In Climate Change and Marine and Freshwater Toxins the editors have assembled contributions from a team of international experts to expand the framework for an appropriate assessment of

Acces PDF Euro Pro User Manual File Type

climate change impacts on aquatic toxins. While the production of toxins by microalgae has been known for decades, establishing a factual link supported by scientific evidence is a very complex endeavor. The

Acces PDF Euro Pro User Manual File Type

increasing frequency and distribution of toxic blooms for example continue to raise serious concerns regarding seafood and drinking water safety. This book compiles current evidence on the influence of

Acces PDF Euro Pro User Manual File Type

climate change on the spreading of toxin producing species in aquatic systems. The chemistry and biology of toxin production is revised and an outlook on control and prevention of the toxin's impact on human and

animal health is given.

- Compelling quantitative evidence of complex interactions from primary toxin producers and along the food chain.
- Latest advances on prediction and prevention of water toxin
