Ethical standards and principals are one of the most significant part of any professional field. Being an applied practice field, the application of ethical codes and conduct is a critical component for school psychologists. There have been numerous research studies on ethical decision making and ethical dilemmas in many applied fields to help update the ethics principles and codes, same is the case for the field of School Psychology (APA, 2017; NASP, 2010). The purpose of this study was to examine school psychologists' professional characteristics with regards to managing critical incidents that pose potential ethical violations. An additional purpose was to investigate if the school psychologists' ratings on the categories including experience, violation, harm, and legality would be able to predict the level of difficulty in solving an ethical dilemma. The perceptions of psychologists towards various ethical dilemmas have previously been studied by Pope and colleagues (1987), and the level of complexity of ethical incidents and their solution has been proposed by Bailey and Burch (2016) in a model for behavior analysts. The current study aimed to adapt the Pope and colleagues' (1987) research study and modify it to apply for the field of school psychology and investigate if the Bailey and Burch (2016) model can be applicable for school psychologists as well. The results of the study indicate that the ratings of school psychologists on the scales of Personal Experience, Ethical Violation, Probability of Harm and Legal Implications was able to predict the Ease of Solution for a given critical incident. In addition, the ratings on the scale of Probability of Harm was significantly able to predict how easy it would be to resolve a particular dilemma for a practitioner in the field of school psychology.

Many counselors learn about ethics in graduate school by applying formal, step-by-step ethical decision-making models that require counselors to be aware of their values and refrain from imposing personal values that might harm clients. However, in the real world, counselors often make split-second ethical decisions based upon personal values. Values and Ethics in Counseling illustrates the ways in which ethical decisions are values--but more than that, it guides counselors through the process of examining their own values and analyzing how these values impact ethical decision making. Each chapter presents ethical decision making as what it is: a very personal, values-laden process, one that is most effectively illustrated through the real-life stories of counselors at various stages of professional development--from interns to seasoned clinicians--who make value-based decisions. Each story is followed by commentary from the author as well as analysis from the editors to contextualize the material and encourage reflection.

This book features a collection of seven ethical scenarios from multiple fields and cultures. Ethical Dilemmas will be a helpful tool for classroom ethical discussions, or as an aid for personal ethical exploration. Each scenario will encourage a leader to consider the various factors involved in the dilemma while determining the best course of action. This book also offers a brief description of a few prominent ethical frameworks mentioned within the book. It's a must read for any student interested in the development of ethical leadership.

This book is open access under a CC-BY license. Moral dilemmas are a pervasive feature of working life. Moral Reasoning at Work offers a fresh perspective on how to live with them. How do we cope with situations where no matter what we decide to do, something will be wrong? How do we live with the moral dissonance between what we are tempted to do and what is in line with our moral convictions? What can organizations do to establish a foundation for responsible decision-making and conduct? This book combines research streams from ethics and moral psychology using extensive experience of sessions of moral reasoning with leaders and employees in organizations. It argues that there is a need to go beyond compliance and traditional approaches to ethics in order to prepare decision-makers for moral dilemmas. Organizations can do that by encouraging people to become actively and regularly involved in moral reasoning at work. New and experienced psychotherapists alike can find themselves overwhelmed by an ethical quandary where there doesn't seem to be an easy solution. This book presents positive ethics as a means to overcome such ethical challenges. The positive approach focuses on not just avoiding negative consequences, but reaching the best possible outcomes for both the psychotherapist and the client. The authors outline a clear decision-making process that is based on three practical strategies: the ethics acculturation model to help therapists incorporate personal ethics into their professional roles, the quality enhancement model for dealing with high-risk patients who are potentially harmful, and ethical choice-making strategies to make the most ethical decision in a situation where two ethical principles conflict. Throughout the decision-making process, psychotherapists are encouraged to follow four basic guidelines: Focus on overarching ethical principles Consider intuitive, emotional, and other nonrational factors Accept that some problems have elusive solutions Solicit input from colleagues and consultation groups Numerous vignettes illustrate how to apply positive ethics to many different ethical challenges that psychotherapists will likely encounter in practice.

This book has been about ethics and ethical decision making. As ethical reflection permeates every decision made in practice, the book discussed the importance of developing moral reasoning ability, which is crucial for handling ethical dilemma and making ethical decisions in nursing and social work practice. The book used discussions based on case studies to illustrate how ethics inform practice and allow one to make decisions that are morally justifiable. "This book will enable our students to gain a step by step approach to the knowledge and application of Ethics to practice. The book drew from the work of many scholars and designed a simple model to help students gain the knowledge of ethical analysis and decision making". Vidal Johnson, Senior Lecturer in Law and Ethics, London South Bank University "I was impressed by the way this author consistently addressed both social work and nursing ethical issues, highlighting the importance of ethics and application in nursing and social work practice". Michelle Evans, Senior lecturer in Learning Disability/Mental Health and Social Work, London South Bank University "Most other published books on nursing and social work ethics are often laden with theories and principles. This book offers an excellent contribution to the understanding of the relationship between learning ethical theories and principles and their practice applications". Jude C. Ibe, Principal lecturer in Dept. of Family Care and Mental Health; University of Greenwich, London.

"Knowing yourself and your responsibilities requires understanding your ethical assumptions and frameworks. This chapter identifies four major ethical theories that inform professional codes of ethics, including deontology, consequentialism, ethics of care, and virtue ethics. It also provides a typology for the mental health professional's use of self that includes (1) negative underinvolvement, (2) positive underinvolvement, (3) positive overinvolvement, and (4) negative overinvolvement. It ties each of these positions to the use of a hierarchy of professional influence, ranging from persuasion, leverage, inducement, and threat, to compulsion"--

The Journal of Business Ethics was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy , with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

It also shows the process, step by step, to a successful outcome toward ethical problem solving and decision making"--

This book features original essays by leading epistemologists that address questions related to epistemic dilemmas from a variety of new, sometimes unexpected, angles. It seems plausible that there can be "no win" moral situations in which no matter what one does one fails some moral obligation. Is there an epistemic analog to moral dilemmas? Are there epistemically dilemmic situations—situations in which we are doomed to violate an epistemic requirement? If there are, when exactly do they arise and what can we learn from them? The contributors to this volume cover a wide variety of positions on epistemic dilemmas. The coverage ranges from discussions of the nature of epistemic dilemmas to arguments that there are no such things to suggestions for how to resolve (or at least live with) epistemic dilemmas to proposals for how thinking about epistemic dilemmas can be used to inform theorizing in other areas of epistemology. Epistemic Dilemmas will be of interest to scholars and advanced students in epistemology working on the nature of justification and evidential support, higher-order requirements, or suspension of judgment.

A school's ethical life is studied as the authors examine ethical theories, everyday controversies, dilemmas, and decision-making.
Ethical predicaments are endemic for mental health professionals working in a host setting like schools. New interventions, evolving technologies, and a patchwork of ethical guidelines and legal codes create a constant stream of new ethical dilemmas. Quick answers and simple solutions are rare, but with the seven-stage model presented here, readers will learn to apply an ethical decision-making process that minimizes their liability while better protecting their students. Beginning with an introduction to the moral, legal, and clinical foundations that undergird ethical practice, the authors outline an ethical decision-making process to handle conundrums that includes seven major steps: know yourself, analyze the dilemma, seek consultation, identify courses of action, manage the clinical concerns, enact the decision, and reflect on the process. Each chapter describes these steps in detail, provides case examples to illustrate their application, and presents exercises that encourage readers to integrate them into their everyday practice. This handy guide is written for the school social workers, school psychologists, school nurses, and school counselors who are responsible for acting in their students' best interests, as well as post-secondary students studying to enter one of these professions. It will be a trusted resource for school services professionals seeking clear but nuanced guidance in resolving thorny ethical issues.
Ethical Dilemmas in the Creative, Cultural and Service Industries enhances professional ethical awareness and supports students' development of skills for ethical decision-making in these growing sectors. Major ethical issues such as CSR, ethical leadership, human rights, fraud, employee rights and duties, new technology and (social) entrepreneurship are addressed. This will be invaluable reading for students studying tourism, hospitality, leisure, events, marketing, healthcare, logistics, retail and game development. It will also be a suitable resource for in-company training of practitioners already working in this wide range of domains.
