In a fast-moving era of increased international competition, frontier markets must devise innovative ways to meet demanding sales targets and maintain profitability. These efforts will only succeed when local businesses abandon the concept of sales as a checklist of persuasive arguments that lead a customer to make a purchase and accept that building enduring customer relationships is the key to achieving sales goals. To understand what it means to sell successfully, sales representatives must develop a solid foundation in selling skills and an understanding of the critical elements needed to achieve sales goals. By delving into the foundational concepts related to leveraging sales as a tool for organisational profit, the authors give readers important insights into the critical elements of the sales process,

including consultative selling, sales force management, qualities of effective leadership in sales, and the use of technological tools such as Customer Relationship Management (CRM) and Sales Force Automation (SFA) systems. This book includes insightful contributions from leading sales and marketing practitioners across the continent of Africa on characteristics of successful salespeople and how to recruit them, the crucial role of sales leadership, sales team training methods and strategies for developing customer relationship management programs. Case studies tie theory to practice and short quizzes help readers test their understanding of the material. Written in an accessible and reader-friendly format, this book is primarily aimed at undergraduate students with a secondary audience comprised of postgraduate students and business practitioners. Lee and Philip Kotler's highly successful book *Social Marketing: Influencing Behaviors for Good*, 4th Edition, is structured around the ten-step marketing planning process that trains and encourages those in positions responsible for influencing public behaviors to undertake a systematic and comprehensive approach to behaviour change rather than jumping to the stage of producing just ads or distributing condoms. The book illustrates the planning process, importance of research, and related concepts through numerous examples that are of high quality and diverse contexts. Business ethics is a form of the art of applied ethics that examines ethical rules and principles within a commercial context, the various ethical problems that can arise in a business setting, and any special duties or obligations that apply to persons who are engaged in commerce. Business ethics can be both a normative and a descriptive discipline. As a corporate practice and a career specialisation, the field is primarily normative. In academia descriptive approaches are also taken. The range and quantity of business ethical issues reflects the degree to which business is perceived to be at odds with non-economic social values. Historically, interest in business ethics accelerated dramatically during the 1980s and 1990s, both within major corporations and within academia. For example, today most major corporate websites lay emphasis on their commitment to promoting non-economic social values under a variety of headings (e.g. ethics codes, social responsibility charters). In some cases, corporations have redefined their core values in the light of business ethical considerations. Catching business ethics in action, however, is a seldom-spotted nugget for in reality it depends on the characters of the characters.

This book reviews, updates and enhances the basic concepts surrounding the academic theory and practice of Integrated Marketing Communication (IMC). Since the introduction of IMC in the late 1980s, the concept has spread around the world. In that expansion, many scholars have written about IMC; practitioners have adopted and adapted the concept to fit their own market situations. Further, dramatic changes have occurred in the technologies used in marketing communications which consumers have accepted and employed in their consumption of products, messages and incentives. Thus, there have been dramatic changes in how IMC was initially envisioned and how it has developed over time. This book identifies and discusses these changes, how they have occurred and what they mean going forward for all types of marketers around the world. Thus, IMC, and indeed integration of communications at all organisational levels is an essential in the 21st century organisations. This book was published as a special issue of the Journal of Marketing Communications.

Building brands through integrated marketing is an approach being used by all top-level marketing strategists. The result of a series of papers presented at the eleventh annual Advertising and Consumer Psychology Conference held in Chicago, this volume brings together research professionals whose efforts focus on integrating the various persuasive tools of marketing. It goes beyond case studies of the use of integrated marketing to look at how integrated communication actually works on achieving optimal effects on the various audiences for products. This book focuses on marketing graphics, figures, and visual artifacts discussed in marketing theory in order to explain and discuss the marketing concepts visually and open a door to future predictions of the evolution of such marketing concepts. Marketing concepts are, by nature, abstract and there is a need for approaches that provide a clear picture of such concepts and concrete and hands-on knowledge tools to students, scholars, and practitioners. Furthermore, the recent rising importance and popularity of marketing metrics make visualization of such important marketing phenomena possible. Visualizing or concretizing of marketing data is more important than ever as the usage and presentation of such enormous amounts of data requires visual representation. Thus, the book provides collection of such marketing visualization examples that can help marketing scholars and students to make sense of marketing concepts and their data, so that they can develop clearer and winning marketing strategies.
