Designed by instructors with long-standing experience in teaching Korean, this workbook helps students acquire and practice their Korean language skills.

This book is the culmination of educational know-how and systematic grammar organization acquired by the three authors from their experience actually teaching Korean to foreigners in the classroom. In focusing strictly on Korean grammar, this series represents a departure from most current integrated teaching materials, allowing foreign learners to more easily concentrate on grammar in their study of Korean. The authors have included real dialogues and illustrations to make the study of Korean more interesting, especially for those students who have heretofore felt Korean grammar to be difficult. Further, this series equally serves as a general Korean grammar reference that can be used by Korean language instructors both in Korea and abroad who regularly experience the difficulty of teaching Korean grammar first-hand.

College Korean offers a comprehensive introduction to the Korean language designed for American students. Rogers, You, and Richards have used their many years of teaching to devise and test an approach that balances reading and writing with the spoken language. The result is a well-rounded textbook suited to a yearlong course in which students learn to conduct conversations about their own lives and interests, read texts written in hangul, and write simple compositions. The book systematically introduces basic Korean grammar, a contextualized vocabulary, and styles of speech that are sociolinguistically appropriate for college students. Each of its 26 lessons contains a dialogue or a reading, practice patterns, relevant grammar notes, and

exercises. Approximately 150 Sino-Korean characters are also introduced, and complete glossaries and grammar indexes are provided.

The furniture of Korea is practically unique among the furniture traditions of the world. It is part of a craft that goes back well over a millennium, keeping alive a tradition of alluring and mystical designs that has remained relatively unchanged from at least the seventeenth century. It is this tradition that has made Korean furniture one of the most sought-after styles of exotic furniture by antique dealers and collectors worldwide. Immediately recognizable as Korean, this unique art was only "discovered" by the West in the late 1940s and 1950s. What first captured the attention and recognition of the world was the furniture's elegant yet robust combination of simplicity and beauty. As in Japan, the primary type of

Korean furniture is the chest. It exemplifies the Korean affection for wood and wood grain patterns, using a rather limited range of woods in vigorous and decorative ways. Iron metalwork is functional or decorative or both, while most brass metalwork is largely decorative and as attractive as the woodworking itself. Shelves, tables, trays, desks, beds, and small boxes are also popular. This grand overview of one of the world's great furniture traditions will delight collectors, decorators, and anyone with an interest in the styles of Asian craftsmanship.
