Eyes A Teachers

Three-year old Emily greets her grandfather at the front door: “We're having a surprise party for your birthday! And it's a secret!” We may smile at incidents like these, but they illustrate the beginning of an important transition in children's lives—their development of a “theory of mind.” Emily certainly has some sense of her

Classroom
Observation

before the age of six. But over the last twenty years, researchers have begun to challenge his methods and revise his conclusions. In The Child's Discovery of the Mind, Janet Astington surveys this lively area of research in developmental psychology. Sometime between the ages of two and five, children begin

Read Book
Ethnographic
Eyes A Teachers
Guide To
Classroom
Observation

to have insights into their own mental life and those of others. They begin to understand mental representation—that there is a difference between thoughts in the mind and things in the world, between thinking about eating a cookie and eating a cookie. This breakthrough reflects their emerging capacity

Eyes A Teachers
Guide To
Classroom
Observation

to infer other people's thoughts, wants, feelings, and perceptions from words and actions. They come to understand why people act the way they do and can predict how they will act in the future, so that by the age of five, they are knowing participants in social interaction. Astington highlights how crucial children's discovery of

Read Book Ethnographic Eyes A Teachers

People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that

classroom teaching has
on actual learning. Like
the original edition, this
book offers exciting
new research about the
mind and the brain that
provides answers to a
number of compelling
questions. When do
infants begin to learn?
How do experts learn
and how is this different
from non-experts? What
can teachers and schools

Ethnographic Eyes A Teachers Guide To Classroom Observation

"There are simply not enough texts that look comparatively at the two foremost experiments with questions of race, culture, and and class in the English-speaking world, the United States and South Africa.

Prudence Carter's work is simultaneously scholarly and compassionate. It helps us see, in these two
