocking the world, he was also pursuing a parallel career in photography and digital imaging. Nash Editions—the world's premier fine-art digital printmaking studio, which Graham co-founded with R. Mac Holbert—represents the pinnacle of those efforts. This book uses thought-provoking essays and glorious artwork to sum up not only Nash Editions' achievements but also the state of fine-art digital printmaking. After a brief history of printmaking, you'll reach the heart of the book: an essay by Holbert on the genesis of Nash Editions and fine-art digital printing (which details the studio's interactions with major artists like David Hockney); an essay by MoMA consultant Henry Wilhelm (which includes a technical comparison of traditionally and digitally prepared prints); and commentary from Nash Editions artists. The book's more than 100 illustrations include Nash Editions artwork, photos of artists in the studio, images of the machines used in digital printing, and illustrations of the proofing process.

Over two hundred and thirty years ago the Fallocaust happened, killing almost everything that lived and creating what is now known as the greywastes. A dead wasteland where cannibalism is a necessity, death your reality, and life before the radiation nothing but pictures in dog-eared magazines. Reaver is a greywaster, living in a small block controlled by a distant ruler said to have started the Fallocaust. He is a product of the savage world he was raised in and prides himself on being cold and cruel. Then someone new to his town catches his eye, someone different than everyone else. Without knowing why he starts to silently stalk him, unaware of where it will lead him.

Time isn't always on a vampire's side.... Iolanthe Tennyson has had a very bad year—due in part to the very bad men in her life. So she's accepted her cousin's invitation to spend the summer in Austria to indulge her photography hobby. Rumors of a haunted forest there draw Iolanthe into the dark woods—and into the eighteenth century.... Nikola Czerny is a cursed man, forced by his half brothers to live forever as a Dark One. But his miserable existence takes an intriguing turn when a strange, babbling woman is thrown in his path. Iolanthe claims to know Nikola's daughter—three hundred years in the future. She also knows what fate—in the form of his murderous half brothers—has in store for him. If only she knew the consequences of changing the past to save one good, impossibly sexy vampire...
